Sample Network Appliance NS0-005 Questions Answers, NS0-005 Exam Pass4sure

Thousands of NetApp Technology Solutions Professional Exam (NS0-005) exam applicants are satisfied with our NS0-005 practice test material because it is according to the latest NetApp Technology Solutions Professional Exam (NS0-005) exam syllabus and we also offer up to 1 year of free Network Appliance Dumps updates. Visitors of PassSureExam can check the NS0-005 product by trying a free demo. Buy the NS0-005 test preparation material now and start your journey towards success in the NS0-005 examination.

Network Appliance NetApp Technology Solutions Professional Exam Sample Questions (Q29-Q34):

NEW QUESTION # 29

A customer wants to be able to have insights into their data. They want a service that will automatically discover, map, classify their data, and identify access permissions.

Which NetApp cloud service meets these requirements?

- A. BlueXP digital advisor
- B. BlueXP observability
- C. ONTAP System Manager
- **D. BlueXP classification**

Answer: D

Explanation:

BlueXP classification is a service that enables you to scan and classify data across your organization's hybrid multicloud.

Classification utilizes AI-driven natural language processing (NLP) for contextual data analysis and categorization, giving you actionable insights into your data to address compliance requirements, detect security vulnerabilities, optimize costs, and accelerate migration. BlueXP classification can discover, map, and classify both structured and unstructured data across various data sources, such as NetApp and third-party storage systems, databases, and cloud services. BlueXP classification can also identify access permissions and ownership of data, and apply tags and labels to further organize and protect your data.

References = BlueXP classification documentation, Data Classification Tool: Scans and Analyzes Data Automatically

NEW QUESTION # 30

The customer wants to deploy storage in the public cloud. The goal is to leverage native cloud infrastructure as well as NetApp's enterprise-grade technology that provides security, resilience, high availability, and cost-efficient performance.

Which NetApp solution meets these customer requirements?

- A. BlueXP observability
- B. StorageGRID
- **C. Cloud Volumes ONTAP**
- D. AFF

Answer: C

Explanation:

= Cloud Volumes ONTAP is a cloud-native storage solution that allows you to deploy and manage NetApp hybrid, multi-cloud storage and data services from on-premises sources and cloud service providers. It provides enterprise-grade data and file services, such as NFS, SMB/CIFS, iSCSI and S3, on AWS, Azure, and Google Cloud. It also offers high availability, data protection, storage efficiency, and cost-performance optimization features.

NEW QUESTION # 31

Which two access policies are supported by StorageGRID? (Choose two.)

- A. group
- B. service
- **C. bucket**
- D. ILM
- E. export

Answer: C

Explanation:

StorageGRID supports two kinds of access policies: bucket policies and group policies. Bucket policies are attached to buckets and control access by users in the bucket owner account or other accounts to the bucket and the objects in it. Group policies are attached to a group in the account and allow that group to access specific resources owned by that account. Both bucket and group policies use the Amazon Web Services (AWS) policy language and are written in JSON.

References = Bucket and group access policies, Use bucket and group access policies, Example group policies.

NEW QUESTION # 32

When using NetApp ONTAP software, which role is predefined for cluster administrators?

- A. provision
- B. recovery
- C. backup
- **D. support**

Answer: D

Explanation:

B). support: The 'support' role is a predefined role in NetApp ONTAP designed for cluster administrators. This role typically has permissions that allow for various administrative tasks required for supporting and maintaining the health and performance of the ONTAP cluster. These tasks can include monitoring system health, managing configurations, troubleshooting, and other support-related activities.

NEW QUESTION # 33

Which NetApp web-based data management tool enables a customer to provision storage systems and perform common management tasks?

- A. BlueXP observability
- B. BlueXP classification
- C. Active IQ
- **D. ONTAP System Manager**

Answer: D

Explanation:

ONTAP System Manager is a web-based data management tool that enables customers to provision storage systems and perform common management tasks. ONTAP System Manager provides a simple, intuitive, and centralized interface for managing ONTAP clusters, volumes, LUNs, SVMs, and more. ONTAP System Manager simplifies storage management by automating complex workflows, providing best practices, and offering guided setup and configuration wizards.
