### NEW QUESTION # 82

Which of the following is guidance for creating value streams?

- A. Create an initial set of value streams that provide a one-to-one mapping to existing capabilities.
- B. Include operational levels of detail.
- C. Identify the top-level value streams from components of capabilities.
- D. Clearly define the triggering stakeholder.

**Answer: D**

Explanation:

Value streams represent the series of steps an organization takes to deliver value to a customer or stakeholder. A key principle in defining value streams is clarity about who initiates the value stream and what triggers it. This is essential for several reasons:

\* Understanding customer needs: Identifying the triggering stakeholder helps to understand their specific needs and expectations, which drives the design and optimization of the value stream.

\* Defining scope and boundaries: Knowing the trigger helps to define the starting and ending points of the value stream, ensuring that it encompasses all the necessary activities to deliver the desired value.

\* Measuring effectiveness: With a clear trigger, it becomes possible to measure the effectiveness of the value stream by tracking how well it meets the needs of the triggering stakeholder.

### NEW QUESTION # 83

information map is linked to other business blueprints such as the Business Capability Map, the Value Stream Map, and the Business Process Model2. This helps to identify and prioritize opportunities for business improvement and transformation2.

#### NEW QUESTION # 84

Consider the following example value stream:  
What does this show?

- A. The service "Acquire Retail Product" consists of five events
- B. A series of five subprocesses that makeup the value stream
- C. The value stream consists of five business capabilities.
- **D. A decomposition into a sequence of value-creating stages.**

**Answer: D**

Explanation:

The example value stream shown, labeled "Acquire Retail Product," represents a decomposition into a sequence of stages that collectively create value. Each stage, such as "Advertise Channels," "Display Products," "Enable Selection," "Process Payment," and "Deliver Product(s)," is a step in the overall process that contributes to the final outcome, which in this case is the acquisition of a retail product by the customer.

Value streams are utilized in business architecture to model the flow of value through an organization from the initial customer demand to the final delivery of the product or service.
