Appian ACD201 New Dumps Pdf, New Guide ACD201 Files

If you are still hesitating about whether you can get ACD201 certification through the exam, we believed that our ACD201 study materials will be your best choice, it will tell you that passing the exam is no longer a dream for you, and it will be your best assistant on the way to passing the exam. Tens of thousands of our customers have benefited from our ACD201 Exam Braindumps and got their certifications. So you will as long as you choose to buy our ACD201 practice guide.

Appian Senior Developer Sample Questions (Q21-Q26):

NEW QUESTION # 21
What are three locations to call an Integration that changes the source data? (Choose three.)

- A. Web API (POST, PUT, DELETE)
- B. Rule
- C. Web API (GET)
- D. Interface component saveInto parameter
- E. Process model (Call Integration Smart Service]

Answer: A,B,E

Explanation:
Integrations can be called from rules, allowing for source data changes when used in the proper context.
The Call Integration Smart Service in a process model can execute integrations that modify source data.
Web APIs using POST, PUT, or DELETE methods are typically used to change source data via integrations.

NEW QUESTION # 22
The synced record Task has a self-referential relationship defined in the column parentTaskId. There is a many-to-one record relationship between the id and parentTaskId called parentTask.
For a given task ID, you need to return the task name and the parent task name.
What should you do?

- A. Use a!queryRecordType() with a filter on the task id, with fields specified to return recordType!Task. name and recordType!Task.parentTask.name.
- B. Create a sync-time custom record field on the Task record called parentName. Specify this field to return in the query field selection.
- C. Use a!queryRecordType() filtered on the task id once to return the task name and parent task ID. Query the record again to return the parent task name.

Answer: A

Explanation:
Using a!queryRecordType() with a filter on the task ID and specifying both recordType!Task.name and recordType!Task.parentTask.name in the fields will efficiently return both the task name and its parent task name in a single query.

NEW QUESTION # 23

You need to create a read-only grid that displays support case information. Data for the support cases is mapped to the "Case" record type with data sync enabled.

Within the record, there are fields named "createdDateTime" and "resolvedDateTime". These two fields store the timestamps for when a case is created and resolved, respectively.

The grid includes a column indicating the number of hours between when the case was created and when it was resolved. This column must be sortable within the grid.

How should you calculate the hour value that will display in the column?

- A. Create a custom record field that evaluates in real-time, and calculates the number of hours between when the case was created and when it was resolved.
- B. Within the grid column, utilize an Appian function to calculate the number of hours between when the case was created and when it was resolved.
- C. Create a custom record field that evaluates at sync-time, and calculates the number of hours between when the case was created and the current date and time.

Answer: A

Explanation:

A custom record field that evaluates in real-time and calculates the hours between "createdDateTime" and "resolvedDateTime" ensures the calculated value is available as a sortable field within the read-only grid.

NEW QUESTION # 24

You're developing a user input form for a government services application that includes a file upload component.

If the uploaded file is a multimedia file (for example: .MP4, .MOV or .WAV), the customer wants these uploaded to Microsoft SharePoint instead.

What is the best way to achieve this requirement?

- A. Use the out-of-the-box Appian Connected System as it has a pre-built connected system to SharePoint to provide a guided experience for designers to send and receive data.
- B. Develop a connected system plug-in given SharePoint has an extensive API that cannot easily be resolved using the Appian out-of-the-box Connected System.
- C. Use the out-of-the-box Appian Connected System, but since it does not have any pre-built connected systems, you will need to use either a HTTP or OpenAI Connected System to connect with SharePoint.

Answer: A

Explanation:

Appian provides an out-of-the-box pre-built connected system for SharePoint, allowing you to integrate file uploads to SharePoint with a guided experience for configuration-making this the best way to fulfill the requirement.

NEW QUESTION # 25

You're executing a performance test of the client's application. You notice that server-side resources are at high-to-critical operating levels.

What should you do to troubleshoot this issue?

Note: To answer, move all steps from the Options list to the Answer List area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Validate the test scenario by validating test script behavior matches performance acceptance criteria.

Validate that non-test loads are *not* occurring in the environment during the test, by looking for other users logged in, active processes *not* run by test, et cetera.

Analyze the performance of the application by reviewing system resources, application logs, and process reports.

Validate the test scenario by validating test script behavior matches performance acceptance criteria.

Validate that non-test loads are *not* occurring in the environment during the test, by looking for other users logged in, active processes *not* run by test, et cetera.

Investigate if the system has cascading errors or unexpected process flows.

Investigate if the system has cascading errors or unexpected process flows.

Analyze the performance of the application by reviewing system resources, application logs, and process reports.

Analyze system resources and perform sizing exercise to validate if more resources or configuration changes are required.

Analyze system resources and perform sizing exercise to validate if more resources or configuration changes are required.

NEW QUESTION # 26

......

It is acknowledged that there are numerous ACD201 learning questions for candidates for the exam, however, it is impossible for you to summarize all of the key points in so many materials by yourself. But since you have clicked into this website for ACD201 practice materials you need not to worry about that at all because our company is especially here for you to solve this problem. We have a lot of regular customers for a long-term cooperation now since they have understood how useful and effective our ACD201 Actual Exam is. So will you!
