## Test ITIL ITIL4-DPI Passing Score, Reliable ITIL4-DPI Real Exam

There is always a fear of losing ITIL4-DPI exam and causes you loss of money and waste time on some unless materials. However, these risks will never exist in our ITIL4-DPI exam materials. Your money and exam attempt is bound to award you a sure and definite success with 100% money back guarantee. You can claim for the refund of money if you do not succeed and achieve your target. Our ITIL4-DPI exam materials have a most reliable guarantee. We ensure you that you will be paid back in full without any deduction and you can easily pass the ITIL4-DPI Exam by using our ITIL4-DPI dumps. Moreover, you will get all the updated ITIL4-DPI questions with verified answers. If you want to prepare yourself for the real exam, then it is one of the most effect ways to improve your ITIL4-DPI exam preparation level.

### ITIL 4 Strategist: Direct, Plan and Improve (DPI) Sample Questions (Q10-Q15):

#### NEW QUESTION # 10

Which type of plan would outline the organizational vision for a multi-year infrastructure expansion?

- A. Tactical
- B. Project
- **C. Strategic**
- D. Operational

**Answer: C**

Explanation:

According to ITIL DPI, planning occurs at strategic, tactical, and operational levels. A strategic plan defines long-term direction, including multi-year infrastructure expansion that aligns with business goals. Tactical plans break this down into departmental objectives, while operational plans manage day-to-day execution.

Project plans are temporary and specific but not long-term vision documents.

(Reference: ITIL 4 Strategist DPI, section on "Planning levels - strategic, tactical, operational")

#### NEW QUESTION # 11

In an organization, IT teams are working on documented, structured, and systematic processes for all customer-facing work.

Which concept is this an example of?

- **A. A method**
- B. A balanced scorecard
- C. A control
- D. A risk

**Answer: A**

Explanation:

In DPI, a method is defined as a structured and systematic approach to performing work, ensuring consistency and repeatability.

Documented processes for customer-facing work represent methods applied to service management. A control is something put in place to manage risk, a balanced scorecard is a performance measurement tool, and a risk is a potential event. Hence, "method" is the correct categorization.

(Reference: ITIL 4 Strategist DPI, section on "Policies, controls, and methods")

#### NEW QUESTION # 12

An organization is transitioning to a new customer relationship management (CRM) system with the aim of expanding its customer base and increasing customer retention. The new cloud-based system will be used both internally and by an outsourced call centre. This high-cost, high-priority initiative has many critics who are concerned with lack of resources.

Which stakeholder's support for this initiative is MOST needed to obtain necessary resources and overcome concerns?

- A. Director of Sales
- B. Information Security Manager
- C. Call Centre Manager
- D. Service Level Manager

**Answer: A**

Explanation:

In ITIL 4 DPI, governance ensures that high-cost, high-priority initiatives align with strategic direction.

For initiatives that affect customer base and retention, executive sponsorship is crucial to secure resources and overcome resistance. The Director of Sales is the key stakeholder since this system directly impacts sales growth and customer management. While service level, security, and call centre roles are important operationally, only executive-level oversight ensures the initiative is prioritized and funded.

(Reference: ITIL 4 Strategist DPI, section on "Governance at multiple levels - Strategic oversight and sponsorship")

### NEW QUESTION # 13

An organization is mapping a value stream for an IT service. In the current map, the same activity is repeated multiple times. When identifying opportunities to remove waste from the value streams, it has been determined that several days could be removed from the delivery time by eliminating repeated work.

What is this an example of?

- A. Cascading goals through the organization
- B. Building value chains on effective practices
- C. Establishing clear objectives for assessments
- D. Optimizing a workflow through the organization

**Answer: D**

Explanation:

In DPI, value stream mapping identifies bottlenecks, redundancies, and delays. Eliminating repeated activities to save time is an example of workflow optimization (Option C). This reflects Lean principles embedded in DPI - improving flow, reducing waste, and enhancing efficiency. Cascading goals (A), effective practices (B), and objectives for assessments (D) are unrelated to workflow waste elimination.

(Reference: ITIL 4 Strategist DPI, section on "Value stream mapping - optimizing workflow and eliminating waste")

### NEW QUESTION # 14

An IT department is functioning as a service provider for the company it is a part of.

Which statement about this provider's governance is CORRECT?

- A. An internal service provider's governance is limited to external factors such as regulations and legislation
- B. An internal service provider cannot govern itself unless it has specifically delegated the authority by the company's governing body
- C. An internal service provider is not subject to governance because they are part of the same company
- D. An internal service provider must use the service value system instead of governance

**Answer: B**

Explanation:

DPI clarifies that governance always comes from the organization's governing body. Internal service providers do not operate independently; they must follow the governance structures of the parent organization. They may only self-govern if explicitly delegated authority. Option A is incorrect (governance covers internal and external). Option B is false - governance always applies. Option D is misleading; the SVS supports governance, not replaces it.

(Reference: ITIL 4 Strategist DPI, section on "Governance in internal and external service provider contexts")

## NEW QUESTION # 15

.....

RealValidExam is the leading position in this field and famous for high pass rate of the ITIL4-DPI learning guide.
