

Pass Guaranteed Quiz CIPS - L3M6 - Fantastic Socially Responsible Warehousing and Distribution Exams Torrent

P.S. Free & New L3M6 dumps are available on Google Drive shared by Pass4training: <https://drive.google.com/open?id=1ALRXcVZF7yaflrgHhdAdpgHCZhp4fYLC>

Pass4training exam study material is essential for candidates who want to appear for the CIPS L3M6 certification exams and clear it to validate their skill set. This preparation material comes with Up To 1 year OF Free Updates And Free Demos. Place your order now and get Real L3M6 Exam Questions with these offers.

CIPS L3M6 Exam Syllabus Topics:

Topic	Details
Topic 1	Understand the Environmental Impact of Procurement and Supply: This section evaluates the skills of Supply Chain Analysts in understanding how procurement affects the environment. It explores global challenges such as balancing globalization with green logistics, public awareness, external pressures, and international regulations. The environmental impact of transportation and storage is covered, including air pollution, carbon footprint calculations, noise pollution, accidents, and land use. Additionally, it highlights the government's role in promoting sustainability through policies like greener transport modes, energy efficiency, and emission reduction.

Topic 2	• Understand the Concepts of Sustainability and Corporate Social Responsibility (CSR): This section of the exam measures the knowledge of Procurement Specialists and covers the foundational concepts of sustainability and CSR. It explains how sustainability involves meeting present needs without compromising future generations' ability to do the same. The focus extends beyond traditional economic criteria, incorporating environmental and social impacts into procurement decisions. CSR emphasizes extending corporate goals to include social responsibility, promoting good citizenship, and encouraging positive impacts on stakeholders, including social, economic, and cultural diversity.
Topic 3	• Understand Methods for the Storage and Movement of Inventory: This section assesses the expertise of Warehouse Managers in inventory storage and movement methods. It includes principles of warehouse design, focusing on location, layout factors such as flow and space utilization, and flexibility. It also explains various types of warehousing equipment like material handling systems, palletization techniques, packaging standards, and automation technologies that align with environmental standards.
Topic 4	• Understand the Environmental Impact of Warehousing and Distribution: This section targets Logistics Coordinators and examines how warehousing and distribution contribute to environmental challenges. Topics include air pollution, carbon footprint, noise pollution, accidents, land use, and visual intrusion. It also discusses the environmental costs associated with logistics activities such as greenhouse gas emissions and global warming and strategies to mitigate these impacts. The role of government policies in sustainable logistics is emphasized, including reducing freight intensity, improving utilization rates, promoting greener transport modes, enhancing energy efficiency, and cutting emissions.

L3M6 Latest Test Vce, Real L3M6 Exam Dumps

It never needs an internet connection. Pass4training's Socially Responsible Warehousing and Distribution practice exam software has several mock exams, designed just like the real exam. CIPS L3M6 practice exam software contains all the important questions which have a greater chance of appearing in the final exam. Pass4training always tries to ensure that you are provided with the most updated Socially Responsible Warehousing and Distribution (L3M6) Exam Questions to pass the exam on the first attempt.

CIPS Socially Responsible Warehousing and Distribution Sample Questions (Q147-Q152):

NEW QUESTION # 147

What are environmental pressure groups also known as?

- A. Green Activists
- B. Yellow Activists
- C. White Activists
- D. Blue Activists

Answer: A

Explanation:

Environmental pressure groups are commonly called Green Activists, reflecting their focus on ecological protection ("green" symbolizing nature). The CIPS L3M6 module uses this term to describe groups like Greenpeace, distinguishing them from unrelated activist types (e.g., "blue" might imply water-focused, but isn't standard). This aligns with LO2's emphasis on external influencers of environmental sustainability.

Reference:

NEW QUESTION # 148

Slotting or profiling identifies the least efficient placement for each item in a warehouse.

- A. TRUE

- **B. FALSE**

Answer: B

Explanation:

Slotting or profiling identifies the most efficient placement for items based on factors like demand and accessibility, not the least efficient. The CIPS L3M6 syllabus defines slotting as an optimization technique, making this statement false.

Reference:

NEW QUESTION # 149

An exceptionally low base price could indicate poor working conditions further down the supply chain and could result in lower quality.

- **A. TRUE**
- B. FALSE

Answer: A

Explanation:

An exceptionally low base price often signals cost-cutting measures in the supply chain, which can include poor working conditions (e.g., low wages, unsafe environments) and compromises on quality (e.g., substandard materials). The CIPS L3M6 module highlights that sustainable procurement involves assessing such risks, as low prices may reflect unethical practices that contradict CSR principles. This can lead to reputational damage and legal liabilities for organizations.

Reference:

NEW QUESTION # 150

The Greenhouse Gas Protocol is the most common standard for calculating emissions. What are the category scopes that can be used? Select all that apply.

- A. Indirect emissions from the purchase of electricity, steam, heat, and cooling
- B. Direct emissions from purchased goods and services
- C. Indirect emissions from activities outside an organization's own operations, for example, contracted transport
- **D. All the above**

Answer: D

Explanation:

(Corrected, see explanation)

The GHG Protocol's scopes are:

* Scope 1: Direct emissions (e.g., company vehicles), not purchased goods/services (A is misworded; likely meant Scope 3).

* Scope 2: Indirect emissions from purchased energy (C).

* Scope 3: Indirect value chain emissions (B, and correctly A if rephrased).

The CIPS L3M6 module includes all scopes in LO2, but A's wording suggests Scope 3 intent. Assuming correction, all apply.

Reference:

NEW QUESTION # 151

Which of the following warehouse and store impacts on the environment would you be considering with the 'taking of land' from suburban areas to be used for warehousing?

- A. Vibration
- **B. Land take**
- C. Visual intrusion
- D. Accidents/risks
- E. Noise pollution

Answer: B

Explanation:

Land take (B) refers to converting suburban or natural land for warehousing, an environmental impact highlighted in the CIPS L3M6 syllabus. Accidents/risks (A), noise pollution (C), vibration (D), and visual intrusion (E) are distinct impacts unrelated to land use. CSR monitoring assesses land take to minimize habitat loss.
