

Pass Guaranteed Quiz 2025 Salesforce MuleSoft-Integration-Architect-I Fantastic Valid Dumps Sheet

What's more, part of that Exam4PDF MuleSoft-Integration-Architect-I dumps now are free: <https://drive.google.com/open?id=1cjRLACTozJ66YPjKSXkE28gOIU2xPFGc>

All people dream to become social elite. However, less people can take the initiative. If you spend less time on playing computer games and spend more time on improving yourself, you are bound to escape from poverty. Maybe our MuleSoft-Integration-Architect-I real dump could give your some help. Our company concentrates on relieving your pressure of preparing the MuleSoft-Integration-Architect-I Exam. Getting the certificate equals to embrace a promising future and good career development. Perhaps you have heard about our MuleSoft-Integration-Architect-I exam question from your friends or news. Why not has a brave attempt? You will certainly benefit from your wise choice.

The actual Salesforce MuleSoft-Integration-Architect-I exam questions are in PDF format for the one who wants to study offline. The actual Salesforce MuleSoft-Integration-Architect-I exam questions are in simple PDF form. The PDF format is suitable both for smartphones as well as tablets. You can print documents and study anywhere. The plus point is that the PDF version is updated regularly to improve its MuleSoft-Integration-Architect-I Exam Questions and reflect changes in the syllabus of the exam.

MuleSoft-Integration-Architect-I Practice Exams, New MuleSoft-Integration-

Architect-I Test Practice

We have special online worker to solve all your problems. Once you have questions about our MuleSoft-Integration-Architect-I latest exam guide, you can directly contact with them through email. We are 7*24*365 online service. We are welcome you to contact us any time via email or online service. We have issued numerous products, so you might feel confused about which MuleSoft-Integration-Architect-I study dumps suit you best. You will get satisfied answers after consultation. Our online workers are going through professional training. Your demands and thought can be clearly understood by them. Even if you have bought our high-pass-rate MuleSoft-Integration-Architect-I training practice but you do not know how to install it, we can offer remote guidance to assist you finish installation. In the process of using, you still have access to our after sales service. All in all, we will keep helping you until you have passed the MuleSoft-Integration-Architect-I exam and got the certificate.

Salesforce Certified MuleSoft Integration Architect I Sample Questions (Q154-Q159):

NEW QUESTION # 154

Refer to the exhibit.

A business process involves the receipt of a file from an external vendor over SFTP. The file needs to be parsed and its content processed, validated, and ultimately persisted to a database. The delivery mechanism is expected to change in the future as more vendors send similar files using other mechanisms such as file transfer or HTTP POST.

What is the most effective way to design for these requirements in order to minimize the impact of future change?

- A. Use a MuleSoft Scatter-Gather and a MuleSoft Batch Job to handle the different files coming from different sources
- B. Use a composite data source so files can be retrieved from various sources and delivered to a MuleSoft Batch Job for processing
- C. Create a Process API to receive the file and process it using a MuleSoft Batch Job while delegating the data save process to a System API
- **D. Create an API that receives the file and invokes a Process API with the data contained in the file, then have the Process API process the data using a MuleSoft Batch Job and other System APIs as needed**

Answer: D

Explanation:

* Scatter-Gather is used for parallel processing, to improve performance. In this scenario, input files are coming from different vendors so mostly at different times. Goal here is to minimize the impact of future change. So scatter Gather is not the correct choice.

* If we use 1 API to receive all files from different Vendors, any new vendor addition will need changes to that 1 API to accommodate new requirements. So Option A and C are also ruled out.

* Correct answer is Create an API that receives the file and invokes a Process API with the data contained in the file, then have the Process API process the data using a MuleSoft Batch Job and other System APIs as needed. Answer to this question lies in the API led connectivity approach.

* API-led connectivity is a methodical way to connect data to applications through a series of reusable and purposeful modern APIs that are each developed to play a specific role - unlock data from systems, compose data into processes, or deliver an experience. System API : System API tier, which provides consistent, managed, and secure access to backend systems. Process APIs : Process APIs take core assets and combines them with some business logic to create a higher level of value. Experience APIs : These are designed specifically for consumption by a specific end-user app or device.

So in case of any future plans , organization can only add experience API on addition of new Vendors, which reuse the already existing process API. It will keep impact minimal.

NEW QUESTION # 155

Which of the below requirements prevent the usage of Anypoint MQ in a company's network? (Choose two answers)

- A. ability for a third party outside the company's network to consume events from the queue
- B. single message payload can be up to 15 MB
- C. the message broker must be hosted on premises
- D. payloads must be encrypted
- E. support for point-to-point messaging

Answer: C,E

NEW QUESTION # 156

Refer to the exhibit.

An organization is designing a Mule application to receive data from one external business partner. The two companies currently have no shared IT infrastructure and do not want to establish one. Instead, all communication should be over the public internet (with no VPN).

What Anypoint Connector can be used in the organization's Mule application to securely receive data from this external business partner?

- A. Object Store connector
- B. SFTP connector
- C. VM connector

- D. File connector

Answer: B

Explanation:

- * Object Store and VM Store is used for sharing data inter or intra mule applications in same setup. Can't be used with external Business Partner
- * Also File connector will not be useful as the two companies currently have no shared IT infrastructure. It's specific for local use.
- * Correct answer is SFTP connector. The SFTP Connector implements a secure file transport channel so that your Mule application can exchange files with external resources. SFTP uses the SSH security protocol to transfer messages. You can implement the SFTP endpoint as an inbound endpoint with a one-way exchange pattern, or as an outbound endpoint configured for either a one-way or request-response exchange pattern.

NEW QUESTION # 157

An insurance company is using a CloudHub runtime plane. As a part of requirement, email alert should be sent to internal operations team every time of policy applied to an API instance is deleted As an integration architect suggest on how this requirement be met?

- A. Use audit logs in Anypoint platform to detect a policy deletion and configure the Audit logs alert feature to send an email to the operations team
- B. Use Anypoint monitoring to configure an alert that sends an email to the operations team every time a policy is deleted in API manager
- C. Create a custom connector to be triggered every time of policy is deleted in API manager
- **D. Implement a new application that uses the Audit log REST API to**

Answer: D

Explanation:

detect the policy deletion and send an email to operations team the SMTP connector

NEW QUESTION # 158

According to MuleSoft, which deployment characteristic applies to a microservices application architecture?

- A. Core business capabilities are encapsulated in a single, deployable application
- B. All services of an application can be deployed together as single Java WAR file
- C. A deployment to enhance one capability requires a redeployment of all capabilities
- **D. Services exist as independent deployment artifacts and can be scaled -independently of other services**

Answer: D

NEW QUESTION # 159

.....

Exam4PDF made an absolute gem of study material which carries actual Salesforce MuleSoft-Integration-Architect-I Exam Questions for the students so that they don't get confused in order to prepare for Salesforce MuleSoft-Integration-Architect-I exam and pass it with a good score. The Salesforce MuleSoft-Integration-Architect-I practice test questions are made by examination after consulting with a lot of professionals and receiving positive feedback from them. The Salesforce Certified MuleSoft Integration Architect I (MuleSoft-Integration-Architect-I) practice test questions prep material has actual Salesforce MuleSoft-Integration-Architect-I exam questions for our customers so they don't face any hurdles while preparing for Salesforce MuleSoft-Integration-Architect-I certification exam.
