

Pass Guaranteed Quiz 2025 Microsoft AZ-305: Designing Microsoft Azure Infrastructure Solutions Useful Pdf Demo Download

What's more, part of that Exam4Labs AZ-305 dumps now are free: <https://drive.google.com/open?id=1JuKZIDh0kpjFVs5IVxw-7uHQvnHsgSBn>

The AZ-305 certificate is one of the popular IT certificates. Success in the AZ-305 credential examination enables you to advance your career at a rapid pace. You become eligible for many high-paying jobs with the Designing Microsoft Azure Infrastructure Solutions AZ-305 certification. To pass the Designing Microsoft Azure Infrastructure Solutions test on your first sitting, you must choose reliable Microsoft AZ-305 Exam study material. Don't worry about Designing Microsoft Azure Infrastructure Solutions AZ-305 test preparation, because Exam4Labs is offering AZ-305 actual exam questions at an affordable price.

Microsoft Azure is a cloud computing platform that provides a wide range of services to help organizations build, deploy, and manage their applications and infrastructure. To become proficient in designing and implementing these solutions, Microsoft offers a certification exam called AZ-305, which is designed to validate the skills and knowledge required to design and implement Microsoft Azure infrastructure solutions.

Test AZ-305 Quiz - Reliable AZ-305 Test Book

Do you feel aimless and helpless when the AZ-305 exam is coming soon? If your answer is absolutely yes, then we would like to suggest you to try our AZ-305 training materials, which are high quality and efficiency test tools. Your success is 100% ensured to pass the AZ-305 Exam and acquire the dreaming certification which will enable you to reach for more opportunities to higher incomes or better enterprises.

Here is the about the significance of taking the Microsoft AZ-305 Certification Exam

The Microsoft AZ-305 Certification Exam is a mandatory requirement for all Microsoft Azure professionals. It helps them to validate their knowledge regarding the design and deployment of the Azure platform. Benefits of taking the Microsoft AZ-305 Certification Exam, after getting prepared with the assistance of the **AZ-305 exam dumps** given below:

- Getting the Microsoft AZ-305 Certification Exam gives you a chance to prove your expertise in the Azure platform. Experts highly recommend Microsoft AZ-305 Certification Exam for professionals to validate their expertise in the Azure platform.
- The Microsoft AZ-305 Certification Exam is the most reliable exam for Microsoft Azure professionals. This means that it will help you to get the job with the Microsoft Azure cloud. Securing the Azure cloud with Microsoft Azure is the biggest challenge.
- It is a Microsoft exam. This means that it is designed by Microsoft experts and will help you to learn the latest features and best practices of the Azure platform. Authentication and authorization are some of the most important features of the Azure platform.
- You can work in different industries like banking, government, healthcare, insurance, media, retail, education, etc. To offer a secure and reliable service to the customers, you need to have the Microsoft AZ-305 Certification Exam.

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q344-Q349):

NEW QUESTION # 344

You need to implement the Azure RBAC role assignment. The solution must meet the authentication and authorization requirements. How many assignment should you configure for the Network Contributor role for Role1? To answer, select appropriate in the answer area.

NOTE:

Answer:

Explanation:

Explanation:

NEW QUESTION # 345**Hotspot Question**

You have an Azure subscription that contains the SQL servers on Azure shown in the following table.

Name	Resource group	Location
SQLsvr1	RG1	East US
SQLsvr2	RG2	West US

The subscription contains the storage accounts shown in the following table.

Name	Resource group	Location	Account kind
storage1	RG1	East US	StorageV2 (general purposev2)
storage2	RG2	Central US	BlobStorage

You create the Azure SQL databases shown in the following table.

Name	Resource group	Server	Pricing tier
SQLdb1	RG1	SQLsvr1	Standard
SQLdb2	RG1	SQLsvr1	Standard
SQLdb3	RG2	SQLsvr2	Premium

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
When you enable auditing for SQLdb1, you can store the audit information to storage1.	<input type="radio"/>	<input type="radio"/>
When you enable auditing for SQLdb2, you can store the audit information to storage2.	<input type="radio"/>	<input type="radio"/>
When you enable auditing for SQLdb3, you can store the audit information to storage2.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
When you enable auditing for SQLdb1, you can store the audit information to storage1.	<input checked="" type="radio"/>	<input type="radio"/>
When you enable auditing for SQLdb2, you can store the audit information to storage2.	<input type="radio"/>	<input checked="" type="radio"/>
When you enable auditing for SQLdb3, you can store the audit information to storage2.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation:

Box 1: Yes

The storage account and SQL server are in the same region, ensuring compliance with the requirement that audit logs be stored in a storage account in the same region as the server.

Box 2: No

Since the regions are different, the audit logs cannot be stored in storage2 for SQLdb2.

Box 3: No

Since the regions are different, the audit logs cannot be stored in storage2 for SQLdb3.

Note: While configuring auditing for azure sql db, azure portal only will show storage accounts which are in same region. Both standard and premium storage accounts can be used but they need to be in same region as db.

<https://docs.microsoft.com/en-us/azure/azure-sql/database/auditing-overview#auditing-limitations>

NEW QUESTION # 346

You have an Azure subscription named Subscription1 that is linked to a hybrid Azure Active Directory (Azure AD) tenant.

You have an on-premises datacenter that does NOT have a VPN connection to Subscription1. The datacenter contains a computer named Server1 that has Microsoft SQL Server 2016 installed. Server1 is prevented from accessing the internet.

An Azure logic app named LogicApp1 requires write access to a database on Server1.

You need to recommend a solution to provide LogicApp1 with the ability to access Server1.

What should you recommend deploying on-premises and in Azure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

On-premises:

	Microsoft	▼
A Web Application Proxy for Windows Server		
An Azure AD Application Proxy connector		
An On-premises data gateway		
Hybrid Connection Manager		

Azure:

	▼
A connection gateway resource	
An Azure Application Gateway	
An Azure Event Grid domain	
An enterprise application	

Answer:

Explanation:

On-premises:

	▼
A Web Application Proxy for Windows Server	
An Azure AD Application Proxy connector	
An On-premises data gateway	
Hybrid Connection Manager	

Azure:

	▼
A connection gateway resource	
An Azure Application Gateway	
An Azure Event Grid domain	
An enterprise application	

Explanation:

On-premises:

A Web Application Proxy for Windows Server
An Azure AD Application Proxy connector
An On-premises data gateway
Hybrid Connection Manager

Azure:

A connection gateway resource
An Azure Application Gateway
An Azure Event Grid domain
An enterprise application

Box 1: An on-premises data gateway

For logic apps in global, multi-tenant Azure that connect to on-premises SQL Server, you need to have the on-premises data gateway installed on a local computer and a data gateway resource that's already created in Azure.

Box 2: A connection gateway resource

<https://docs.microsoft.com/en-us/azure/connectors/connectors-create-api-sqlazure>

NEW QUESTION # 347

You are designing an Azure web app.

You plan to deploy the web app to the North Europe Azure region and the West Europe Azure region.

You need to recommend a solution for the web app. The solution must meet the following requirements:

Users must always access the web app from the North Europe region, unless the region fails.

The web app must be available to users if an Azure region is unavailable.

Deployment costs must be minimized.

What should you include in the recommendation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Request routing method:

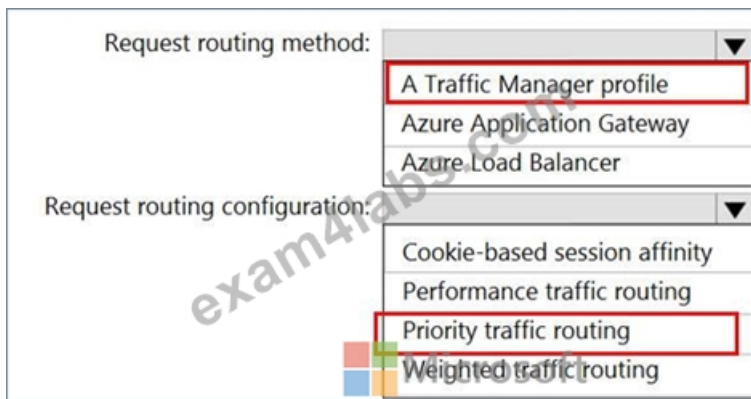

A Traffic Manager profile
Azure Application Gateway
Azure Load Balancer

Request routing configuration:

Cookie-based session affinity
Performance traffic routing
Priority traffic routing
Weighted traffic routing

Answer:

Explanation:

NEW QUESTION # 348

You plan to deploy an Azure App Service web app that will have multiple instances across multiple Azure regions.

You need to recommend a load balancing service for the planned deployment. The solution must meet the following requirements:

- * Maintain access to the app in the event of a regional outage.
- * Support Azure Web Application Firewall (WAF).
- * Support cookie-based affinity.
- * Support URL routing.

What should you include in the recommendation?

- A. Azure Load Balancer
- B. Azure Application Gateway
- C. Azure Traffic Manager
- D. Azure Front Door

Answer: D

Explanation:

Explanation

Azure Traffic Manager performs the global load balancing of web traffic across Azure regions, which have a regional load balancer based on Azure Application Gateway. This combination gets you the benefits of Traffic Manager many routing rules and Application Gateway's capabilities such as WAF, TLS termination, path-based routing, cookie-based session affinity among others.
