## Latest 2V0-12.24 Test Materials - 2V0-12.24 Exams

We will provide you with three different versions of our 2V0-12.24 exam questions on our test platform. You have the opportunity to download the three different versions from our test platform. The three different versions of our 2V0-12.24 Test Torrent include the PDF version, the software version and the online version. The three different versions will offer you same questions and answers, but they have different functions.

## VMware vSphere Foundation 5.2 Administrator Sample Questions (Q44-Q49):

### NEW QUESTION # 44

An organization is implementing a downtime avoidance solution and wants to ensure continuous availability of applications across separate sites that are connected via a high bandwidth/low latency link.

Which two VMware Cloud Foundation components support this capability with stretched clusters? (Choose two.)

- A. NSX Firewall
- B. vSAN
- C. vVOL
- D. vSphere
- E. vSphere Replication

**Answer: B,D**

Explanation:

vSAN: vSAN supports stretched clusters, allowing data to be mirrored across multiple sites to ensure continuous availability and enable high availability for virtual machines in case of a site failure.

vSphere: vSphere also supports stretched clusters, enabling the high availability of applications across multiple sites by allowing virtual machines to be run on either site in the event of a failure.

#### NEW QUESTION # 45

An administrator is troubleshooting a high CPU usage issue in a VMware Cloud Foundation environment running IaaS Control Plane. Several namespaces are reporting degraded performance.

What two steps should the administrator take to diagnose and potentially resolve the issue? (Choose two.)

- A. Upgrade the vSphere version to the latest release.
- B. Check the resource limits and reservations set on the Kubernetes namespaces.
- C. Review the CPU usage of the ESXi hosts to identify any that are overcommitted.
- D. Reboot the supervisor cluster to clear any temporary issues.
- E. Reconfigure the DRS settings to be more aggressive in load balancing.

Answer: B,C

Explanation:

The administrator should review the CPU usage of the ESXi hosts to identify if any hosts are overcommitted. Overcommitted hosts can lead to performance degradation across workloads.

Checking the resource limits and reservations on Kubernetes namespaces is crucial. If the resource limits are too low or improperly configured, it could cause degraded performance for workloads running in those namespaces.

#### NEW QUESTION # 46

What is the primary purpose of configuring VM storage policies in a VMware vSphere environment?

- A. To configure CPU and memory reservations for VMs.
- B. To manage network traffic between VMs.
- C. To enforce specific storage requirements such as performance, availability, and redundancy.
- D. To automate the backup of virtual machines.

Answer: C

Explanation:

The primary purpose of configuring VM storage policies in a VMware vSphere environment is to enforce specific storage requirements such as performance, availability, and redundancy. These policies help ensure that virtual machines are placed on datastores that meet the desired service levels and characteristics.

#### NEW QUESTION # 47

Put the following steps in the correct order to optimize resource allocation using Aria Operations.

Diagram showing six steps for optimizing resource allocation using Aria Operations:

- Navigate to the "Capacity Management" section.
- Monitor the environment to ensure optimized resource utilization.
- Use the recommendations provided by Aria Operations to reallocate resources.
- Select the cluster or resource pool to analyze.
- Review the capacity dashboard and identify over- or under-utilized resources.
- Log in to Aria Operations.

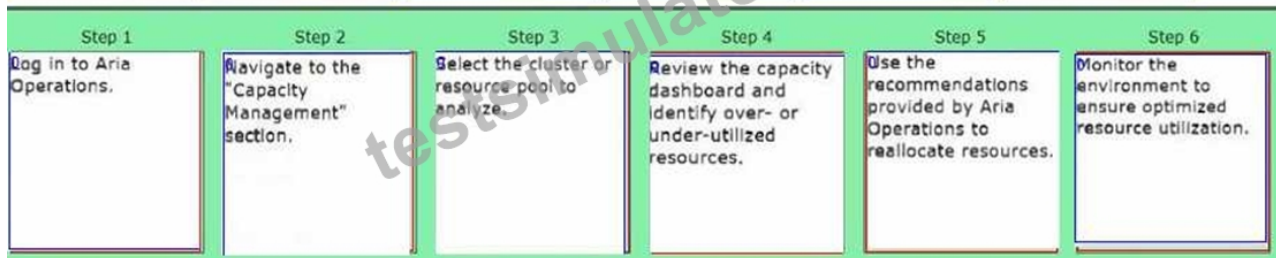

Steps to be ordered (Step 1 to Step 6):

- Step 1
- Step 2
- Step 3
- Step 4
- Step 5
- Step 6

Answer:

Explanation:

Navigate to the "Capacity Management" section.	Monitor the environment to ensure optimized resource utilization.	Use the recommendations provided by Aria Operations to reallocate resources.	Select the cluster or resource pool to analyze.	Review the capacity dashboard and identify over- or under-utilized resources.	Log in to Aria Operations.

#### NEW QUESTION # 48

A disk failure has occurred in a vSAN cluster.

What four steps should be taken to recover from this disk failure? (Choose four.)

- A. Use the vSphere Client to check the vSAN Health Service
- B. Disable disk group encryption
- C. Rebuild the affected disk group
- D. Replace the failed disk with a new one
- E. Perform a full resync of the vSAN objects
- F. Ensure the new disk is claimed by the vSAN cluster

**Answer: A,C,D,F**

Explanation:

Checking the vSAN Health Service in the vSphere Client is the first step in diagnosing the issue and verifying the status of the vSAN components after the disk failure.

Rebuilding the affected disk group is necessary to ensure that data is re-optimized and replicated in accordance with the vSAN policy.

Replacing the failed disk with a new one ensures that the storage capacity is restored.

Ensuring that the new disk is claimed by the vSAN cluster is important to ensure that it is recognized and integrated into the vSAN disk group.

#### NEW QUESTION # 49

.....

Taking 2V0-12.24 practice exams is also important because it helps you overcome your mistakes before the final attempt. When we talk about the 2V0-12.24 certification exam, the VMware 2V0-12.24 practice test holds more scoring power because it is all about how you can improve your VMware vSphere Foundation 5.2 Administrator (2V0-12.24) exam preparation. TestSimulate offers desktop practice exam software and web-based 2V0-12.24 Practice Tests. These 2V0-12.24 practice exams help you know and remove mistakes. This is the reason why the experts suggest taking the 2V0-12.24 practice test with all your concentration and effort.
