

Pass Guaranteed Quiz 2025 Cisco 350-701 Useful Best Vce

Cisco-350-701 Exam F.A.Q.

- **How do I pass the Cisco-350-701 exam?**

Practice with our excellent exam pdf Exam questions on your desktop computer or mobile device. Study difficult questions and answers from our provided PDF and put your trust in PassExam4Sure.com, you won't Regret It!

- **Where do I find the real Cisco-350-701 exam questions?**

You've come to the correct spot. We provide the most up-to-date and accurate questions, thorough answers verified by our specialists. That's what you'll get here at PassExam4Sure.com.

- **How to find updated Cisco-350-701 Exam Dumps?**

The majority of individuals simply type "[Cisco-350-701 Dumps](#)" into Cisco and receive useless text files and PDFs in return which have outdated questions with the wrong Answers but we at PassExam4Sure Provide Updated Exam questions with verified answers with Explanation.

- **What are Cisco-350-701 dumps?**

Practice tests, often known as braindumps, are simulated questions and answers taken straight from the real examinations. During the actual test, you will face the same questions that were covered in our exam Dumps.

2025 Latest FreeCram 350-701 PDF Dumps and 350-701 Exam Engine Free Share: <https://drive.google.com/open?id=1pp9543tlaB7h7meadSG75cWc0ZXdzYsA>

With our 350-701 study materials, all your agreeable outcomes are no longer dreams for you. And with the aid of our 350-701 exam preparation to improve your grade and change your states of life and get amazing changes in career, everything is possible. It all starts from our 350-701 learning questions. Come and buy our 350-701 practice engine, you will be confident and satisfied with it and have a brighter future.

FreeCram provides an opportunity for fulfilling your career goals and significantly ease your way to become 350-701 Certified professional. While you are going attend your 350-701 exam, in advance knowledge assessment skips your worries regarding actual exam format. Groom up your technical skills with FreeCram practice test training that has no substitute at all. Get the best possible training through FreeCram; our practice tests particularly focus the key contents of 350-701 Certification exams. FreeCram leads the 350-701 exam candidates towards perfection while enabling them to earn the 350-701 credentials at the very first attempt. The way our products induce practical learning approach, there is no close alternative.

Exam 350-701 Tutorial, Associate 350-701 Level Exam

FreeCram provides free new Cisco 350-701 latest exam dumps pdf demo to download for your reference so that you will share risk free shopping. Also we encourage every buyer use PayPal payment which also guarantees your money safety. We are engaging in not only providing the highest quality of 350-701 Latest Exam Dumps pdf but also the satisfying customer service. If you have any doubt, we will solve for you until you are satisfied.

Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q145-Q150):

NEW QUESTION # 145

Which API is used for Content Security?

- A. IOS XR API
- B. NX-OS API
- C. OpenVuln API
- **D. AsyncOS API**

Answer: D

Explanation:

Content Security is a term that encompasses various security features and solutions that protect the data and applications from threats such as malware, ransomware, phishing, data loss, and unauthorized access. Content Security includes products such as Cisco Email Security, Cisco Web Security, Cisco Cloudlock, and Cisco Umbrella. These products use the AsyncOS API, which is a RESTful API that allows administrators and developers to programmatically interact with the content security appliances and services. The AsyncOS API enables tasks such as configuration, reporting, monitoring, troubleshooting, and automation of content security policies and actions. The AsyncOS API is based on the HTTP protocol and uses JSON or XML as the data format. The AsyncOS API also supports authentication, authorization, rate limiting, and error handling mechanisms. The AsyncOS API documentation provides the details of the available resources, methods, parameters, and responses for each content security product. References =

NEW QUESTION # 146

Drag and drop the threats from the left onto examples of that threat on the right

Threat	Example
DoS/DDoS	A stolen customer database that contained social security numbers and was published online.
insecure APIs	A phishing site appearing to be a legitimate login page captures user login information.
data breach	An application attack using botnets from multiple remote locations that flood a web application causing a degraded performance or a complete outage.
compromised credentials	A malicious user gained access to an organization's database from a cloud-based application programming interface that lacked strong authentication controls.

Answer:

Explanation:

Explanation:

Correct Answer:

Explanation:

A data breach is the intentional or unintentional release of secure or private/confidential information to an untrusted environment. When your credentials have been compromised, it means someone other than you may be in possession of your account information, such as your username and/or password.

NEW QUESTION # 147

An attacker needs to perform reconnaissance on a target system to help gain access to it. The system has weak passwords, no encryption on the VPN links, and software bugs on the system's applications. Which vulnerability allows the attacker to see the passwords being transmitted in clear text?

- A. weak passwords for authentication
- B. improper file security
- C. unencrypted links for traffic
- D. software bugs on applications

Answer: C

Explanation:

NEW QUESTION # 148

An engineer wants to automatically assign endpoints that have a specific OUI into a new endpoint group. Which probe must be enabled for this type of profiling to work?

- A. SNMP
- B. NetFlow
- C. DHCP
- **D. NMAP**

Answer: D

Explanation:

Explanation Cisco ISE can determine the type of device or endpoint connecting to the network by performing "profiling." Profiling is done by using DHCP, SNMP, Span, NetFlow, HTTP, RADIUS, DNS, or NMAP scans to collect as much metadata as possible to learn the device fingerprint. NMAP ("Network Mapper") is a popular network scanner which provides a lot of features. One of them is the OUI (Organizationally Unique Identifier) information. OUI is the first 24 bit or 6 hexadecimal value of the MAC address. Note: DHCP probe cannot collect OUIs of endpoints. NMAP scan probe can collect these endpoint attributes: + EndPointPolicy + LastNmapScanCount + NmapScanCount + OUI + Operating-system Reference: <http://www.network-node.com/blog/2016/1/2/ise-20-profiling> Cisco ISE can determine the type of device or endpoint connecting to the network by performing "profiling." Profiling is done by using DHCP, SNMP, Span, NetFlow, HTTP, RADIUS, DNS, or NMAP scans to collect as much metadata as possible to learn the device fingerprint.

NEW QUESTION # 149

Which encryption algorithm provides highly secure VPN communications?

- **A. AES 256**
- B. 3DES
- C. DES
- D. AES 128

Answer: A

Explanation:

AES (Advanced Encryption Standard) is a symmetric encryption algorithm that uses the same key to encrypt and decrypt data. It turns plain text into a code that only the intended recipient can read. AES has different key sizes, such as 128, 192, and 256 bits. The larger the key size, the more secure and complex the encryption is. AES 256 is the most secure encryption algorithm for VPN communications, as it uses a 256-bit key that would take an enormous amount of time and computing power to crack. AES 256 is widely used by VPN providers, as it offers a high level of security and performance for VPN tunnels. AES 256 is also recommended by the U.S. government for protecting classified information. References :=
