Oracle Cloud Infrastructure 2024 Generative AI Professional valid training collection & 1z0-1127-24 study prep torrent & Oracle Cloud Infrastructure 2024 Generative AI Professional exam practice pdf

As an old saying goes: Practice makes perfect. Facts prove that learning through practice is more beneficial for you to learn and test at the same time as well as find self-ability shortage in 1z0-1127-24 test prep. The PC test engine of our 1z0-1127-24 exam torrent is designed for such kind of condition, when the system of the 1z0-1127-24 Exam Torrent has renovation of production techniques by actually simulating the test environment. Until then, you will have more practical experience and get improvement rapidly through our 1z0-1127-24 quiz guide.

Oracle Cloud Infrastructure 2024 Generative AI Professional Sample Questions (Q21-Q26):

NEW QUESTION # 21

Which technique involves prompting the Large Language Model (LLM) to emit intermediate reasoning steps as part of its response?

- A. Chain-of-Through
- B. Least to most Prompting
- C. Step-Bock Prompting
- D. In context Learning

Answer: A

NEW QUESTION # 22

Given a block of code:

qa = Conversational Retrieval Chain, from l1m (l1m, retriever-retv, memory-memory) when does a chain typically interact with memory during execution?

- A. Continuously throughout the entire chain execution process
- B. Before user input and after chain execution
- C. Only after the output has been generated
- D. After user input but before chain execution, and again after core logic but before output

Answer: C

NEW QUESTION # 23

Which technique involves prompting the Large Language Model (LLM) to emit intermediate reasoning steps as part of its response?

- A. Chain-of-Through
- B. Least to most Prompting
- C. Step-Bock Prompting
- D. In context Learning

Answer: A

Explanation:

Chain-of-Thought prompting involves prompting the Large Language Model (LLM) to emit intermediate reasoning steps as part of its response. This technique helps the model articulate its thought process and reasoning, leading to more transparent and understandable outputs. By breaking down the problem into smaller, logical steps, the model can provide more accurate and detailed responses.

NEW QUESTION # 24

Which statement is true about string prompt templates and their capability regarding variables?

- A. They can only support a single variable at a time.
- B. They support any number of variables, including the possibility of having none.
- C. They are unable to use any variables.
- D. They require a minimum of two variables to function properly.

Answer: B

Explanation:

A string prompt template is a mechanism used to structure prompts dynamically by inserting variables. These templates are commonly used in LLM-powered applications like chatbots, text generation, and automation tools.

How Prompt Templates Handle Variables:

They support an unlimited number of variables or can work without any variables.

Variables are typically denoted by placeholders such as {variable_name} or {{variable_name}} in frameworks like LangChain or Oracle AI.

Users can dynamically populate these placeholders to generate different prompts without rewriting the entire template.

Example of a Prompt Template:

Without variables: "What is the capital of France?"

With one variable: "What is the capital of {country}?"

With multiple variables: "What is the capital of {country}, and what language is spoken there?" Why Other Options Are Incorrect:

(B) is false because templates can work with one or no variables.

(C) is false because templates rely on variables for dynamic input.

(D) is false because templates can handle multiple placeholders.

□ Oracle Generative AI Reference:

Oracle integrates prompt engineering capabilities into its AI platforms, allowing developers to create scalable, reusable prompts for various AI applications.

NEW QUESTION # 25

Which component of Retrieval-Augmented Generation (RAG) evaluates and prioritizes the information retrieved by the retrieval system?

- A. Retriever
- **B. Ranker**
- C. Generator
- D. Encoder-decoder

Answer: B

NEW QUESTION # 26
