

# Pass Guaranteed Quiz 2025 C1000-130: IBM Cloud Pak for Integration V2021.2 Administration Marvelous Real Braindumps

P.S. Free & New C1000-130 dumps are available on Google Drive shared by BraindumpsPass: <https://drive.google.com/open?id=1hHrx9qIGWDleXN80JIEBiEiCY3JBjzy>

Free demo for C1000-130 learning materials is available, you can try before buying, so that you can have a deeper understanding of what you are going to buy. We also recommend you to have a try before buying. In addition, C1000-130 training materials contain both questions and answers, and it's convenient for you to check answers after practicing. C1000-130 Exam Dumps cover most of the knowledge points for the exam, and you can have a good command of the knowledge points by using C1000-130 exam dumps. We have online and offline chat service, if you have any questions, you can consult us.

IBM Cloud Pak for Integration V2021.2 is a comprehensive integration platform that enables businesses to connect and automate systems, applications, and data across hybrid and multicloud environments. The platform provides a range of integration capabilities, including application integration, data integration, API management, and event-driven architecture. The IBM Cloud Pak for Integration V2021.2 Administration Exam is designed to test the candidate's knowledge and skills in administering these capabilities.

IBM C1000-130 exam consists of 60 multiple-choice questions that must be completed in 90 minutes. C1000-130 Exam is available in English and can be taken at any Pearson VUE testing center. The cost of the exam is \$200, and candidates must achieve a passing score of at least 62% to earn the certification.

The IBM C1000-130 exam consists of 60 questions, and candidates have 90 minutes to complete it. The questions are multiple-choice and scenario-based, and they cover a range of topics, including IBM Cloud Pak for Integration architecture, installation and configuration, security, monitoring, and troubleshooting. To pass the exam, candidates must score at least 70%.

## Free PDF IBM - C1000-130 Latest Real Braindumps

After you really improve your strength, you will find that your strength can bring you many benefits. Users of our C1000-130 practice prep can prove this to you. You have to believe that your strength matches the opportunities you have gained. And the opportunities you get are the basic prerequisite for your promotion and salary increase. After you use our C1000-130 Exam Materials, you will more agree with this. With the help of our C1000-130 study guide, nothing is impossible to you.

## IBM Cloud Pak for Integration V2021.2 Administration Sample Questions (Q40-Q45):

### NEW QUESTION # 40

OpenShift Pipelines can be used to automate the build of custom images in a CI/CD pipeline and they are based on Tekton. What type of component is used to create a Pipeline?

- A. TaskRun
- B. TPipe
- C. Pipe
- D. Task

**Answer: D**

Explanation:

OpenShift Pipelines, which are based on Tekton, use various components to define and execute CI/CD workflows. The fundamental building block for creating a Pipeline in OpenShift Pipelines is a Task.

Key Tekton Components:

Task (□ Correct Answer)

A Task is the basic unit of work in Tekton.

Each Task defines a set of steps (commands) that are executed in containers.

Multiple Tasks are combined into a Pipeline to form a CI/CD workflow.

Pipeline (uses multiple Tasks)

A Pipeline is a collection of Tasks that define the entire CI/CD workflow.

Each Task in the Pipeline runs in sequence or in parallel as specified.

Why the Other Options Are Incorrect?

Option

Explanation:

Correct?

A .TaskRun

□ Incorrect - A TaskRun is an execution instance of a Task, but it does not define the Pipeline itself.

□

C . TPipe

□ Incorrect - No such Tekton component called TPipe exists.

□

D . Pipe

□ Incorrect - The correct term is Pipeline, not "Pipe". OpenShift Pipelines do not use this term.

□

Final answer:

□ B . Task

## NEW QUESTION # 41

Which Kubernetes resource can be queried to determine if the API Connect op-erator installation has a status of'succeeded'?

- A. The API Connect Operator Pod.
- B. The API Connect Operator subscription.
- C. The API Connect InstallPlan.
- D. The API Connect ClusterServiceVersion.

**Answer: A**

## NEW QUESTION # 42

What are two capabilities of the IBM Cloud Pak foundational services operator?

- A. License Service that reports the license use of the product and its underlying product details that are deployed in the containerized environment.
- B. Messaging service to get robust and reliable messaging services.
- C. Automation assets service to store, manage, and retrieve integration assets.
- D. API management service for managing the APIs created on API Connect.
- E. IAM services for authentication and authorization.

**Answer: D,E**

### NEW QUESTION # 43

What team is created as part of the Initial Installation of Cloud Pak for Integration?

- A. zen followed by a GUID.
- **B. zen followed by a timestamp.**
- C. zenteam followed by a GUID.
- D. zenteam followed by a timestamp.

**Answer: B**

### NEW QUESTION # 44

If the App Connect Operator is installed in a restricted network, which statement is true?

- **A. Simple Storage Service (S3) can not be used for BAR files.**
- B. Persistent Claim storage can not be used for BAR files.
- C. Only Ephemeral storage is supported for BAR files.
- D. Ephemeral storage can not be used for BAR files.

**Answer: A**

Explanation:

In IBM Cloud Pak for Integration (CP4I) v2021.2, when App Connect Operator is deployed in a restricted network (air-gapped environment), access to external cloud-based services (such as AWS S3) is typically not available.

Why Option A (S3 Cannot Be Used) is Correct:

A restricted network means no direct internet access, so external storage services like Amazon S3 cannot be used to store Broker Archive (BAR) files.

BAR files contain packaged integration flows for IBM App Connect Enterprise (ACE).

In restricted environments, administrators must use internal storage options, such as:

Persistent Volume Claims (PVCs)

Ephemeral storage (temporary, in-memory storage)

Explanation of Incorrect Answers:

B . Ephemeral storage cannot be used for BAR files. → Incorrect

Ephemeral storage is supported but is not recommended for production because data is lost when the pod restarts.

C . Only Ephemeral storage is supported for BAR files. → Incorrect

Both Ephemeral storage and Persistent Volume Claims (PVCs) are supported for storing BAR files.

Ephemeral storage is not the only option.

D . Persistent Claim storage cannot be used for BAR files. → Incorrect

Persistent Volume Claims (PVCs) are a supported and recommended method for storing BAR files in a restricted network.

This ensures that integration flows persist even if a pod is restarted or redeployed.
