In today's society, there are increasingly thousands of people put a priority to acquire certificates to enhance their abilities. With a total new perspective, our ADA-C01 study materials have been designed to serve most of the office workers who aim at getting a ADA-C01 certification. Our ADA-C01 Test Guide keep pace with contemporary talent development and makes every learner fit in the needs of the society. There is no doubt that our ADA-C01 latest question can be your first choice for your relevant knowledge accumulation and ability enhancement.

As we all know, it is not easy to get promotion. For the first thing, you must be good at finishing your work excellently. At the same time, you must accumulate much experience and knowledge. If you urgently want to stand out in your company, our ADA-C01 exam guide can help you realize your aims in the shortest time. For not only that our ADA-C01 Study Materials can help you know more knowledge on the subject and our ADA-C01 practice engine can help you get your according certification.

Exam Snowflake ADA-C01 Tutorials | Reliable ADA-C01 Dumps Sheet

A second format is a ADA-C01 web-based practice exam that can take for self-assessment. However, it differs from desktop-based ADA-C01 practice exam software as it can be taken via any browser, including Chrome, Firefox, Safari, and Opera. This Snowflake ADA-C01 web-based practice exam does not require any other plugins. You can take this ADA-C01 self-assessment test on Windows, iOS, Linux, Mac, and Android. It also includes all of the functionalities of desktop ADA-C01 software and will

assist you in passing the ADA-C01 certification test.

Snowflake SnowPro Advanced Administrator Sample Questions (Q60-Q65):

NEW QUESTION # 60

What information is required from the Identity Provider (IdP) to enable federated authentication in Snowflake? (Select TWO).

- A. URL endpoint for SAML requests
- B. SAML response format
- C. Authentication certificate
- D. IdP account details
- E. IdP encryption key

Answer: A,C

Explanation:

To enable federated authentication (aka SSO via SAML 2.0) in Snowflake, the integration with an Identity Provider (IdP) must be configured. This setup involves configuring external authentication via SAML, and Snowflake needs specific information from the IdP.

Required Information from IdP:

URL Endpoint for SAML Requests (B)

This is often referred to as the SSO URL or SAML 2.0 Endpoint (HTTP).

It's the URL that Snowflake redirects users to for authentication.

In Snowflake's SAML configuration, this is required as the SAML2_ISSUER or SAML2_SSO_URL.

Authentication Certificate (D)

This is the X.509 certificate issued by the IdP.

It's used by Snowflake to validate the digital signature of the SAML assertions sent by the IdP.

It ensures that the SAML response is authentic and not tampered with.

☐ Why Other Options Are Incorrect:

A . IdP account details

Not needed. Snowflake doesn't require credentials or internal details from the IdP. It relies on assertions sent via SAML, not stored accounts.

C . SAML response format

Snowflake adheres to SAML 2.0 standard, and expects a compliant format. There's no need to specify format explicitly - it's part of the standard protocol.

E . IdP encryption key

Not required by Snowflake. Snowflake verifies SAML assertions via signature validation, not encryption using the IdP's private key.

SnowPro Administrator Reference:

Snowflake Documentation - Federated Authentication Setup

<https://docs.snowflake.com/en/user-guide/security-fed-auth-use>

<https://docs.snowflake.com/en/user-guide/security-fed-auth-config>

Required IdP Metadata for Snowflake SAML Configuration:

SAML2_SSO_URL: SAML 2.0 POST binding endpoint

SAML2_X509_CERT: Public cert used to validate IdP signatures

NEW QUESTION # 61

An Administrator has a table named SALES_DATA which needs some edits, but the Administrator does not want to change the main table data. The Administrator decides to make a transient copy of this table and wants the transient table to have all the same permissions as the original table.

How can the Administrator create the transient table so it inherits the same permissions as the original table, and what considerations need to be made concerning the requirements? (Select TWO).

- A. Use the following SQL command:
`create transient table TRANSIENT SALES DATA as select * from SALES_DATA copy grants;`
- B. Use the following SQL commands:
`create transient table TRANSIENT_SALES_DATA like SALES_DATA copy grants; insert into TRANSIENT_SALES_DATA select * from SALES_DATA;`
- C. Transient tables will be purged at the end of the user session and do not have any Fail-safe period.
- D. Transient tables will persist until explicitly dropped and contribute to overall storage costs.
- E. Use the following SQL command:

create transient table TRANSIENT_SALES_DATA as select * from SALES_DATA;

Answer: A,D

Explanation:

Explanation

According to the Snowflake documentation¹, the COPY GRANTS option can be used to copy all privileges, except OWNERSHIP, from the existing table to the new transient table. This option also preserves any future grants defined for the object type in the schema. Option A is incorrect because it does not copy any grants from the original table. Option C is incorrect because it does not copy the data from the original table, only the structure and grants. Option E is incorrect because transient tables are not session-based and do not have a Fail-safe period, but they do have a Time Travel retention period².

1: CREATE TABLE | Snowflake Documentation 2: Working with Temporary and Transient Tables | Snowflake Documentation

NEW QUESTION # 62

Which tasks can be performed by the ORGADMIN role? (Select THREE).

- A. Perform zero-copy cloning on account data.
- **B. Create one or more accounts in the organization.**
- C. Create secure views on application tables within the organization.
- **D. View usage information for all accounts in the organization.**
- E. Create a reader account to share data with another organization.
- **F. View a list of all regions enabled for the organization.**

Answer: B,D,F

Explanation:

Explanation

A user with the ORGADMIN role can perform the following tasks¹:

*Create one or more accounts in the organization.

*View a list of all regions enabled for the organization.

*View usage information for all accounts in the organization.

Option C is incorrect because creating secure views on application tables is not a function of the ORGADMIN role, but rather a function of the roles that have access to the tables and schemas within the accounts. Option E is incorrect because performing zero-copy cloning on account data is not a function of the ORGADMIN role, but rather a function of the roles that have the CLONE privilege on the objects within the accounts. Option F is incorrect because creating a reader account to share data with another organization is not a function of the ORGADMIN role, but rather a function of the roles that have the CREATE SHARE privilege on the objects within the accounts.

NEW QUESTION # 63

An Administrator needs to create a sample of the table LINEITEM. The sample should not be repeatable and the sampling function should take the data by blocks of rows.

What select command will generate a sample of 20% of the table?

- A. select * from LINEITEM sample bernoulli (20);
- **B. select * from LINEITEM sample system (20);**
- C. select * from LINEITEM tablesample system (20) seed (1);
- D. select * from LINEITEM tablesample block (20 rows);

Answer: B

Explanation:

Explanation

This command will generate a sample of 20% of the table by using the SYSTEM (or BLOCK) sampling method, which selects each block of rows with a probability of 20/100. This method is suitable for taking data by blocks of rows, as the question requires.

According to the Snowflake documentation, "SYSTEM (or BLOCK): Includes each block of rows with a probability of p/100.

Similar to flipping a weighted coin for each block of rows. This method does not support fixed-size sampling." The other options are either incorrect or do not meet the requirements of the question. Option A uses the BERNOULLI (or ROW) sampling method, which selects each row with a probability of 20/100, but does not take data by blocks of rows. Option C uses the BLOCK sampling method, but specifies a fixed number of rows (20) instead of a percentage (20%).

Option D uses the SYSTEM sampling method, but specifies a seed value (1), which makes the sampling repeatable, contrary to the question.

NEW QUESTION # 64

What is required for stages, without credentials, to limit data exfiltration after a storage integration and associated stages are created?

- A. ALTER ACCOUNT my_account SET
 REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_CREATION = false;
 ALTER ACCOUNT my_account SET
 REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_OPERATION = false;
 ALTER ACCOUNT my_account SET
 PREVENT_UNLOAD_TO_INLINE_URL = false;
- B. ALTER ACCOUNT my_account SET
 REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_CREATION = true;
 ALTER ACCOUNT my_account SET
 REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_OPERATION = true;
 ALTER ACCOUNT my_account SET
 PREVENT_UNLOAD_TO_INLINE_URL = false;
- C. ALTER ACCOUNT my_account SET
 REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_CREATION = true;
 ALTER ACCOUNT my_account SET
 REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_OPERATION = true;
 ALTER ACCOUNT my_account SET
 PREVENT_UNLOAD_TO_INLINE_URL = true;
- D. ALTER ACCOUNT my_account SET
 REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_CREATION = false;
 ALTER ACCOUNT my_account SET
 REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_OPERATION = false;
 ALTER ACCOUNT my_account SET
 PREVENT_UNLOAD_TO_INLINE_URL = true;

Answer: C

Explanation:

Explanation

According to the Snowflake documentation¹, stages without credentials are a way to create external stages that use storage integrations to access data files in cloud storage without providing any credentials to Snowflake.

Storage integrations are objects that define a trust relationship between Snowflake and a cloud provider, allowing Snowflake to authenticate and authorize access to the cloud storage. To limit data exfiltration after a storage integration and associated stages are created, the following account-level parameters can be set:

*REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_CREATION: This parameter enforces that all external stages must be created using a storage integration. This prevents users from creating external stages with inline credentials or URLs that point to unauthorized locations.

*REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_OPERATION: This parameter enforces that all operations on external stages, such as PUT, GET, COPY, and LIST, must use a storage integration. This prevents users from performing operations on external stages with inline credentials or URLs that point to unauthorized locations.

*PREVENT_UNLOAD_TO_INLINE_URL: This parameter prevents users from unloading data from Snowflake tables to inline URLs that do not use a storage integration. This prevents users from exporting data to unauthorized locations.

Therefore, the correct answer is option D, which sets all these parameters to true. Option A is incorrect because it sets PREVENT_UNLOAD_TO_INLINE_URL to false, which allows users to unload data to inline URLs that do not use a storage integration. Option B is incorrect because it sets both REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_CREATION and REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_OPERATION to false, which allows users to create and operate on external stages without using a storage integration. Option C is incorrect because it sets all the parameters to false, which does not enforce any restrictions on data exfiltration.

NEW QUESTION # 65

.....

You feel tired when you are preparing hard for Snowflake ADA-C01 exam, do you know what other candidates are doing? Look at the candidates in IT certification exam around you. Why are they confident when you are nervous about the exam? Is your ability below theirs? Of course not. Have you wondered why other IT people can easily pass Snowflake ADA-C01 test? The answer is to use Exam4Labs Snowflake ADA-C01 questions and answers which can help you sail through the exam with no mistakes. Don't believe it? Do you feel it is amazing? Have a try. You can confirm quality of the exam dumps by experiencing free demo. Hurry up and click Exam4Labs.com
