In modern society, innovation is of great significance to the survival of a company. The new technology of the Cloud-Digital-Leader practice prep is developing so fast. So the competitiveness among companies about the study materials is fierce. Luckily, our company masters the core technology of developing the Cloud-Digital-Leader Exam Questions. On one hand, our professional experts can apply the most information technology to compile the content of the Cloud-Digital-Leader learning materials. On the other hand, they also design the displays according to the newest display technology.

Google Cloud Digital Leader Sample Questions (Q19-Q24):

NEW QUESTION # 19
In Google Cloud IAM: if a policy applied at the project level gives you Owner permissions, your access to an individual resource in that project might be restricted to View permission if someone applies a more restrictive policy directly to that resource. What is correct below the options

- A. False
- B. True
- C. Not defined by GCP.
- D. None of the above.

Answer: A

Explanation:
Policies are a union of those applied to resources themselves and those inherited from higher levels in the hierarchy. If a parent policy is less restrictive, it overrides a more restrictive policy applied to the resource. If a parent policy is more restrictive, it does not override a less restrictive policy applied to the resource. Therefore, access granted at a higher level in the hierarchy cannot be taken away by policies applied at a lower level in the hierarchy.

NEW QUESTION # 20
When customer data is uploaded to Google Cloud, who owns the data?

- A. The customer
- B. Google
- C. A third party
- D. The customer and Google share ownership

Answer: A

Explanation:
When data is uploaded to Google Cloud, the customer retains full ownership of their data. Google Cloud acts as the data processor, providing the infrastructure and services for storage, but the rights to the data, including access, control, and management, remain with the customer.
Option B: The customer is correct because, according to Google Cloud's data privacy policy, the customer owns their data.

* Google Cloud Trust Principles: Data Protection and Privacy

NEW QUESTION # 21
What is a benefit of Google's purpose-built servers compared to standard servers?

- A. They are backward compatible with legacy disk drives.
- B. They run software that cannot be deployed on standard servers.
- C. They are cheaper to build than standard servers.
- D. They are optimized for specific tasks making them more efficient.

Answer: D

Explanation:
Google's purpose-built servers are specifically designed and optimized for Google's workloads, making them more efficient than standard off-the-shelf servers. These servers are tailored for specific tasks, such as handling large-scale data processing or machine learning workloads, providing better performance and energy efficiency.
Option C: They are optimized for specific tasks making them more efficient is correct because it describes the primary benefit of Google's custom server hardware.
Reference:
Google Cloud Data Center Innovation: Purpose-built Servers
Google Cloud Infrastructure: Hardware and Software Optimization

NEW QUESTION # 22
You are working with a user to set up an application in a new VPC behind a firewall and it is no-ticed that the user is concerned about data egress. Therefore, to provide assistance you want to con-figure the fewest open egress ports. Which of the following statement is correct?

- A. Set up a high-priority (1000) rule that blocks all egress and a low-priority (65534) rule that allows only the appropriate ports.
- B. Set up a high-priority (1000) rule to allow the appropriate ports.
- C. Set up a high-priority (1000) rule that pairs both ingress and egress ports.
- D. Set up a low-priority (65534) rule that blocks all egress and a high-priority rule (1000) that allows only the appropriate ports.

Answer: D

Explanation:
Explanation
Implied rules Every VPC network has two implied firewall rules. These rules exist, but are not shown in the Cloud Console:
Implied allow egress rule. An egress rule whose action is allow, destination is 0.0.0.0/0, and priority is the lowest possible (65535) lets any instance send traffic to any destination, except for traffic blocked by Google Cloud. A higher priority firewall rule may restrict outbound access. Internet access is allowed if no other firewall rules deny outbound traffic and if the instance has an external IP address or uses a Cloud NAT instance. For more information, see Internet access requirements.

NEW QUESTION # 23
Your organization is moving an application to Google Cloud. As part of that effort, it needs to migrate the application's working database from another cloud provider to Cloud SQL. The database runs on the MySQL engine. The migration must cause minimal disruption to users. Data must be secured while in transit.
Which should your organization use?

- A. BigQuery Data Transfer Service
- B. Database Migration Service
- C. Cloud Composer
- D. MySQL batch insert

Answer: B

Explanation:
