Microsoft MB-500 is a certification exam that is designed to test the skills and knowledge of individuals who are interested in becoming Microsoft Dynamics 365: Finance and Operations Apps Developers. MB-500 exam is part of the series of exams that Microsoft offers to individuals who want to become certified in Dynamics 365. Passing the MB-500 Exam is the first step towards becoming a certified Microsoft Dynamics 365: Finance and Operations Apps Developer.

Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q52-Q57):

NEW QUESTION # 52

You are a Dynamics 365 Finance and Operations developer.

Users are experiencing slower load times for the All Customers form.

You need to update caching for CustTable to improve data retrieval times.

How should you configure CacheLookup properties? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Property	Value
Set-based caching	▼ Entire table None Found FoundandEmpty
Single-record caching	▼ Found Entire table None SurrogateKey

Answer:

Explanation:

Property	Value
Set-based caching	▼ Entire table None Found FoundandEmpty
Single-record caching	▼ Found Entire table None SurrogateKey

Explanation:

Property	Value
Set-based caching	▼ Entire table None Found FoundandEmpty
Single-record caching	▼ Found Entire table None SurrogateKey

Box 1: Entire table

In Microsoft Dynamics AX, groups of records can be cached all at once with set-based caching. Set-based caching can be implemented in two ways:

At design time, by setting the table's CacheLookup property to EntireTable.

In code, by using the RecordViewCache class.

Box 2: Found

* Record caching is enabled for a table when all the following statements are true:

* The CacheLookup property on the table is enabled by setting it to one of the following values:

* NotInTTS, Found, FoundAndEmpty.

* The record buffer disableCache method has not been called with a parameter of true.

NEW QUESTION # 53

You are a Dynamics 365 Finance and Operations developer.

The sales department manager must to be able to view total customers by region and total sales by regions.

You need to build key performance indicators (KPIs) and display them on a tile in the application.

How should you model the KPI? To answer, drag the appropriate objects to the correct KPI components. Each object may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Objects	Answer Area	Object
Aggregate dimension	Total sales	
Aggregate data entity	Customers	
Aggregate measurements	Region	

Answer:

Explanation:

Answer Area

Objects

Aggregate dimension
Aggregate data entity
Aggregate measurements

KPI component

Total sales
Customers
Region

Object

Aggregate measurements
Aggregate dimension
Aggregate dimension

Explanation

Agg M - Agg Dim - Agg Dim

NEW QUESTION # 54

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You create a new form in a project.

You need to display tabs in a vertical alignment.

Solution: Apply the Simple List pattern.

Does the solution meet the goal?

- A. No
- B. Yes

Answer: B

Explanation:
