NEW QUESTION # 64

Which of the following best describes an increment of working software?

- A. An automated test suite to verify functionality delivered in previous iterations.
- B. UML diagrams that describe how to deliver functionality in future iterations.
- **C. Additional features in a usable state that complement those delivered in previous iterations.**
- D. A decomposition of all Product Backlog items into tasks for future Sprint Backlog lists.
- E. A new user interface design for functionality delivered in previous iterations.

Answer: C

Explanation:

According to the Scrum Guide 1, an Increment is a concrete stepping stone toward the Product Goal. Each Increment is additive to all prior Increments and thoroughly verified, ensuring that all Increments work together. In order to provide value, an Increment must be usable. Multiple Increments may be created within a Sprint. The sum of the Increments is presented at the Sprint Review thus supporting empiricism. However, an Increment may be delivered to stakeholders prior to the end of the Sprint. The Sprint Review

NEW QUESTION # 65

- A. At the end of the Sprint.
- B. When all work in the Sprint Backlog related to the item is finished.
- C. When the item has no work remaining in order to be potentially released.
- D. When QA reports that the item passes all acceptance criteria.
