Latest C-S4CPB-2502 Test Prep - Latest C-S4CPB-2502 Exam Discount

Every SAP aspirant wants to pass the SAP C-S4CPB-2502 exam to achieve high-paying jobs and promotions. The biggest issue SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C-S4CPB-2502) exam applicants face is that they don't find credible platforms to buy Real C-S4CPB-2502 Exam Dumps. When candidates don't locate actual SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C-S4CPB-2502) exam questions they prepare from outdated material and ultimately lose resources.

SAP C-S4CPB-2502 Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	• Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of SAP Cloud ERP Consultant and focuses on setting up system configurations in SAP Cloud ERP and understanding how to manage user navigation and interface personalization through the SAP Fiori Launchpad. It tests the consultant's ability to configure and align user experience with business roles.
Topic 2	• Introduction to Cloud Computing and SAP Cloud ERP Basics: This section of the exam measures skills of ERP Implementation Project Manager and assesses foundational knowledge of cloud computing principles and SAP Cloud ERP structure. It ensures understanding of key differences from on-premise ERP, cloud deployment benefits, and basic navigation of cloud ERP systems.
Topic 3	• Data Migration and Business Process Testing: This section of the exam measures skills of SAP Cloud ERP Consultant and evaluates the ability to plan and execute data migration strategies and validate business processes through structured testing. Candidates are expected to be familiar with tools and methods for importing legacy data and confirming its integrity post-migration.
Topic 4	• Extensibility and Integration: This section of the exam measures skills of SAP Cloud ERP Consultant and deals with the capabilities of extending SAP applications to meet custom business requirements and integrating with other systems or services. The focus is on knowing when to extend standard functionality and how to ensure smooth system integration in a cloud context.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q34-Q39):

NEW QUESTION # 34

In which deployment models is application management the responsibility of the customer? Note: There are 3 correct answers to this question.

- A. Infrastructure as a Service
- B. Software as a Service
- C. Platform as a Service
- D. On premise
- E. Private Cloud

Answer: C,D,E

Explanation:

In different deployment models, the responsibility for application management varies, with the customer typically taking on more responsibility in certain models:

* Platform as a Service (PaaS): In this model, the customer is responsible for managing the applications they develop or deploy on the platform, even though the provider manages the underlying infrastructure, operating systems, and middleware.

* On premise: In an on-premise deployment, the customer has full responsibility for managing both the applications and the infrastructure they run on. This includes maintenance, updates, security, and compliance for both the applications and the hardware/software infrastructure.

* Private Cloud: Similar to on-premise deployments, customers in a private cloud model are typically responsible for managing their applications, including SAP S/4HANA Cloud Public Edition. The cloud provider may manage the cloud infrastructure and virtualization layer, but the customer often handles application-level management tasks, including updates, customization, and user management.

These deployment models contrast with Software as a Service (SaaS), where the service provider is generally responsible for managing the application, including its maintenance, updates, and availability.

NEW QUESTION # 35

Which of the following are examples of indirect digital access? Note: There are 2 correct answers to this question.

- A. A Production Order created through a non-SAP front-end
- B. An unattended bot in SAP Build Process Automation
- C. A Time Sheet Record from a 3rd party application
- D. A Defect document created through an industry application

Answer: C,D

Explanation:

Indirect digital access occurs when humans, devices, or systems use the digital core indirectly through non-SAP intermediary software, such as a non-SAP front end, a custom-solution, or any other non-SAP application¹. Indirect digital access is measured by the number of documents created, updated, or deleted in the SAP system as a result of the indirect use². Examples of indirect digital access include:

- * A Defect document created through an industry application: This is an example of indirect digital access because the industry application is a non-SAP software that triggers the creation of a document in the SAP system.
- * A Time Sheet Record from a 3rd party application: This is also an example of indirect digital access because the 3rd party application is a non-SAP software that triggers the creation of a document in the SAP system.
- * An unattended bot in SAP Build Process Automation: This is not an example of indirect digital access because the bot is using SAP software to access the SAP system directly, not through a non-SAP intermediary software.
- * A Production Order created through a non-SAP front-end: This is not an example of indirect digital access because the production order is not a document type that is counted for indirect digital access. The document types that are counted are: Sales Order, Invoice, Purchase Order, Service and Maintenance Document, Manufacturing Document, Quality Management Document, Time Sheet, Financial Document, and Material Document². NEW QUESTION # 36

Which tools does SAP provide to make it easier for customers to maintain their SAP S/4HANA Cloud systems after a release upgrade? Note: There are 2 correct answers to this question.

- **A. Test Automation Tool**
- B. SAP Signavio Process Navigator Tool
- C. Release Assessment and Scope Dependency Tool
- **D. What's New Viewer Tool**

Answer: A,D

Explanation:

SAP provides several tools to facilitate the maintenance of SAP S/4HANA Cloud systems following a release upgrade, ensuring that customers can smoothly transition to the latest functionalities and improvements:

- * What's New Viewer Tool: This tool is invaluable for understanding the changes and new features introduced with each SAP S/4HANA Cloud release. It provides detailed descriptions of new functionalities, improvements, and changes in the system, helping customers to adapt their processes and leverage new capabilities effectively. It serves as a guide to explore and understand the enhancements that come with each upgrade.
 - * Test Automation Tool: Post-upgrade, it's crucial to ensure that existing functionalities continue to work as expected and new features are correctly implemented. The Test Automation Tool allows customers to automate testing of business processes, significantly reducing the time and effort required for testing after a release upgrade. This tool helps in identifying any issues arising from the upgrade early in the process, ensuring a smooth transition to the new release.
- These tools are designed to assist customers in navigating the complexities of system upgrades, ensuring that they can make the most out of new features while maintaining their existing system's stability and performance.

NEW QUESTION # 37

What does a partner line of business configuration expert reference when identifying business processes to cover in the Fit-to-Standard workshops?

- A. Business Driven Configuration Questionnaire
- **B. Digital Discovery Assessment**
- C. SAP Signavio Process Collaboration Hub
- D. SAP Signavio Journey Modeler

Answer: B

NEW QUESTION # 38

Which of the following activities are completed in the Realize phase of the SAP Activate Methodology? Note:

There are 2 correct answers to this question.

- A. Enter configuration values in SAP Central Business Configuration
- B. Set up manual test cases in SAP Cloud ALM
- C. Demonstrate where to find business process documentation
- D. Gather perceived change impact feedback

Answer: A,B

Explanation:

In the Realize phase of the SAP Activate Methodology, the project team uses a series of iterations to build and test a complete business and system environment based on the inputs from the previous steps. The activities in this phase include:

- * Receiving the systems from SAP
 - * Performing configuration in the Q-System using SAP Central Business Configuration
 - * Setting up manual test cases in SAP Cloud ALM
 - * Performing data loads and data migration
 - * Delivering key-user training
 - * Preparing for cutover and go-live
- Therefore, the correct answers are C and D, as they are part of the Realize phase activities.
