Microsoft Power Platform is a suite of products that includes Power Apps, Power BI, Power Automate, and Power Virtual Agents. These tools help organizations to create customized business applications, automate workflows, and analyze data to gain insights into their operations. The PL-200 exam covers all these tools and tests the candidate's ability to design, develop, deploy, and manage solutions using the Power Platform.

Microsoft PL-200 certification exam measures the candidate's ability to perform tasks such as working with Microsoft Dataverse,

creating Power Apps, creating and managing Power Automate, and creating and managing Power BI reports. PL-200 Exam also measures the candidate's ability to understand business requirements, develop technical solutions, and manage projects. PL-200 exam consists of multiple-choice questions and is available in several languages.

NEW QUESTION # 66

You create a Power Virtual Agents chatbot to reduce the number of incoming support calls that require a live person. The chatbot does not direct users to the correct information. You determine that this is because the chatbot is not able to identify which product a user is referring to in a conversation. You need to present a list of products so that users can select the correct product. What should you create?

- A. Table
- B. Entity
- C. **Slot filling**
- D. Variable

Answer: C

Explanation:

Explanation

Slot filling is a natural language understanding concept that means saving an extracted entity to an object. However, in Power Virtual Agents, slot filling means placing the extracted entity value into a variable.
