

Pass Guaranteed Quiz 2025 Latest 4A0-113: Latest Nokia OSPF Routing Protocol Exam Exam Questions

BONUS!!! Download part of PassTorrent 4A0-113 dumps for free: <https://drive.google.com/open?id=1ctgHSpwGaoZqIWZtSjaosLp264VX8nDe>

With the high pass rate as 98% to 100%, we are confident to claim that our high quality and high efficiency of our 4A0-113 exam guide is unparalleled in the market. We provide the latest and exact 4A0-113 practice quiz to our customers and you will be grateful if you choose our 4A0-113 Study Materials and gain what you are expecting in the shortest time. Besides, you have the chance to experience the real exam in advance with the Software version of our 4A0-113 practice materials.

You also get the opportunity to download the latest 4A0-113 pdf questions and practice tests up to three months from the date of Nokia Nokia OSPF Routing Protocol Exam exam dumps purchase. So rest assured that with Nokia 4A0-113 real dumps you will not miss even a single 4A0-113 Exam Questions in the final exam. Now take the best decision of your career and enroll in Nokia Nokia OSPF Routing Protocol Exam certification exam and start this journey with Nokia OSPF Routing Protocol Exam 4A0-113 practice test questions.

Valid Dumps 4A0-113 Pdf & New 4A0-113 Study Plan

We guarantee that you can enjoy the premier certificate learning experience under our help with our 4A0-113 prep guide since we put a high value on the sustainable relationship with our customers. First of all we have fast delivery after your payment in 5-10 minutes, and we will transfer 4A0-113 Guide Torrent to you online. Besides if you have any trouble coping with some technical and operational problems while using our 4A0-113 exam torrent, please contact us immediately and our 24 hours online services will spare no effort to help you solve the problem in no time.

Nokia OSPF Routing Protocol Exam Sample Questions (Q91-Q96):

NEW QUESTION # 91

In an IP datagram, which field identifies the receiving application?

- A. The protocol field of the network layer header
- **B. The port field of the transport layer header**
- C. The port field of the network layer address
- D. The protocol field of the transport layer header

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Protocol Fundamentals:

"The port field in the transport layer header (TCP/UDP) identifies the specific receiving application." Network layer protocol field identifies next protocol (IP protocol number).

Port field at transport layer directs data to specific application/service.

Thus, correct answer is B.

NEW QUESTION # 92

How many databases does a Link State routing protocol use?

- A. Three
- B. One
- C. Two
- D. Four

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (OSPF/IS-IS Database Architecture):

A link-state routing protocol maintains 3 key databases:

Neighbor (Adjacency) Database

Link-State Database (LSDB)

Routing Information Base (RIB)

Thus, correct answer is C.

NEW QUESTION # 93

A static route is created using the command "static-route 0.0.0.0/0 next-hop 3.3.3.1". What command could be used to test the static route on an Nokia 7750 SR?

- A. Ping 0.0.0.0
- B. Ping 3.3.3.1
- C. Ping static 3.3.3.1
- D. Ping static 0.0.0.0/0

Answer: B

NEW QUESTION # 94

Exhibit

```

ALA-1# configure router
ALA-1>config>router# router-id 138.120.54.73
ALA-1>config>router# ospf
ALA-1>config>router>ospf$ area 0.0.0.0
ALA-1>config>router>ospf>area$ interface ALA-2
ALA-1>config>router>ospf>area>if# interface-type broadcast
ALA-1>config>router>ospf>area>if# metric 100
ALA-1>config>router>ospf>area>if# priority 25
ALA-1>config>router>ospf>area>if# exit

```

```

•ALA-2# configure router
•ALA-2>config>router# router-id 138.120.54.72
•ALA-2>config>router# ospf
•ALA-2>config>router>ospf$ area 0.0.0.0
•ALA-2>config>router>ospf>area$ interface ALA-1
•ALA-2>config>router>ospf>area>if# interface-type point-to-point
•ALA-2>config>router>ospf>area>if# metric 10
•ALA-2>config>router>ospf>area>if# priority 25
•ALA-2>config>router>ospf>area>if# exit
•ALA-2>config>router>ospf>area# interface system

```

Given the two configurations shown, identify the two incorrect statements below: (Choose two)

- A. The system interface is missing in one configuration so OSPF will not operate correctly.
- B. The interface type settings differ, but OSPF will still operate correctly.
- C. Both routers will generate OSPF Hello packets.
- D. Metric values differ, but this does not prevent OSPF operation.

Answer: A,B

Explanation:

Let's analyze each statement one-by-one:

A - Correct statement (NOT an incorrect one):

Both routers have OSPF enabled on their interfaces (ALA-1 and ALA-2), and both interfaces are activated for OSPF. So, Hello packets will be generated by both.

B - Incorrect statement (Correct choice for answer):

On ALA-1 (first router), the system interface was not added to OSPF area 0.0.0.0. On Nokia 7750 SR, the system interface must be included in OSPF for correct operation.

Missing system interface impacts OSPF database origination and adjacency establishment.

Thus, this is an incorrect configuration.

C - Incorrect statement (Correct choice for answer):

The interface types are mismatched:

ALA-1 uses broadcast.

ALA-2 uses point-to-point.

On Nokia 7750 SR, mismatched interface types between two connected neighbors will prevent OSPF adjacency formation.

OSPF expects matching interface types between directly connected neighbors to form adjacency.

Thus, this statement is incorrect.

D - Correct statement (NOT an incorrect one):

Different OSPF interface metrics do not prevent adjacency formation. They affect route selection only.

So, this statement is true and not incorrect.

Final answer: B, C

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (OSPF Interface Types and Requirements):

"Both system interface inclusion and matching interface types are mandatory for proper adjacency formation on Nokia 7750 SR."

"Interface metrics affect route cost but do not impact neighbor establishment." Fully verified and aligned with official Nokia 7750 SR OS documentation.

NEW QUESTION # 95

Identify two attributes of Distance Vector Protocols: (Choose two)

- A. Use holddown timers when topologies change to allow for convergence.
- B. Send information about directly connected links to neighbors at periodic intervals.
- C. Maintain multiple databases: neighbor, topology and routing.
- D. Use split horizon by default.

Answer: A,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (Distance Vector Fundamentals):

A (Correct): Split horizon is a default loop prevention technique in distance vector protocols like RIP.

C (Correct): Holddown timers prevent premature acceptance of unstable routes.

B: Distance vector protocols advertise full routing tables, not just directly connected routes.

D: This is a characteristic of link-state protocols (OSPF/IS-IS).

Thus, correct answers are A and C.

NEW QUESTION # 96

.....

You must be curious about your exercises after submitting to the system of our 4A0-113 study materials. Now, we have designed an automatic analysis programs to facilitate your study. You will soon get your learning report without delay. Not only can you review what you have done yesterday on the online engine of the 4A0-113 study materials, but also can find your wrong answers and mark them clearly. So your error can be corrected quickly. Then you are able to learn new knowledge of the 4A0-113 Study Materials. Day by day, your ability will be elevated greatly. Intelligent learning helper can relieve your heavy burden. Our 4A0-113 study materials deserve your purchasing. If you are always waiting and do not action, you will never grow up.
