Free PDF High Hit-Rate MSSC - CLT Free Brain Dumps

Only if you download our software and practice no more than 30 hours will you attend your test confidently. Because our CLT exam torrent can simulate limited-timed examination and online error correcting, it just takes less time and energy for you to prepare the CLT exam than other study materials. It is very economical that you just spend 20 or 30 hours then you have the CLT certificate in your hand, which is typically beneficial for your career in the future. Therefore, purchasing the CLT guide torrent is the best and wisest choice for you to prepare your test.

MSSC Certified Logistics Technician (CLT) 4.0 Sample Questions (Q31-Q36):

NEW QUESTION # 31

The document prepared by the shipper and signed by the consignee when the freight is received at its destination is called a

- A. Carrier Requisition
- B. Packing List
- C. Bill of Lading
- D. Purchase Order

Answer: C

Explanation:

The Bill of Lading serves as the central contract of carriage between shipper and carrier, as defined in the CLT "Dispatch and Tracking" module. It documents shipment details-such as shipper, consignee, commodity, weight, and handling instructions-and must

be signed upon receipt. The consignee's signature confirms acceptance, completing the shipment lifecycle. It simultaneously acts as a receipt for goods, evidence of a contract, and a title document. The packing list itemizes contents; the purchase order initiates procurement; the carrier requisition is not an official transport form. Thus, the Bill of Lading uniquely meets all required delivery confirmation criteria.

NEW QUESTION # 32

Which system is used to document the activities and locations of trailers or containers?

- A. Yard Management System (YMS)
- B. Inventory Management System (IMS)
- C. Enterprise Resource Planning (ERP)
- D. Material Requirements Planning (MRP) Software

Answer: A

Explanation:

A Yard Management System (YMS) is a logistics tool used to manage the movement, location, and status of trailers and containers within a distribution center's yard. CLT 4.0 describes YMS as an extension of warehouse management, providing real-time visibility into trailer positions, load status, and dock assignments. It coordinates yard jockey movements and reduces congestion, dwell time, and detention fees. Unlike an IMS or ERP-which manage inventory or enterprise data-YMS specifically enhances outbound/inbound trailer efficiency. It often integrates with WMS (Warehouse Management System) and TMS (Transportation Management System) for seamless dock scheduling and carrier communication.

NEW QUESTION # 33

An outbound order must be checked for all of the following EXCEPT

- A. customer address
- B. item and count accuracy
- C. damaged condition
- D. correct dock for loading

Answer: D

Explanation:

In the MSSC Certified Logistics Technician (CLT 4.0) standards, the final inspection of an outbound order focuses on product condition, item accuracy, and shipping documentation. Before an order leaves the facility, warehouse staff must confirm that all items are in good condition (free from visible damage), the counts match the packing list or manifest, and that the customer address and shipping labels are accurate. These checks ensure that shipments meet quality expectations and reduce costly returns or claims. However, confirming the correct dock for loading is a facility-level logistics coordination task, not part of the order verification process. Dock assignment is typically controlled by dispatch or the warehouse management system (WMS) to optimize carrier scheduling and loading efficiency. The CLT curriculum distinguishes between quality assurance tasks (verifying accuracy, packaging, and labeling) and logistical operations (assigning docks, sequencing trailers). Therefore, verifying the correct dock is not a required outbound order check, making option D the correct answer.

This aligns with CLT's Packaging and Shipment and Dispatch and Tracking key activities, which emphasize product verification, documentation accuracy, and load integrity before release-not dock allocation management.

NEW QUESTION # 34

Which document does NOT contain the weight of goods for preparation of loading a trailer or container?

- A. Packing List
- B. Trucker Receipt
- C. Delivery Receipt
- D. Manifest

Answer: C

Explanation:

The Delivery Receipt is primarily used to acknowledge that the consignee has received the shipment in good condition, noting

exceptions such as damage or shortage. Unlike manifests or packing lists, it does not normally include the specific weight of goods. CLT 4.0 notes that documents such as the manifest, bill of lading, or packing list are used in load planning and verification, as they include cargo weights and cubic measurements necessary for balancing, equipment selection, and safety compliance. The delivery receipt focuses on the "proof of delivery" function within final-mile operations, forming part of the carrier's record of completed service. Proper documentation flow between warehouse, carrier, and consignee ensures accountability and accuracy at every handoff point in the logistics chain.

NEW QUESTION # 35

A substance or material that is capable of posing an unreasonable risk to health, safety, and property when transported in commerce is

- A. HAZCOM
- **B. HAZMAT**
- C. dangerous goods
- D. PHMSA

Answer: B

Explanation:

CLT uses the U.S. term "hazardous material (HAZMAT)" for substances posing unreasonable risks in transportation; internationally the term "dangerous goods" is common. PHMSA is the regulating agency within USDOT, and HAZCOM refers to OSHA's Hazard Communication standard, not the material itself. Thus, the definition aligns with HAZMAT.
