The Palo Alto Networks XSIAM Analyst (XSIAM-Analyst) desktop practice exam software works only on Windows operating system.

Palo Alto Networks XSIAM Analyst Sample Questions (Q108-Q113):

NEW QUESTION # 108

What is the purpose of detection indicator rules?

Response:

- A. To define alert suppression criteria
- B. To correlate XDR agent policies
- C. To detect specific behaviors and generate alerts
- D. To manage threat hunting queries

Answer: C

NEW QUESTION # 109

What is the core purpose of attack surface rules?

Response:

- A. To apply endpoint policy configurations
- B. To detect and classify exposed services or CVEs
- C. To define user access roles
- D. To monitor email phishing attacks

Answer: B

NEW QUESTION # 110

Which Cortex XSIAM feature allows managing multiple indicators and applying verdicts manually?

Response:

- A. Automation Editor
- B. Indicator Management Console
- C. Live Terminal
- D. Asset Inventory

Answer: B

NEW QUESTION # 111

A SOC team member implements an incident starring configuration, but incidents created before this configuration were not starred.

What is the cause of this behavior?

- A. The analyst must manually star incidents after determining which alerts within the incident were automatically starred
- B. Starring configuration is applied to the newly created alerts, and the incident is subsequently starred
- C. Starring is applied to alerts after they have been merged into incidents, but incidents are not starred
- D. It takes 48 hours for the configuration to take effect

Answer: B

Explanation:

The correct answer is D - Starring configuration is applied to the newly created alerts, and the incident is subsequently starred. Incident starring configuration in Cortex XSIAM is not retroactive. It only applies to new alerts and incidents created after the configuration is implemented. Pre-existing incidents are not starred automatically and must be managed manually if needed.

"Starring configurations take effect for new alerts and incidents created after the configuration is applied.

Existing incidents are not updated retroactively."
