confidence to take the exam? It doesn't matter that you can use our 2Pass4sure dumps.

SAP Certified Application Associate - SAP S/4HANA Cloud (public) - Service Implementation Sample Questions (Q31-Q36):

NEW QUESTION # 31

You want to use a product proposal in a service order.
Which actions support this requirement?

Note: There are 2 correct answers to this question.

- A. You create an equipment as a reference object and assign in to the service order.
- B. You create a bill of material (BOM), representing the components that can be selected in the service order.
- C. You activate the product proposal functionality in the item category used in the service order.
- D. You add the required service contract as a reference document to the service order on header level.

Answer: C

NEW QUESTION # 32

Data Migration

53 of 80

What are characteristics of the SAP S/4HANA Migration Cockpit?

Note: There are 2 correct answers to this question.

- A. Mapping source values to SAP S/4HANA target values
- B. Combining the staging and file approaches into one migration project
- C. Guidance and simulation of the migration process
- D. Extensibility using the Legacy System Migration Workbench (LSMW)

Answer: A,C

NEW QUESTION # 33

What is a feature that is available in the SAP S/4HANA Cloud system once scope item Procurement for Service Management (3NI) has been activated?

- A. A service order line item can create a purchase order directly, skipping the purchase requisition document.
- B. Goods receipts for purchase orders can be posted that update costs in a service order at line item level.
- C. A service order line item can create a purchase contract directly, skipping the purchase order document.
- D. Goods receipts for service order line items can be posted, updating costs in the purchase order sent to a vendor.

The best strategy to enhance your knowledge and become accustomed to the C_ACDET_2506 Exam Questions format is to test yourself. Itcertking SAP C_ACDET_2506 practice tests (desktop and web-based) assist you in evaluating and enhancing your knowledge, helping you avoid viewing the SAP test as a potentially daunting experience. If the reports of your SAP practice exams (desktop and online) aren't perfect, it's preferable to practice more. C_ACDET_2506 self-assessment tests from Itcertking works as a wake-up call, helping you to strengthen your C_ACDET_2506 preparation ahead of the SAP actual exam.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details

Topic 1	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 2	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 3	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

SAP C_ACDET_2506 Valid Exam Format, C_ACDET_2506 Exam Cram Questions

Our C_ACDET_2506 study materials boost the self-learning and self-evaluation functions so as to let the clients understand their learning results and learning process, then find the weak links to improve them. Through the self-learning function the learners can choose the learning methods by themselves and choose the contents which they think are important. Through the self-evaluation function the learners can evaluate their mastery degree of our C_ACDET_2506 Study Materials and their learning process. The two functions can help the learners adjust their learning arrangements and schedules to efficiently prepare the exam.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q55-Q60):

NEW QUESTION # 55

What is the recommended order of operations for creating a required Flex Master Data (FMD) type field in a project header?

- A. 1. Create the FMD template 2. Create the FMD type field 3. Load the data
- B. 1. Load the data 2. Create the FMD type field 3. Create the FMD template
- C. 1. Create the FMD type field 2. Create the FMD template 3. Load the data
- D. 1. Create the FMD template 2. Load the data 3. Create the FMD type field

Answer: A

Explanation:

The correct order is to first create the Flex Master Data (FMD) template, which defines the structure and attributes of the data. Then, create the FMD type custom field in the project header referencing that template. Finally, load the master data records into the template via CSV import. This sequence ensures the field has a valid template to reference, and data is available when users interact with the field.

NEW QUESTION # 56

Which scenarios are applicable when moving templates from the test site to the production site by Intelligent Configuration Manager (ICM)? (Select 2 correct answers)

- A. Draft templates on the source site are skipped.
- B. Batch imports are available for templates when migrating configuration bundles.
- C. New templates that successfully migrated to the production site are in Draft state.
- D. Published templates with flex master data references in the test site are migrated to the production site during the first migration attempt.

Answer: A,C

Explanation:

ICM only migrates published templates; draft templates are skipped (A). When templates are imported into production, they arrive in draft state by default to allow review and publishing before use (C). Batch imports for templates (B) are not supported; migration is typically handled per template. Flex master data references require manual migration steps and are not migrated automatically during the initial template transfer (D).

NEW QUESTION # 57

Which of the following considerations are important when creating custom fields? Note: There are 2 correct answers to this question.

- A. When a field has been created and published, that field type has been consumed from the number of available fields on the class
- B. There's a limit to the number of fields, by data type, that can be added to a class
- C. Published field changes can be reverted via Un-publish to free up memory
- D. The data type of a field can be dynamically changed, depending on data type availability

Answer: A,B

NEW QUESTION # 58

How do you format the Help Tip for a field?

- A. Select Field Configuration, select the class, and edit the field. In the Help Tip, you can format the text by selecting the string and using regular keyboard controls such as Ctrl-I, Ctrl-B.
- B. Select Field Configuration and edit the field. In the Help Tip, you can only use plain text without any formatting options.
- C. Select Field Configuration, select the class, and edit the field. In the Help Tip, you can add standard HTML tags for formatting
- D. Select Field Configuration and edit the field. In the Help Tip, you can format the text by using the mouse to highlight the text and then right-clicking to access formatting options.

Answer: C

Explanation:

SAP Ariba supports basic HTML formatting tags in the Help Tip text field, such as , <i>, and <u>, which allow formatting like bold, italics, and underline within the help tips. This provides flexibility in presenting clear, well-structured guidance to end users. Options B and C suggesting mouse-based formatting or keyboard shortcuts are not supported because the Help Tip editor is a plain text input that parses HTML but does not offer a rich-text UI. Option D is incorrect because HTML tags are explicitly allowed for formatting.

This method enhances user experience by allowing visually distinct emphasis and line breaks in Help Tips, improving clarity without complicating the UI.

NEW QUESTION # 59

How can you set the order of your custom Contract Workspace fields? (Select 2 correct answers)

- A. Fields are presented in alphabetical order of the field label.
- B. Select Field Configuration, find the class, and select the Layout tab. Drag and drop the order of the fields, then publish.
- C. Navigate to the UI where the class is presented, select Customize in the banner, edit, and drag and drop fields, then publish.
- D. Select Field Configuration and under the Advanced tab set the Sequence property, then publish.

Answer: B,D

Explanation:

Custom Contract Workspace field order can be controlled through two methods:

* Using the Layout tab in Field Configuration, where fields can be dragged and dropped to reorder them visually, followed by publishing the changes.

* Using the Sequence property under the Advanced tab, assigning numeric values that define the sort order, with lower numbers appearing first. Option B is incorrect because UI banner customization does not manage field order in Contract Workspace screens. Option C is incorrect; field order is controlled by explicit settings, not alphabetical label order.
