

# Pass Guaranteed Quiz 2025 Professional Nutanix NCS-Core: Key Nutanix Certified Services Core Infrastructure Professional Concepts

BONUS!!! Download part of ExamDumpsVCE NCS-Core dumps for free: <https://drive.google.com/open?id=1PxWR5mog02QYWclwYiPZDdRJ6jZp2T0E>

If you want a relevant and precise content that imparts you the most updated, relevant and practical knowledge on all the key topics of the NCS-Core Certification Exam, no other NCS-Core study material meets these demands so perfectly as does ExamDumpsVCE's study guides. The NCS-Core questions and answers in these guides have been prepared by the best professionals who have deep exposure of the certification exams and the exam takers needs. The result is that ExamDumpsVCE's study guides are liked by so many ambitious professionals who give them first priority for their exams. The astonishing success rate of ExamDumpsVCE's clients is enough to prove the quality and benefit of the study questions of ExamDumpsVCE.

Nutanix NCS-Core Certification Exam is a vendor-neutral certification that is recognized globally. Nutanix Certified Services Core Infrastructure Professional certification program is designed to help IT professionals advance their careers by validating their skills and expertise in Nutanix core infrastructure solutions. Nutanix Certified Services Core Infrastructure Professional certification exam is also an excellent way for IT professionals to demonstrate their commitment to professional development and keeping up with the latest industry trends.

## Top Key NCS-Core Concepts | Professional NCS-Core: Nutanix Certified Services Core Infrastructure Professional 100% Pass

As a top selling product in the market, our NCS-Core study guide has many fans. They are keen to try our newest version products even if they have passed the NCS-Core exam. They never give up learning new things. Every time they try our new version of the NCS-Core Real Exam, they will write down their feelings and guidance. Also, they will exchange ideas with other customers. And in such a way, we can develop our NCS-Core practice engine to the best according to their requirements.

Nutanix NCS-Core certification exam covers a wide range of topics, including Nutanix core infrastructure solutions, hypervisors,

networking, data protection, and disaster recovery. NCS-Core exam is intended for IT professionals who have experience in designing, deploying, and managing Nutanix core infrastructure solutions in complex enterprise environments. Nutanix Certified Services Core Infrastructure Professional certification exam is available in multiple languages and can be taken online or at a testing center.

Nutanix NCS-Core Certification Exam is an excellent way for IT professionals to validate their skills and knowledge in Nutanix technology and infrastructure services. Nutanix Certified Services Core Infrastructure Professional certification exam is widely recognized in the IT industry and can open up new job opportunities for certified professionals. If you are an IT professional looking to enhance your career prospects, then the Nutanix NCS-Core certification exam is definitely worth considering.

## Nutanix Certified Services Core Infrastructure Professional Sample Questions (Q201-Q206):

### NEW QUESTION # 201

A company needs to replicate their VMs to a remote site and must have an RPO of less than 1 hour. When creating a protection domain, what should an administrator do to meet this requirement?

- A. Enable Entity Sync on the designated VMs
- B. Enable Async Replication with an RPO of 60 minutes
- C. Enable Near-Sync Replication with an RPO of 15 minutes
- D. Enable Availability Zones and send the VM to multiple targets

**Answer: B**

Explanation:

Ref: [https://portal.nutanix.com/page/documents/details?targetId=Web-Console-Guide-Prism-v5\\_10:sto-pd-guidelines-r.html](https://portal.nutanix.com/page/documents/details?targetId=Web-Console-Guide-Prism-v5_10:sto-pd-guidelines-r.html)

### NEW QUESTION # 202

A customer buys ultimate licensing and wants to use the built-in Nutanix software encryption on their new AHV cluster. The customer needs to create three storage containers and asks the consultant to complete the process as fast as possible. In which order should the cluster be deployed?

- A. Create Cluster -> Create Storage Containers -> Encrypt Cluster -> Install License Key
- B. Create Cluster -> Encrypt Cluster -> Install License Key -> Create Storage Containers
- C. Create Cluster -> Install License Key -> Create Storage Containers -> Encrypt Cluster
- D. Create Cluster -> Install License Key -> Encrypt Cluster -> Create Storage Containers

**Answer: D**

Explanation:

The optimal sequence for deploying a Nutanix AHV cluster with built-in software encryption involves the following steps:

- \* Create Cluster: Establish the cluster foundation, which sets up the basic network and cluster configurations.
- \* Install License Key: The ultimate licensing must be applied before enabling encryption because the feature depends on this license.
- \* Encrypt Cluster: Once the cluster is created and licensed, enable encryption to secure the data at rest. This step should be done before creating storage containers to ensure that all data written to the containers is encrypted from the outset.
- \* Create Storage Containers: Finally, create the storage containers. With encryption already enabled, any data written to these containers will be automatically encrypted.

References:

- \* Nutanix Bible (<https://www.nutanixbible.com>), specifically the sections on licensing and data encryption.
- \* Nutanix University: NCS-Core 6.8 Training (<https://university.nutanix.com>), covering deployment and configuration best practices.

### NEW QUESTION # 203

A VM is exhibiting one or more of the following baseline values based on the past 30 days:

- \* CPU usage < 20%
- \* CPU ready time < 5%
- \* Memory usage < 50% (moderately) or < 20% (severely)
- \* Memory swap rate = 0 Kbps

Which type of VM is being described?

- A. Bully VM
- B. Inactive VM
- C. Over-Provisioned VM
- D. Constrained VM

**Answer: C**

Explanation:

### Finding Waste and Right-Sizing VMs

The VM efficiency features in Prism Pro recommend VMs within the environment that are candidates for reclaiming unused resources that you can then return to the cluster. Click each tab to learn more.

#### Overprovisioned

- ➔ An overprovisioned VM is the opposite of a constrained VM, meaning it is a VM that is over-sized and wasting resources which are not needed. A VM is considered over-provisioned when it exhibits one or more of the following baseline values, based on the past 30 days: CPU usage < 50% (moderate) or < 20% (severe) and CPU ready time < 5%, Memory usage < 50% (moderate) or < 20% (severe), and memory swap rate = 0 Kbps.

#### Inactive

- ➔ A VM is inactive in either of the following states: A VM is considered dead when it has been powered off for at least 30 days. A VM is considered a zombie when it is powered on but does fewer than 30 read or write I/Os (total), and receives or transfers fewer than 1000 bytes per day for the past 30 days.

#### Constrained

- ➔ A constrained VM is one that does not have enough resources for the demand and can lead to performance bottlenecks. A VM is considered constrained when it exhibits one or more of the following baseline values, based on the past 30 days: CPU usage > 90% (moderate), 95% (severe) CPU ready time > 5%, 10% Memory usage > 90%, 95%, Memory swap rate > 0 Kbps (no moderate value).

#### Bully

- ➔ A bully VM is one that consumes too many resources and causes other VMs to starve. A VM is considered a bully when it exhibits one or more of the following conditions for over an hour: CPU ready time > 5%, memory swap rate > 0 Kbps, host I/O Stargate CPU usage > 85%.

### NEW QUESTION # 204

Which configuration item is a hard requirement to deploy a Nutanix cluster?

- A. CVM IP address
- B. Nutanix cluster name
- C. Cluster Virtual IP
- D. Motion IP address

**Answer: A**

Explanation:

The CVM IP address is a hard requirement for deploying a Nutanix cluster. Each CVM must have a unique IP address assigned to it as this IP address is critical for cluster operations, including data replication, management activities, and communication between CVMs and hypervisors. The other options, while important for various functionalities, do not represent a hard requirement for initial deployment. References:

\* The Nutanix Bible, Cluster Configuration chapter (<https://www.nutanixbible.com/>)

### NEW QUESTION # 205

A consultant needs to image nodes that cannot be discovered with the Foundation VM. The nodes are connected to a flat switch and are already part of a Nutanix cluster.

What course of action would result in Foundation success?

- A. Use the customer's top of rack switch.
- B. Bare metal image the nodes.
- C. Buy a new flat switch.

- D. Change the physical connections.

**Answer: B**

Explanation:

If nodes cannot be discovered using the Foundation VM and they are already part of a Nutanix cluster, the best course of action is to bare metal image the nodes. This process involves re-imaging the nodes from scratch, which can resolve discovery and communication issues that may be caused by existing configurations or errors within the cluster's networking setup.
