

Pass Guaranteed Quiz 2025 C_AIG_2412: SAP Certified Associate - SAP Generative AI Developer Fantastic Latest Dumps Files

SAP CERTIFICATION

2025 Latest TestSimulate C_AIG_2412 PDF Dumps and C_AIG_2412 Exam Engine Free Share: https://drive.google.com/open?id=1DGWSxPr2JU_6-9nOs5FWKHT7ccAfhugQ

In order to serve you better, we have a complete system if you buying C_AIG_2412 exam bootcamp from us. You can try the free demo before buying C_AIG_2412 exam materials, so that you can know what the complete version is like. If you are quite satisfied with the free demo and want the complete version, you just need to add them to card, and pay for them. You will receive your download link and password for C_AIG_2412 Exam Dumps within ten minutes after payment. We have after-service for you after buying C_AIG_2412 exam dumps, if you have any question, you can contact us by email, and we will give you reply as soon as possible.

SAP C_AIG_2412 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• SAP AI Core: This section of the exam measures the skills of AI Developers and covers the fundamental components of SAP AI Core. Candidates are assessed on their ability to work with the core services that allow machine learning models to be deployed and managed within SAP environments. The focus is on understanding how AI Core fits into SAP's ecosystem and ensures smooth integration with enterprise applications.
Topic 2	<ul style="list-style-type: none">• SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers SAP's Generative AI Hub, which acts as the central layer for designing and managing generative AI solutions. The exam tests knowledge of building, deploying, and connecting AI models to business scenarios through the Hub. Emphasis is placed on leveraging the Hub to streamline workflows and ensure scalable solutions that align with organizational needs.

Topic 3	<ul style="list-style-type: none"> • Large Language Models (LLMs): This section of the exam measures the skills of AI Developers and covers the practical use of large language models in SAP environments. Candidates are expected to understand how LLMs can be applied to automate tasks, enhance decision-making, and improve user interaction within SAP systems. The exam evaluates knowledge of handling model selection, fine-tuning, and adapting LLMs to specific business cases.
Topic 4	<ul style="list-style-type: none"> • Advanced AI Techniques with SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers advanced techniques available through SAP's Generative AI Hub. Candidates are assessed on their ability to design, optimize, and scale generative AI solutions that go beyond basic implementations. The focus includes applying sophisticated strategies to integrate advanced models, manage performance, and align AI-driven outcomes with complex enterprise goals.

Marvelous C_AIG_2412 Latest Dumps Files to Obtain SAP Certification

TestSimulate is also offering 1 year free C_AIG_2412 updates. You can update your C_AIG_2412 study material for 90 days from the date of purchase. The C_AIG_2412 updated package will include all the past questions from the past papers. You can pass the SAP C_AIG_2412 Exam easily with the help of the dumps. It will have all the questions that you should cover for the SAP C_AIG_2412 exam. If you are facing any issues with the products you have, then you can always contact our 24/7 support to get assistance.

SAP Certified Associate - SAP Generative AI Developer Sample Questions (Q22-Q27):

NEW QUESTION # 22

What are some benefits of SAP Business AI? Note: There are 3 correct answers to this question.

- **A. Intelligent business document processing**
- B. Automatic human emotion recognition
- C. Face detection and face recognition
- **D. AI-powered forecasting and predictions**
- **E. Personalized recommendations based on AI algorithms**

Answer: A,D,E

NEW QUESTION # 23

What is the primary function of the generative AI hub in SAP's AI Foundation?

- **A. To serve as an abstraction layer to access a range of foundation AI models**
- B. To store embeddings of unstructured data for semantic data retrieval
- C. To manage the AI lifecycle efforts end-to-end
- D. To provide ready-to-use AI services for document processing

Answer: A

NEW QUESTION # 24

Which of the following are features of the SAP AI Foundation?

Note: There are 2 correct answers to this question.

- A. Open source AI model repository
- B. Joule integration in SAP SuccessFactors
- **C. AI runtimes and lifecycle management**
- **D. Ready-to-use AI services**

Answer: C,D

NEW QUESTION # 25

Which statement best describes the Chain-of-Thought (COT) prompting technique?

- A. Writing a series of connected prompts creating a chain of related information.
- B. Connecting related concepts by having the LLM generate chains of ideas.
- **C. Concatenating multiple related prompts to form a chain, guiding the model through sequential reasoning steps.**
- D. Linking multiple AI models in sequence, where each model's output becomes the input for the next model in the chain.

Answer: C

Explanation:

Chain-of-Thought (CoT) prompting is a technique that involves concatenating multiple related prompts to guide a language model through a series of reasoning steps, leading to a final conclusion.

1. Structure of CoT Prompting:

* Sequential Reasoning: By breaking down a complex problem into a sequence of intermediate prompts, the model addresses each step methodically, enhancing its problem-solving capabilities.

* Logical Progression: Each prompt builds upon the previous one, ensuring a coherent flow of information that mirrors human logical reasoning.

2. Advantages of CoT Prompting:

* Enhanced Comprehension: This structured approach helps the model understand and process intricate tasks by focusing on one aspect at a time.

* Improved Accuracy: By guiding the model through detailed reasoning steps, CoT prompting reduces the likelihood of errors in the final output.

NEW QUESTION # 26

You want to use the orchestration service through SAP's generative-AI-hub-sdk. What does the following code do?

```
from gen_ai_hub.orchestration.models.llm import LLM
```

```
llm = LLM(name="gpt-4o", version="latest", parameters={"max_tokens": 256, "temperature": 0.2})
```

- **A. Define the LLM**
- B. Run the Orchestration Request
- C. Create the Orchestration Configuration
- D. Define the Template and Default Input Values

Answer: A

Explanation:

The provided code snippet defines a Large Language Model (LLM) within the SAP Generative AI Hub SDK's orchestration service:

```
from gen_ai_hub.orchestration.models.llm import LLM
```

```
llm = LLM(name="gpt-4o", version="latest", parameters={"max_tokens": 256, "temperature": 0.2})
```

1. Importing the LLM Class:

* Code: `from gen_ai_hub.orchestration.models.llm import LLM`

* Purpose: Imports the LLM class from the SDK, enabling the creation of an LLM instance.

2. Defining the LLM Instance:

* Code: `llm = LLM(name="gpt-4o", version="latest", parameters={"max_tokens": 256, "temperature": 0.2})`

* Parameters:

* `name`: Specifies the model's name, in this case, "gpt-4o".

* `version`: Indicates the model version, set to "latest" to use the most recent version.

* `parameters`: A dictionary defining model-specific parameters:

* `max_tokens`: Sets the maximum number of tokens (words or word pieces) the model can generate, here limited to 256 tokens.

* `temperature`: Controls the randomness of the output; a lower value like 0.2 results in more deterministic responses.

3. Role in Orchestration Pipeline:

* Function: This definition is a crucial step in the orchestration pipeline, specifying which LLM to use and configuring its behavior for subsequent tasks.

Conclusion:
