**Pass Guaranteed Quiz 2023 EMC DES-1423:  
Updated Updated Specialist - Implementation  
Engineer, Isilon Solutions Exam CBT**

2023 Latest PassTesting DES-1423 PDF Dumps and DES-1423 Exam Engine Free Share:  
[https://drive.google.com/open?id=1A7HDWFzTQrJfb\\_6f98IXOBQY8888iC4f](https://drive.google.com/open?id=1A7HDWFzTQrJfb_6f98IXOBQY8888iC4f)

Our DES-1423 training materials are compiled carefully with correct understanding of academic knowledge using the fewest words to express the most clear ideas, rather than unnecessary words expressions or sentences and try to avoid out-of-date words. And our [DES-1423 Exam Questions](#) are always the latest questions and answers for our customers since we keep updating them all the time to make sure our DES-1423 study guide is valid and the latest.

DES-1423 study material is suitable for all people. Whether you are a student or an office worker, whether you are a veteran or a rookie who has just entered the industry, DES-1423 test answers will be your best choice. For office workers, DES-1423 test dumps provide you with more flexible study time. You can download learning materials to your mobile phone and study at anytime, anywhere. And as an industry rookie, those unreadable words and expressions in professional books often make you feel mad, but [DES-1423 Study Materials](#) will help you to solve this problem perfectly.

**>> Updated DES-1423 CBT <<**

**Test DES-1423 Dumps Demo, DES-1423 Reliable Mock Test**

We are sure you can seep great deal of knowledge from our DES-1423 study prep in preference to other materials obviously. Our DES-1423 practice materials have variant kinds including PDF, app and software versions. As [DES-1423 Exam Questions](#) with high prestige and esteem in the market, we hold sturdy faith for you. And you will find that our DES-1423 learning quiz is quite popular among the candidates all over the world.

CBT

What's more, part of that DumpsTorrent D-PVM-OE-01 dumps now are free: [https://drive.google.com/open?id=1fdK1vxipAA6DbYbQPhkWMk35F\\_mzPQSK](https://drive.google.com/open?id=1fdK1vxipAA6DbYbQPhkWMk35F_mzPQSK)

You can enjoy free update for 365 days if you buying D-PVM-OE-01 study guide of us, that is to say, in the following year you can obtain the latest information for the exam timely. And the update version for D-PVM-OE-01 exam dumps will be sent to your email automatically. You just need to receive and exchange your learning ways in accordance with the new changes. In addition, D-PVM-OE-01 Study Materials are compiled by experienced experts, and they are quite familiar with the exam center, therefore the quality can be guaranteed. We also have online and offline chat service, if you have any questions about D-PVM-OE-01 exam dumps, you can consult us.

## EMC D-PVM-OE-01 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>PowerMax Family Monitoring and Workload Planning: This section of the exam measures the skills of Performance Analysts and focuses on monitoring storage environments and workload planning using Unisphere for PowerMax. Candidates must understand how to track performance metrics, detect issues, and optimize workloads to enhance storage efficiency. One key skill tested is monitoring storage health through Unisphere.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>PowerMax Family Storage Provisioning: This section of the exam measures the skills of Storage Administrators and covers the architecture, configurations, and management of the PowerMax family. Candidates must understand system models, port and device management, and provisioning methods using Unisphere for PowerMax. They are expected to perform service level-based provisioning and allocate storage through auto-provisioning groups. One key skill assessed is configuring storage using Unisphere for PowerMax.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Unisphere for PowerMax 10 Implementation and Administration: This section of the exam measures the skills of System Administrators and covers the implementation and management of Unisphere for PowerMax. Candidates must understand the installation process, post-installation tasks, and interface navigation to efficiently operate the platform. One key skill evaluated is setting up Unisphere for PowerMax.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>PowerMaxOS 10 Data Mobility: This section of the exam measures the skills of Data Migration Specialists and covers data mobility and migration features in PowerMaxOS 10. Candidates must understand the benefits of non-disruptive migration and be able to perform migrations using Unisphere for PowerMax. One key skill assessed is executing non-disruptive data migrations.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Solutions Enabler 10 Implementation: This section of the exam measures the skills of Infrastructure Engineers and focuses on the fundamentals of Solutions Enabler. Candidates must understand its installation, upgrade processes, gatekeeper management, and daemon functions across different platforms. One crucial skill tested is managing Solutions Enabler daemons.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>PowerMax Family Management in a Virtual Environment: This section of the exam measures the skills of Virtualization Engineers and evaluates the integration of PowerMax storage in virtualized environments. Candidates must understand VMware vSphere, the functionalities of Virtual Storage Integrator (VSI), and how to monitor virtualized workloads using Unisphere for PowerMax. One critical skill assessed is tracking virtual machine storage performance.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>PowerMax Family Business Continuity Administration: This section of the exam measures the skills of Disaster Recovery Engineers and focuses on replication technologies used for business continuity. Candidates must perform SnapVX and Clone operations using Unisphere for PowerMax and understand Symmetrix Remote Data Facility (SRDF) replication. They must also execute SRDF operations using Unisphere and SYMCLI.</li> </ul>

## D-PVM-OE-01 Study Questions - Dell Technologies PowerMax Operate Guide Torrent & D-PVM-OE-01 Exam Torrent

DumpsTorrent aims to assist its clients in making them capable of passing the EMC D-PVM-OE-01 certification exam with flying colors. It fulfills its mission by giving them an entirely free Dell Technologies PowerMax Operate (D-PVM-OE-01) demo of the dumps. Thus, this demonstration will enable them to scrutinize the quality of the Dell Technologies PowerMax Operate (D-PVM-OE-01) study material.

## EMC Dell Technologies PowerMax Operate Sample Questions (Q57-Q62):

### NEW QUESTION # 57

A company plans to install a dual-brick PowerMax 2000 system in a third-party rack. How many rack units must be reserved in the rack?

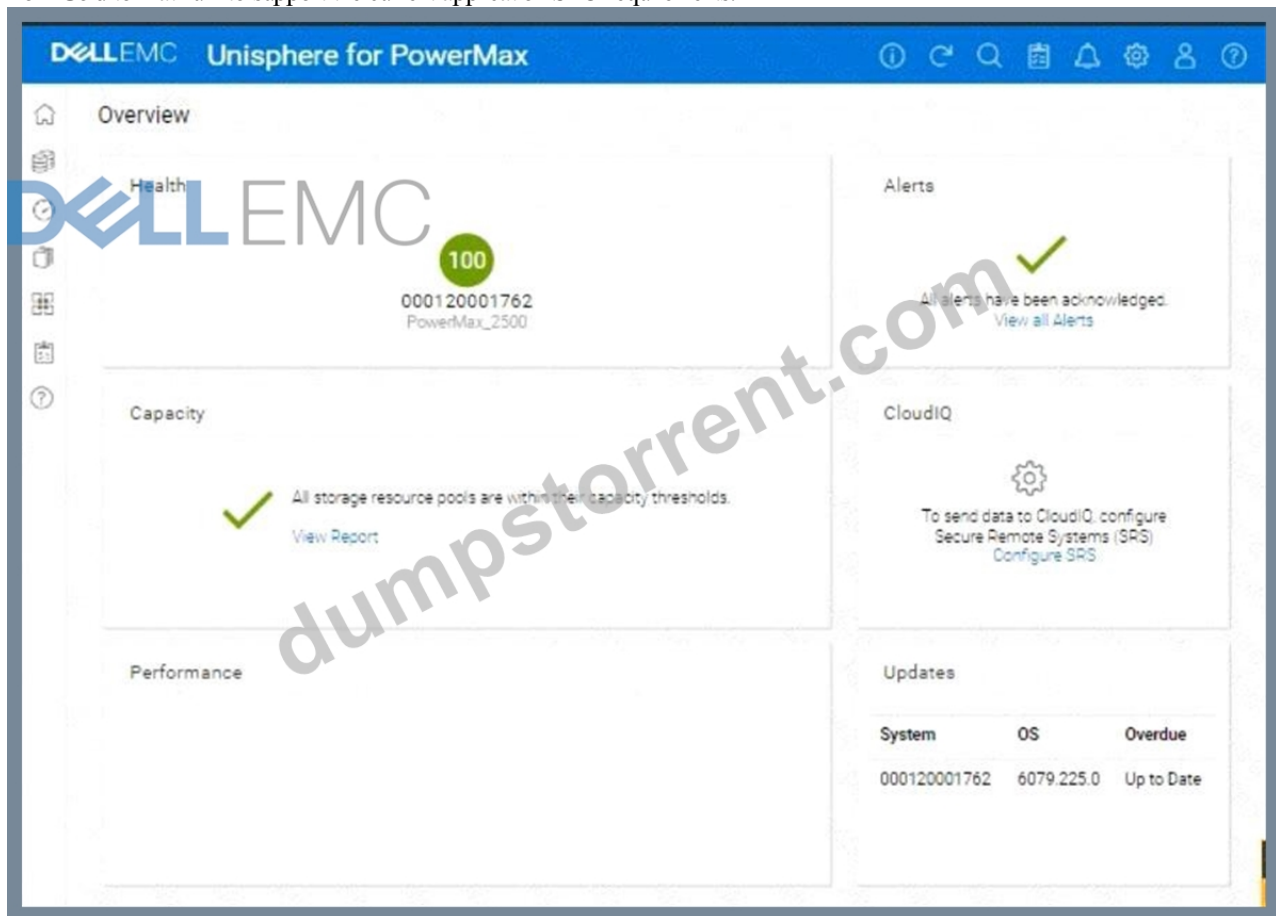

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: D**

### NEW QUESTION # 58

A customer has an existing host with two 100 GB volumes that are assigned from existing PowerMax storage.

They would like to add three additional volumes of 100 GB each and change the service level that is assigned to the storage group from Gold to Platinum to support the current application SLO requirements.

### Answer:

Explanation:

See the explanation for step by step solution.

Explanation:

You want a detailed, step-by-step guide on how to add three 100 GB volumes to an existing host and change the service level of the associated storage group from Gold to Platinum on a PowerMax array, using the Unisphere for PowerMax interface shown in the image.

Here's a comprehensive guide, broken down into manageable steps:

Phase 1: Provisioning the New Volumes

Step 1: Log in to Unisphere for PowerMax

- \* Open your web browser and enter the URL for your Unisphere for PowerMax management interface.

- \* Log in with your administrator credentials.

Step 2: Navigate to Storage Groups

- \* In the left-hand navigation pane, click on **Storage** to expand the storage management section.

- \* Click on **Storage Groups** under the **Storage** section. This will display a list of existing storage groups on your PowerMax array.

Step 3: Locate the Target Storage Group

- \* Identify the storage group that currently contains the host's existing two 100 GB volumes.

- \* Tip: You can find this by:

- \* Looking at the "Hosts" tab within each storage group's details. It will list the hosts connected to that storage group.

- \* If you know the host's name, you might be able to search for it using the Unisphere search bar (if available).

Step 4: Initiate Adding Volumes

- \* Once you've found the correct storage group, select it by clicking on its name.

- \* Look for a button or option related to adding volumes. The exact wording might vary slightly depending on your Unisphere version, but it could be:

- \* "Add to Storage Group"

- \* "+"(a plus icon, which often signifies adding something)

- \* "Add Volumes"

- \* Click this button to start the process of adding new volumes to the storage group.

Step 5: Configure Volume Details

- \* A new window or panel will appear, allowing you to specify the characteristics of the new volumes.

- \* Select "Create new volumes"

- \* Number of Volumes:Enter 3 in the field for the number of volumes.

- \* Capacity:Enter 100 in the field for the capacity of each volume. Make sure the unit is set to GB.

- \* Volume Name (Optional):You can give the volumes a specific name or prefix, or you can let Unisphere auto-generate names.

- \* Service Level:Since the final goal is to move the entire Storage Group to platinum, you can either set this to platinum now or change it for the whole group later.

- \* Other Settings:Review any other available settings (e.g., thin provisioning, data reduction). In most cases, the default settings should be fine, but adjust them if needed based on your environment's best practices.

Step 6: Execute Volume Creation

- \* After you've configured all the volume settings, review them carefully to make sure they are correct.

- \* Click the button to execute the operation. This button might be labeled:

- \* "Run Now"

- \* "OK"

- \* "Finish"

- \* "Apply"

- \* Unisphere will start creating the new volumes. This might take a few moments.

Phase 2: Changing the Storage Group's Service Level

Step 7: Navigate Back to Storage Groups

- \* Once the volume creation is complete, go back to the list of storage groups. You can usually do this by clicking "Storage Groups" in the left-hand navigation pane again.

Step 8: Select the Target Storage Group

- \* Find the same storage group you worked with in Phase 1 (the one containing the host's volumes).

- \* Click on the storage group's name to open its properties.

Step 9: Modify the Service Level

- \* Look for a setting related to the "Service Level." It might be a dropdown menu, a field you can edit, or a link to a separate settings page.

- \* Change the Service Level fromGoldtoPlatinum.

Step 10: Save the Changes

- \* Click the button to save the changes to the storage group's service level. This button might be labeled:

- \* "Apply"

- \* "Save"

- \* "OK"

Phase 3: Host-Side Configuration

Step 11: Rescan for New Storage on the Host

- \* The host needs to be made aware of the newly provisioned storage. The exact process for this depends on the host's operating system:

- \* Windows:

- \* OpenDisk Management(diskmgmt.msc).

- \* Go toAction > Rescan Disks.

- \* Linux:

- \* Identify the SCSI host bus numbers (e.g., ls /sys/class/scsi\_host).

- \* Use the command echo "- - -" > /sys/class/scsi\_host/hostX/scan, replacing hostX with the appropriate host bus number.

- \* You might also be able to use tools like rescan-scsi-bus.sh.

- \* VMware ESXi:

- \* In the vSphere Client, select the host.

- \* Go toConfigure > Storage Adapters.

- \* Select the relevant storage adapter (e.g., your HBA).

- \* ClickRescan Storage.

Step 12: Initialize, Partition and Mount (if needed):

- \* Once the host detects the new volumes, you'll need to initialize them, create partitions, format them with a filesystem, and mount them, depending on your operating system and how you intend to use the storage. This is done using the host's operating system tools.

Phase 4: Verification and Monitoring

Step 13: Verify in Unisphere

- \* Go back to the storage group in Unisphere and check the "Volumes" tab. You should see the three new 100 GB volumes listed along with the original two, and they should all have the "Platinum" service level.

Step 14: Verify on the Host

\* Confirm that the host can see and access the new volumes.

Step 15: Monitor Performance

\* After making these changes, monitor the performance of the storage group and the application using Unisphere's performance monitoring tools. Ensure that the Platinum service level is meeting your application's requirements

#### NEW QUESTION # 59

A PowerMax administrator modified a Storage Group to add more volumes. The administrator then decides to use the Suitability Check to ensure compliance is met. The Suitability check runs but does not provide any information.

What is the likely cause for this issue?

- A. Volumes were added to the Storage Group before using the Suitability report
- **B. Steps were skipped in the Modify Storage Group setup before running the Suitability Check**
- C. Array has not been registered for performance data collection
- D. Suitability Check was run before the Storage Group was configured

**Answer: B**

#### NEW QUESTION # 60

What is the largest TDEV PowerMaxOS 5978 can create?

- A. 16 TB
- B. 128 TB
- C. 32 TB
- **D. 64 TB**

**Answer: D**

#### NEW QUESTION # 61

A systems administrator is performing a configuration change on a PowerMax array. Where does the configuration manager perform the change?

- A. Host which performs the change
- **B. MMCS**
- C. SYMAPI
- D. Disk drives

**Answer: B**

#### NEW QUESTION # 62

.....

We are dedicated to help you pass the exam and gain the corresponding certificate successful. D-PVM-OE-01 exam cram is high-quality, and you can pass your exam by using them. In addition, D-PVM-OE-01 exam braindumps cover most of knowledge points for the exam, and you can also improve your ability in the process of learning. You can obtain the download link and password within ten minutes, so that you can begin your learning right away. We have free update for 365 days if you buying D-PVM-OE-01 Exam Materials, the update version for D-PVM-OE-01 exam cram will be sent to your email automatically.
