NEW QUESTION # 66

One of the key elements of an inspection plan is:

- A. consequence of failure.
- B. probability of failure.
- C. repairs necessary to reduce risk.
- **D. examination methods to be used.**

Answer: D

Explanation:

API 580 outlines the required contents of an inspection plan in Section 12.3 and also in the "Output" section:

"The RBI inspection plan should include:

b) inspection methods that should be used;

c) extent of inspection (percent of total area to be examined or specific locations); d) inspection interval or next inspection date (timing)." Therefore, "examination methods to be used" is a fundamental part of the inspection plan, as explicitly stated.

Probability and consequence of failure are inputs to the risk analysis but not part of the inspection plan structure itself.
