The SecOps Group Certified AppSec Practitioner Exam Sample Questions (Q50-Q55):

NEW QUESTION # 50

Thomas is a key stakeholder in your project. Thomas has requested several changes to the

project scope for the project you are managing. Upon review of the proposed changes, you have discovered that these new requirements are laden with risks and you recommend to the change control board that the changes be excluded from the project scope. The change control board agrees with you. What component of the change control system communicates the approval or denial of a proposed change request?

- A. Scope change control system
- B. Integrated change control
- C. Configuration management system
- D. Change log

Answer: B

NEW QUESTION # 51

Nancy is the project manager of the NHH project. She and the project team have identified a significant risk in the project during the qualitative risk analysis process. Bob is familiar with the technology that the risk is affecting and proposes to Nancy a solution to the risk event. Nancy tells Bob that she has noted his response, but the risk really needs to pass through the quantitative risk analysis process before creating responses. Bob disagrees and ensures Nancy that his response is most appropriate for the identified risk. Who is correct in this scenario?

- A. Bob is correct. Not all risk events have to pass the quantitative risk analysis process to develop effective risk responses.
- B. Bob is correct. Bob is familiar with the technology and the risk event so his response should be implemented.
- C. Nancy is correct. All risks of significant probability and impact should pass the quantitative risk analysis process before risk responses are created.
- D. Nancy is correct. Because Nancy is the project manager she can determine the correct procedures for risk analysis and risk responses. In addition, she has noted the risk response that Bob recommends.

Answer: A
