The Microsoft GH-100 certification exam is one of the valuable credentials designed to demonstrate a candidate's technical expertise in information technology. They can remain current and competitive in the highly competitive market with the GH-100 certificate. For novices as well as seasoned professionals, the GitHub Administration Questions provide an excellent opportunity to not only validate their skills but also advance their careers.

Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	• Manage access and permissions based on membership: This section of the exam measures skills of DevOps Engineers and reviews how to manage organizations, teams, and repository permissions. It includes default permission settings, team synchronization through AD, scripting across multiple organizations, and aligning enterprise policies with trust requirements. It also contrasts roles such as organization members, owners, collaborators, and billing managers.

Topic 2	• Manage GitHub Actions: This section of the exam measures skills of DevOps Engineers and emphasizes managing workflows, reusable actions, and distribution strategies within the enterprise. It explains configuring organization-level policies, managing self-hosted and GitHub-hosted runners, controlling access through IP allow lists, handling encrypted secrets, and integrating third-party vaults for workflow security.
Topic 3	• Manage user identities and GitHub authentication: This section of the exam measures skills of DevOps Engineers and focuses on managing authentication and identity across organizations using SAML SSO, SCIM, and team synchronization. Candidates need to understand identity providers, user membership implications, authorization models, and enforcing security measures such as two-factor authentication.
Topic 4	• Manage GitHub Packages: This section of the exam measures skills of GitHub Enterprise Administrators and focuses on managing GitHub Packages, their use in workflows, and how they differ from releases. It involves accessing, writing, and sharing packages across teams while ensuring integration into CI • CD pipelines.

Free update for one year after purchasing is available for GH-100 study guide, therefore there is no need for you to spend extra money on update version. And the update version for GH-100 exam dumps will be sent to your email automatically, you just need to check your email for the update version. Besides, GH-100 Exam Materials are compiled by experienced experts and, so the quality can be guaranteed. We have online and offline service, and they possess the professional knowledge for GH-100 exam materials, and if you have any questions, you can consult us.

Microsoft GitHub Administration Sample Questions (Q66-Q71):

NEW QUESTION # 66

Why would a GitHub App be favored over a machine account for automation tasks?

- A. Machine accounts are easier to audit than GitHub Apps.
- B. GitHub Apps are limited to a single repository.
- C. Machine accounts are required for webhook delivery.
- **D. GitHub Apps provide a higher rate limit ceiling than using a personal access token on a machine account, when they use an install token and are owned by a GitHub Enterprise Cloud licensed enterprise.**

Answer: D

Explanation:

GitHub Apps authenticate with short-lived installation tokens scoped to fine-grained permissions and, when owned by a GitHub Enterprise Cloud organization, enjoy a higher rate limit (15,000 requests/hour) compared to a machine account's personal access token.

NEW QUESTION # 67

A financial services company is evaluating GitHub account types. Which of the following is a key distinction between GitHub Enterprise Managed Users and Personal Accounts?

- A. Enterprise Managed Users require the organization to manage their own authentication server.
- B. Enterprise Managed Users can collaborate across both personal and enterprise repositories.
- **C. Personal Accounts are owned by users and can be used for both personal and professional work.**
- D. Personal Accounts provide stricter control over repositories and user activity.

Answer: C

Explanation:

Personal Accounts are owned and controlled by individual users and can serve both their personal projects and professional work, whereas Enterprise Managed Users exist solely within the enterprise context and cannot be used for personal repositories.

NEW QUESTION # 68

You are managing a repository in your organization's GitHub account. A team member asks you to confirm who has access to the repository and their permission levels. Which tool should you use to review and manage repository access?

- A. Branch Protection Rules.
- B. GitHub Pages Settings.
- C. Repository Settings > Manage Access.
- D. GitHub Actions Logs.

Answer: C

Explanation:

Use the Repository Settings Manage Access page to view all users and teams with access and their assigned permission levels.

NEW QUESTION # 69

When comparing a partner identity provider integration with a non-partner identity management solution for GitHub Enterprise Managed Users, which statement is Correct?

- A. The non-partner identity provider integrations can utilize OIDC for authentication.
- B. The partner identity provider integrations support fewer GitHub-supported authentication methods.
- C. The non-partner identity provider integrations require manual configuration of SAML 2.0 details.
- D. The partner identity provider integrations rely on the partner to support the application on the partner IdP.

Answer: C

Explanation:

Non-partner identity provider integrations require you to enter SAML2.0 configuration details by hand - such as the Sign-on URL, Issuer, and X.509 certificate - whereas partner IdPs supply a pre-configured application integration.

NEW QUESTION # 70

How does metered billing work in GitHub Enterprise Cloud with Enterprise Managed Users (EMU)?

- A. Billing is based on the number of users created in Azure AD
- B. Billing is based on total users in the enterprise that are not dormant
- C. Billing is based on number of total users in the enterprise
- D. Billing is based on owners and members of GitHub organizations

Answer: C

Explanation:

Billing for GitHub Enterprise Cloud under metered (usage-based) billing is calculated by the total number of Enterprise Managed Users (and other license-consuming accounts) in your enterprise - each EMU consumes a seat and contributes to the monthly bill.

NEW QUESTION # 71

.....

Our GH-100 exam cram is famous for instant access to download, and you can receive the downloading link and password within ten minutes, and if you don't receive, you can contact us. Moreover, GH-100 exam materials contain both questions and answers, and it's convenient for you to check the answers after practicing.
