

Pass Guaranteed Quiz 2025 MikroTik MTCNA: MikroTik Certified Network Associate Exam Fantastic Valid Test Vce Free

DOWNLOAD the newest Exam4Free MTCNA PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1O1PFVncVb-UJqxqP-suHd9b9x6WRdsEH>

We have professional technicians examine the website every day, therefore if you buy MTCNA exam cram from us, you can enjoy a clean and safe online shopping environment. What's more, we offer you free demo to have a try before buying MTCNA exam torrent, you can know what the complete version is like through free demo. MTCNA Exam Materials cover most of knowledge points for the exam, and you can improve your ability in the process of learning as well as pass the exam successfully if you choose us. We offer you free update for 365 days for MTCNA exam materials after purchasing.

The MTCNA certification exam is intended for network professionals who want to enhance their skills in administering and managing MikroTik networks. MTCNA exam is conducted online and consists of multiple-choice questions that cover various topics such as network fundamentals, wireless networking, routing, firewall, and network security. MTCNA Exam is designed to test the candidate's theoretical and practical knowledge of MikroTik RouterOS.

2025 MTCNA Valid Test Vce Free | High-quality MTCNA 100% Free New Exam Experience

Your chances of passing the MikroTik Certified Network Associate Exam (MTCNA) certification exam the first time around can be greatly improved if you attempt the Exam4Free MikroTik MTCNA practice exam. To help you succeed on your first try at the MikroTik Certified Network Associate Exam (MTCNA) exam, Exam4Free has created three formats of MikroTik Certified Network Associate Exam (MTCNA) practice exam.

MikroTik MTCNA (MikroTik Certified Network Associate) Exam is a certification exam designed for individuals who want to demonstrate their knowledge and skills in network administration using MikroTik RouterOS software. The MTCNA exam covers various topics such as basic networking concepts, router configuration, wireless networking, firewall and security, and advanced routing protocols. Passing the MTCNA Exam is a testament to an individual's ability to configure, manage, and troubleshoot MikroTik networks.

MikroTik Certified Network Associate Exam Sample Questions (Q176-Q181):

NEW QUESTION # 176

When using routing option check-gateway=ping, after how many timeouts is the gateway considered unreachable?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

In MikroTik RouterOS, if you enable check-gateway=ping on a static route, RouterOS sends periodic ICMP echo requests (ping) to the specified gateway.

By default, the gateway is considered unreachable after:

* 2 consecutive ping timeouts ##

This status will cause the router to remove the route from the routing table until the gateway responds again.

Evaluations:

* A. 4 ##Too many

* B. 1 ##Too sensitive; only one timeout doesn't mark it unreachable

* C. 2 ##Correct default behavior

* D. 3 ##Incorrect default

MTCNA Course Manual - Gateway Checking:

"When using check-gateway=ping, the router waits for two failed pings before declaring the route inactive." Rene Meneses Study Guide - Static Routing Behavior:

"check-gateway=ping disables the route after two ping failures."

Terry Combs Notes - Route Monitoring:

"Ping-based route checks fail after 2 missed responses - that route becomes inactive."

NEW QUESTION # 177

Destination NAT (chain dstnat, action dst-nat) can be used to:

- A. Direct users from the Internet to a server within your local network
- B. Change source port
- C. Hide your local network from the Internet
- D. Change destination port

Answer: A,D

Explanation:

Destination NAT (dst-nat) is used to redirect packets arriving at the router to a different internal destination. It is most commonly used to allow public access to internal services such as web servers or mail servers.

You can:

* Change the destination IP address (redirect to an internal host)

* Change the destination port (e.g., port 8080 to port 80)

But:

* C. Changing the source port is a function of src-nat, not dst-nat ##

* D. Hiding the local network from the Internet is done via masquerade or src-nat ## MTCNA Course Manual - NAT Section:

"Use dst-nat to forward traffic to a private host. Port translation can also be applied (e.g., from 81 to 80)." Rene Meneses Study Guide - NAT Configuration:

"dst-nat changes the destination IP/port of packets arriving on a specific interface. Common use case: access to LAN services from WAN." Terry Combs Notes - NAT Rule Summary:

"dst-nat = port forwarding. src-nat/masquerade = hide internal addresses."

NEW QUESTION # 178

Select minimal set of software packages in RouterOS required to configure a wireless AP:

- A. routing
- B. system
- C. advanced-tools
- D. Wireless
- E. dhcp

Answer: D

Explanation:

To configure a wireless access point (AP) in RouterOS, the only required software package is wireless. All other functionalities like DHCP or routing are optional depending on the network setup. The system package is always present and not removable, so it's not listed as a required dependency in package selection.

MTCNA Course Material - Wireless Configuration Basics:

"Wireless functionality is provided by the wireless package. Without it, no wireless interfaces are present or configurable." Rene Meneses MTCNA Guide - Wireless Module:

"Only the wireless package is required to configure an AP. DHCP is used optionally for IP address assignment." MikroTik Wiki - Packages:

"The wireless package is responsible for enabling WLAN interfaces and features such as AP mode, client mode, and security."

Other packages:

* advanced-tools: includes tools like bandwidth-test and traffic generator

* dhcp: only needed if the router is issuing IPs

* routing: required for static/dynamic routing but not AP setup

Only Option A is required.

NEW QUESTION # 179

What kind of users are listed in the "/user" menu?

- A. Hot-Spot users
- B. pptp users
- C. router users
- D. wireless users

Answer: C

NEW QUESTION # 180

How long is level 1 (demo) license valid?

- A. 24 hours
- B. 1 year
- C. 1 month
- D. Infinite time

Answer: D

Explanation:

RouterOS Level 1 license is the demo license that comes with all RouterOS installations (particularly on x86 or CHR before activation). It is unrestricted in time, meaning it never expires, but functionality is extremely limited.

* A. 24 hours # Incorrect. There is no such time-limited restriction.

* B. Infinite time # Correct. Level 1 license is perpetual but has limited features.

* C. 1 month # Incorrect. MikroTik does not impose monthly timeouts on license levels.

* D. 1 year # Incorrect. No temporary time-bound license is assigned by default.

Extract from Official MTCNA Course Material - Licensing Section:

"Level 1 (demo) license is unlimited in time but has very limited functionality. It is designed for testing purposes only." Extract from Rene Meneses MTCNA Study Guide - RouterOS Licensing:

"The Level 1 license is not time-limited, but it cannot be used in production due to its lack of key features." Extract from MikroTik Wiki - Licensing Model:

"License level 1 is a free demo license that does not expire."
