GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q72-Q77):

NEW QUESTION # 72

How does an organization know that a product built through Scrum is successful? (Choose the best answer)

- A. By measuring the actual time spent on development versus the time estimated for development
- B. By releasing often, and updating key performance indicators (KPIs) on value after every release and feeding this information back into work on the Product Backlog
- C. By the Product Owner and stakeholders accepting the Increment at the Sprint Review
- D. By measuring that velocity has increased since the last release

Answer: B

Explanation:

Success in Scrum is tied to value delivery, not internal metrics. Option B-frequent releases with KPI updates-aligns with Scrum's empirical nature: "Scrum is founded on empiricism and lean thinking." Real-world feedback refines the Product Backlog, ensuring success.

* A:Velocity is an internal capacity metric, not a success indicator.

* C:Time variance is irrelevant to value.

NEW QUESTION # 73

What does it mean to say that an event has a time-box?

- **A. The event can take no more than a maximum amount of time.**
- B. The event must happen at a set time.
- C. The event must take at least a minimum amount of time.
- D. The event must happen by a given time.

Answer: A

Explanation:

In Scrum, a time-box is a maximum duration for an event, ensuring focus and efficiency. The Scrum Guide states: "All events are time-boxed, meaning they have a maximum duration." For example, Sprint Planning is

8 hours max, Daily Scrum is 15 minutes, etc. The event can end earlier if its purpose is achieved, but it cannot exceed the time-box. Option A refers to scheduling, not time-boxing. Option B implies a deadline, not a duration limit. Option C suggests a minimum, which isn't part of the definition. Thus, D is correct.

NEW QUESTION # 74

What is the Product Owner accountable for in Scrum? (Choose the best answer)

- **A. Creating and sustaining a Product Backlog that maximizes value and represents the needs of the stakeholders**
- B. Writing the User Stories so they are understandable to stakeholders
- C. Refining the top-level Product Backlog items until they are ready to be handed over to the Developers
- D. Describing an Increment at the Sprint Planning and making sure that the Developers deliver it by the end of the Sprint

Answer: A

Explanation:

The Product Owner's core accountability is maximizing value through the Product Backlog. The Scrum Guide states: "The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team." Option B encapsulates this fully.

* A:The Developers deliver the Increment; the Product Owner doesn't ensure it.

* C:Refinement is part of management, but not the sole accountability.

NEW QUESTION # 75

Which three purposes does the Definition of "Done" serve? (Choose the best three answers)

- **A. Create a shared understanding of when work is complete.**
- B. Describe the purpose, objective, and time-box of each Scrum event.
- **C. Increase transparency.**
- D. Describe the work that must be done before the Sprint is allowed to end.
- **E. Guide the Developers on how many Product Backlog items to select for the Sprint.**

Answer: A,C,E

Explanation:

The Scrum Guide explains the Definition of "Done" as "a formal description of the state of the Increment when it meets the quality measures required for the product".

* A:It increases transparency by making quality expectations visible to all.

* B:It creates a shared understanding of "complete" across the Scrum Team.

NEW QUESTION # 76

Why would the Product Owner concern themselves with technical debt? (Choose the best answer)

- A. They wouldn't, it is an issue for Developers
- **B. The total cost of ownership (TCO) of the product will be impacted if technical debt is present and grows**
- C. The Scrum Master is responsible for technical debt management

Answer: B

Explanation:

Technical debt affects product value, a Product Owner's core concern. The Scrum Guide doesn't explicitly mention technical debt, but the Product Owner's accountability for "maximizing the value of the product" implies considering factors like TCO, which rises with debt due to rework or maintenance costs.

* A:Correct-debt impacts long-term value and cost.

* B:The Scrum Master facilitates, not manages debt.

NEW QUESTION # 77

.....

At Exam4Tests, we strive hard to offer a comprehensive Certified Agile Scrum Product Owner (CASPO) (CASPO-001) exam questions preparation material bundle pack. The product available at Exam4Tests includes Certified Agile Scrum Product Owner (CASPO) (CASPO-001) real dumps pdf and mock tests (desktop and web-based).
