

Pass Guaranteed Quiz FCSS_SDW_AR-7.4 - FCSS - SD-WAN 7.4 Architect–Professional Exam Dumps Collection

BTW, DOWNLOAD part of Pass4SureQuiz FCSS_SDW_AR-7.4 dumps from Cloud Storage: https://drive.google.com/open?id=1Zy5dAwhDznp_dMsuZVXufltPonvh4xaV

Our FCSS_SDW_AR-7.4 training guide is not difficult for you. We have simplified all difficult knowledge. So you will enjoy learning our FCSS_SDW_AR-7.4 study quiz. During your practice of our FCSS_SDW_AR-7.4 exam materials, you will find that it is easy to make changes. In addition, our study materials will boost your confidence. You will be glad to witness your growth. Do not hesitate. Good opportunities will slip away if you stand still.

Fortinet FCSS_SDW_AR-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Configure Performances SLAs: Designed for network administrators, this part focuses on setting up performance Service Level Agreements (SLAs) within SD-WAN environments. Candidates must show proficiency in defining criteria to monitor and maintain network performance and reliability.
Topic 2	<ul style="list-style-type: none">SD-WAN Troubleshooting: This part assesses the troubleshooting skills of network support specialists. Candidates should be able to diagnose and resolve issues related to SD-WAN rules, session behaviors, routing inconsistencies, and ADVPN connectivity problems to maintain seamless network operations.
Topic 3	<ul style="list-style-type: none">SD-WAN Configuration: This section of the exam measures the skills of network engineers and covers configuring a basic SD-WAN setup. Candidates are expected to demonstrate their ability to define SD-WAN members and zones effectively, ensuring foundational network segmentation and management.
Topic 4	<ul style="list-style-type: none">Centralized Management: This domain evaluates network administrators' competence in deploying and managing SD-WAN configurations centrally using FortiManager. It includes tasks such as implementing branch configurations and utilizing overlay templates to streamline network management.

FCSS_SDW_AR-7.4 Exam Reference, Reliable FCSS_SDW_AR-7.4 Exam Price

Once you have used our FCSS_SDW_AR-7.4 exam training in a network environment, you no longer need an internet connection the next time you use it, and you can choose to use FCSS_SDW_AR-7.4 exam training at your own right. Our FCSS_SDW_AR-7.4 Exam Training do not limit the equipment, do not worry about the network, this will reduce you many learning obstacles, as long as you want to use FCSS_SDW_AR-7.4 test guide, you can enter the learning state.

Fortinet FCSS - SD-WAN 7.4 Architect Sample Questions (Q28-Q33):

NEW QUESTION # 28

What are three key routing principles of SD-WAN? (Choose three.)

- A. SD-WAN rules are skipped if the best route to the destination is a static route
- B. SD-WAN rules are skipped if the best route to the destination is not an SD-WAN member.
- C. Directly connected routes have precedence over SD-WAN rules.
- D. SD-WAN members are skipped if they do not have a valid route to the destination.
- E. Policy routes have precedence over SD-WAN rules.

Answer: B,D,E

Explanation:

SD-WAN members without a valid route to the destination are skipped during path selection.

If the best route is not via an SD-WAN member, SD-WAN rules are skipped.

Policy routes take precedence over SD-WAN rules in the routing decision process.

NEW QUESTION # 29

Refer to the exhibit. An administrator configures SD-WAN rules for a DIA setup using the FortiGate GUI. The page to configure the source and destination part of the rule looks as shown in the exhibit. The GUI page shows no option to configure an application as the destination of the SD-WAN rule Why?

The screenshot shows the 'Priority Rule' configuration page in the FortiGate GUI. The 'Source' section has 'Address' and 'User group' fields. The 'Destination' section has 'Address' and 'Internet service' fields. The 'Outgoing Interfaces' section is at the bottom. A watermark 'pass4surequiz.com' is overlaid on the image.

- A. You must enable the feature on the CLI.
- B. You must enable the feature first using the GUI menu System > Feature Visibility.
- C. FortiGate allows the configuration of applications as the destination of SD-WAN rules only on the CLI.
- D. You cannot use applications as the destination when FortiGate is used for a DIA setup.

Answer: B

Explanation:

To configure applications as destinations in SD-WAN rules via the GUI, the Application Control feature must be enabled in System > Feature Visibility. Once enabled, the GUI displays the application-based options.

NEW QUESTION # 30

When you use the command `diagnose sys session list`, how do you identify the sessions that correspond to traffic steered according to SD-WAN rules?

- A. You identify sessions steered according to SD-WAN rules with the data `vw1_mbr_seq`.
- B. You cannot identify SD-WAN sessions. You must use the `sdwar. session` filter.
- C. You identify sessions steered according to SD-WAN rules with the flag `vw1`.
- D. You identify sessions steered according to SD-WAN rules with the data `sdwan_service_id`.

Answer: D

NEW QUESTION # 31

You are planning a large SD-WAN deployment with approximately 1000 spokes and want to allow ADVPN between the spokes. Some remote sites use FortiSASE to connect to the company's SD-WAN hub. Which overlay routing configuration should you use?

- A. BGP per overlay with BGP next-hop convergence for ADVPN shortcut routing.
- B. BGP per overlay with dynamic BGP for ADVPN shortcut routing.
- C. BGP on loopback with IPsec phase2 selectors for ADVPN shortcut routing.
- D. BGP on loopback with dynamic BGP for ADVPN shortcut routing.

Answer: D

Explanation:

For a large-scale SD-WAN deployment (such as 1000 spokes) where ADVPN shortcut routing is required and some remote sites connect via FortiSASE, the recommended overlay routing configuration is BGP running on loopback interfaces, combined with dynamic BGP for ADVPN shortcut routing. This design leverages the scalability and resilience of BGP, allowing dynamic discovery and route exchange necessary for shortcut tunnels between spokes in ADVPN environments. Using loopback interfaces for BGP peering is considered best practice because it decouples routing protocol stability from physical link status, ensuring that if a physical underlay interface fails, the BGP session remains up as long as there's an alternate path. With dynamic BGP, each spoke can efficiently learn the routes to other spokes and dynamically establish shortcuts, which is critical at this scale. This method also integrates smoothly with FortiSASE for remote connectivity to the SD-WAN hub, providing flexibility and centralized management.

NEW QUESTION # 32

Refer to the exhibits.

Interface details

FORTINET®

Name	Type	Members	IP/Netmask
Physical Interface 13			
port1	Physical Interface		192.2.0.1/255.255.255.248
port2	Physical Interface		192.2.0.9/255.255.255.248
port3	Physical Interface		0.0.0.0/0.0.0.0
port4	Physical Interface		172.16.0.1/255.255.255.248
port5	Physical Interface		10.0.1.254/255.255.255.0
port6	Physical Interface		0.0.0.0/0.0.0.0
port7	Physical Interface		0.0.0.0/0.0.0.0
port8	Physical Interface		0.0.0.0/0.0.0.0
port9	Physical Interface		0.0.0.0/0.0.0.0
port10	Physical Interface		192.168.0.31/255.255.255.0
T_shop_1(port9)	Physical interface		0.0.0.0/0.0.0.0
SD-WAN Zone 3			
HUB1	SD-WAN Zone	HUB1-VPN1 HUB1-VPN2 HUB1-VPN3	0.0.0.0/0.0.0.0
Test	SD-WAN Zone	port2	0.0.0.0/0.0.0.0
virtual-wan-link	SD-WAN Zone		0.0.0.0/0.0.0.0

Static route details

Destination	Gateway IP	Interface	Status
192.168.1.0/24	192.2.0.254	port1	Enabled
168.1.1.0/24	192.2.0.4	port1	Enabled

Firewall policies on managed FortiGate

Policy	From	To	Source	Destination	Service
<input type="checkbox"/> Corp(5)	port1	port5	4 Corp-net	4 LAN-net	HTTP HTTPS
<input type="checkbox"/> DIA(1)	port5	port1	4 LAN-net	4 all	ALL

The interface details, static route configuration, and firewall policies on the managed FortiGate device are shown. You want to configure a new SD-WAN zone, named Underlay, that contains the interfaces port1 and port2. What must be your first action?

- A. Define port1 as an SD-WAN member.
- B. Delete the firewall policies.

- C. Delete the SD-WAN Zone Test.
- **D. Delete the static routes.**

Answer: D

Explanation:

In the exhibits, port2 is already assigned to the SD-WAN zone named Test. An interface can only belong to a single SD-WAN zone, so before you can add both port1 and port2 into the new SD-WAN zone Underlay, you must first delete the SD-WAN Zone Test to free port2.

NEW QUESTION # 33
