Perfect MB-330 New Test Bootcamp – 100% Efficient Microsoft Dynamics 365 Supply Chain Management Functional Consultant Test Question

As long as you are willing to buy our MB-330 preparation exam, coupled with your careful preparation, we can guarantee that you will get the MB-330 certification for sure for we have been the brand in this field and welcomed by tens of thousands of our customers. Not only save you a lot of time and energy, but also can make your mood no longer anxious on the coming MB-330 Exam. So, for your future development, please don't hesitate to use our MB-330 actual exam.

Microsoft MB-330 Certification Exam is a professional-level exam that is designed for functional consultants who work with

Dynamics 365 Supply Chain Management. MB-330 exam measures an individual's skills in implementing, configuring, and using the Dynamics 365 Supply Chain Management module. Microsoft Dynamics 365 Supply Chain Management Functional Consultant certification is intended for individuals who have a working knowledge of the Supply Chain Management functionality and are looking to advance their career as a functional consultant.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Sample Questions (Q151-Q156):

NEW QUESTION # 151

A company uses trade agreements for their customers. Prices for some customers must round to the nearest US dollar.

A customer reports that prices do not round to the nearest US dollar as required.

You need to resolve the issue.

In Trade agreement journals, which option should you use?

- A. Apply smart rounding
- B. Adjustment
- C. Validate all lines
- **D. Apply smart rounding**
- E. View smart rounding

Answer: D

NEW QUESTION # 152

A company implements Dynamics 365 Supply Chain Management. The company uses the demand forecasting service to generate a statistical baseline forecast for one allocation key at a time.

The process takes too long to complete.

You need to ensure better performance of the service.

What should you configure?

- A. Storage account key
- **B. Request response mode**
- C. Storage account name
- D. Custom storage account

Answer: B

Explanation:

Explanation

If the forecast is not generated for a big set of items, but, for example, for one item or one item allocation key at a time, then in order to get better performance, you can select the Use request response mode check box on the Master planning - Setup - Demand forecasting - Demand forecasting parameters - Azure Machine Learning tab.

NEW QUESTION # 154

You are the logistics manager at a distribution company.

Your primary carrier service provides rates for transportation between New York City and Colorado. These rates are a flat rate depending on the city or general area of pickup as follows:

* New York City = \$500

* Colorado = \$450

You need to set up Transportation Management to calculate the rate from New York City to Colorado.

What should you do?

- A. Use a mileage-based rate engine to configure a rate master that calculates the rate based on the miles from New York City to Colorado.
- B. Set up a Transit Time Engine to track days from New York City to Colorado. Set up rates in the Rate Master tied to day breaks.
- C. Using the Point-to-Point engine with an empty break master, assign rates based on starting and ending locations.
- D. Create a Shipping carrier and service. Create carrier accessorial charges to represent the rates for each location.

Answer: C

NEW QUESTION # 155

A company uses Dynamics 365 Supply Chain Management. The company plans to add trucks to the existing truck fleet over the upcoming months.

The company requires truck drivers to complete a daily self-inspection of their trucks. The government requires that commercial trucks are inspected annually by a certified repair facility.

The fleet manager wants to minimize the amount of time the truck is in the shop.

* When a truck driver reports a problem during the daily inspection that requires a repair and is within a week of the annual inspection, the company requires that both events occur at the same time in the shop.

* The annual inspection can vary on due date for both new and existing trucks.

You must configure the requirements to minimize truck downtime.

What should you configure for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Configuration
Establish maintenance plan for all trucks.	<div>Asset types, time</div> <div>Asset types, time</div> <div>Asset types, counter</div> <div>Individual asset, time</div> <div>Individual asset, counter</div>
Ensure annual inspection is completed if it is due within a week of a reported maintenance issue.	<div>Time fence</div> <div>Time fence</div> <div>Tolerance days</div> <div>Finish within days</div>

Answer:

Explanation:

Requirement	Configuration
Establish maintenance plan for all trucks.	<div>Asset types, time</div> <div>Asset types, time</div> <div>Asset types, counter</div> <div>Individual asset, time</div> <div>Individual asset, counter</div>
Ensure annual inspection is completed if it is due within a week of a reported maintenance issue.	<div>Time fence</div> <div>Time fence</div> <div>Tolerance days</div> <div>Finish within days</div>

Explanation:

Answer Area

Microsoft

Requirement

Establish maintenance plan for all trucks.

Ensure annual inspection is completed if it is due within a week of a reported maintenance issue.

Configuration

Asset types, time

Time fence
