So you can also trust the top standard of SureTorrent 200-201 exam dumps and start 200-201 practice questions preparation without wasting further time.

Cisco Understanding Cisco Cybersecurity Operations Fundamentals Sample Questions (Q10-Q15):

NEW QUESTION # 10

Which attack represents the evasion technique of resource exhaustion?

- A. SQL injection
- B. denial-of-service
- C. man-in-the-middle
- D. bluesnarfing

Answer: B

Explanation:

A denial-of-service attack represents the evasion technique of resource exhaustion, where the attacker overwhelms a system's resources, making the system unusable and unable to handle legitimate requests. Reference:= Cisco Cybersecurity Source Documents

NEW QUESTION # 11

What is the difference between the ACK flag and the RST flag in the NetFlow log session?

- A. The ACK flag confirms the beginning of the TCP connection, and the RST flag responds when the data for the payload is complete
- B. The RST flag confirms the receipt of the prior segment, and the ACK flag allows for the spontaneous termination of a connection
- C. The RST flag confirms the beginning of the TCP connection, and the ACK flag responds when the data for the payload is complete
- D. The ACK flag confirms the receipt of the prior segment, and the RST flag allows for the spontaneous termination of a connection

Answer: D

Explanation:

In NetFlow log sessions within TCP connections; ACK flag is used for acknowledging that data has been successfully received while RST flag is used when there's an error or when closing a connection spontaneously without following standard procedures. References := Cisco Cybersecurity source documents or study guide

Which application protocol is in this PCAP file?

- A. SSH
- **B. TCP**
- C. HTTP
- D. TLS

Answer: B

NEW QUESTION # 13

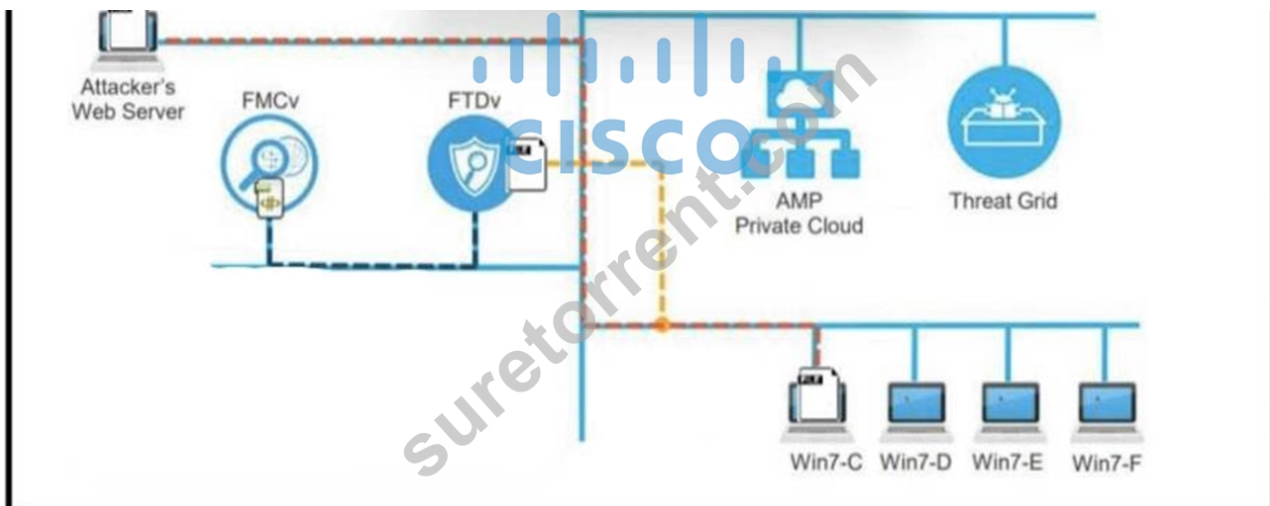

An investigator is examining a copy of an ISO file that is stored in CDFS format. What type of evidence is this file?

- A. data from a CD copied using Mac-based system
- B. data from a CD copied using Windows
- **C. data from a CD copied using Linux system**
- D. data from a DVD copied using Windows system

Answer: C

NEW QUESTION # 14

Refer to the exhibit.

A workstation downloads a malicious docx file from the Internet and a copy is sent to FTDv. The FTDv sends the file hash to FMC and the tile event is recorded what would have occurred with stronger data visibility.

- A. The traffic would have been monitored at any segment in the network.
- B. An extra level of security would have been in place
- C. Malicious traffic would have been blocked on multiple devices
- D. Detailed information about the data in real time would have been provided

Answer: D

Explanation:

With stronger data visibility, detailed information about the data in real-time is provided. This enhanced visibility allows for a more comprehensive analysis of network traffic, enabling security professionals to identify and mitigate threats more effectively. Reference
= Cisco Cybersecurity Operations Fundamentals

NEW QUESTION # 15

.....
