However, the administrator observes that the corporate traffic does not match the SD-WAN rule ID 1.
Based on the exhibits, which configuration change is required to fix issue?

- A. In SD-WAN rule ID 1, change the destination to use ISDB entries.
- B. In the dc1-lab-rm route map configuration, set set-route-tag to 10.
- C. In the BGP neighbor configuration, apply the route map dc1-lab-rm in the outbound direction.
- D. In the dc1-lab-rm route map configuration, unset match-community.

Exhibit A shows a site-to-site topology between two FortiGate devices: branch1_fgt and dc1_fgt. Exhibit B shows the system global and system settings configuration on dc1_fgt.

When branch1_client establishes a connection to dc1_host, the administrator observes that, on dc1_fgt, the reply traffic is routed over T_INET_0_0, even though T_INET_1_0 is the preferred member in the matching SD-WAN rule.

Based on the information shown in the exhibits, what configuration change must be made on dc1_fgt so dc1_fgt routes the reply traffic over T_INET_1_0?

- A. Disable allow-subnet-overlap under config system settings.
- B. Enable auxiliary-session under config system settings.
- C. Disable t#p-session-without-syn under config system settings.
- D. Enable snat-route-change under config system global.

- B. After FortiGate switches to active mode, FortiGate never fails back to passive monitoring.
- C. During passive monitoring, FortiGate can't detect dead members.
- D. FortiGate can offload the traffic that is subject to passive monitoring to hardware.

NEW QUESTION # 95

Which two statements about SD-WAN central management are true? (Choose two.)

- A. The objects are saved in the ADOM common object database.
- B. It does not support meta fields.
- C. It supports normalized interfaces for SD-WAN member configuration.
- D. It uses templates to configure SD-WAN on managed devices.

Answer: A,D

Explanation:
Explanation
Normalized interfaces are not supported for SD-WAN templates. You can create multiple SD-WAN zones and add interface members to the SD-WAN zones. You must bind the interface members by name to physical interfaces or VPN
interfaces.https://docs.fortinet.com/document/fortigate/7.0.0/sd-wan-new-features/794804/new-sd-wan-template-
