

# Pass Guaranteed Quiz High-quality Oracle - 1z0-076 Official Practice Test

**Oracle 1Z0-076  
Exam Prep  
Made Easy:  
The Benefits  
of Using  
Practice Tests**

BONUS!!! Download part of Real4exams 1z0-076 dumps for free: <https://drive.google.com/open?id=1oLyHrgte0IGaKv1EFha-q2CdVBv54PiD>

We guarantee that you can pass the exam at one time even within one week based on practicing our 1z0-076 exam materials regularly. 98 to 100 percent of former exam candidates have achieved their success by the help of our 1z0-076 Practice Questions. And we have been treated as the best friend as our 1z0-076 training guide can really help and change the condition which our loyal customers are in and give them a better future.

The second step: fill in with your email and make sure it is correct, because we send our Oracle Database 19c: Data Guard Administration learn tool to you through the email. Later, if there is an update, our system will automatically send you the latest Oracle Database 19c: Data Guard Administration version. At the same time, choose the appropriate payment method, such as SWREG, DHPay, etc. Next, enter the payment page, it is noteworthy that we only support credit card payment, do not support debit card. Generally, the system will send the 1z0-076 Certification material to your mailbox within 10 minutes. If you don't receive it please contact our after-sale service timely.

## Interactive 1z0-076 Course | 1z0-076 Exam Torrent

Our test engine has been introduced for the preparation of 1z0-076 practice test and bring great convenience for most IT workers. It will make you feel the atmosphere of the 1z0-076 actual test and remark the mistakes when you practice the exam questions. We strongly recommend that you should prepare your 1z0-076 Exam PDF with our test engine before taking real exam.

## Oracle 1z0-076 Exam Syllabus Topics:

Topic	Details
Topic 3	<ul style="list-style-type: none"><li>Using Oracle Active Data Guard: Supported Workloads in Read-Only Standby Databases: Here, the usage of physical standby databases for real-time queries is discussed.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Creating a Data Guard Broker Configuration: This section delves into the practical aspects of creating and managing a Data Guard broker configuration, including command-line and Enterprise Manager approaches.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Oracle Data Guard Broker Basics: An overview of the Data Guard broker, its architecture, components, benefits, and configurations, is provided here. It serves as an introduction to the tool used for managing Data Guard configurations.</li></ul>

Topic 6	<ul style="list-style-type: none"> <li>Performing Role Transitions: Here, the concept of database roles is explained, along with the steps for performing switchovers, failovers, and maintaining physical standby sessions during role transitions.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Managing Oracle Net Services in a Data Guard Environment: The section focuses on Oracle Net Services and its role in Data Guard networking setup.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Backup and Recovery Considerations in an Oracle Data Guard Configuration: In this topic, Backup and recovery procedures in a Data Guard configuration are discussed, including RMAN backups, offloading to physical standby, and network-based recovery.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>Using Flashback Database in a Data Guard Configuration: This topic covers the configuration and advantages of using Flashback Database in a Data Guard setup, as well as the process of enabling fast-start failover for seamless role changes.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>Oracle Data Guard Basics: This topic covers the essential architecture and concepts of Oracle Data Guard. It includes sub-topics such as the physical and logical standby database comparison, benefits of Data Guard, and its integration with multi-tenant databases.</li> </ul>

## Oracle Database 19c: Data Guard Administration Sample Questions (Q81-Q86):

### NEW QUESTION # 81

Which two are prerequisites for configuring Transaction Guard in a Data Guard environment?

- A. Ensure that connection descriptors for database clients use the failover clause with the COMMIT\_OUTCOME parameter set to TRUE.
- B. Set INSTANCE\_NAME identically on all the Data Guard Configuration databases and modify the local service name on the client to include a CONNECTION\_LIST containing all the standby hosts.
- C. Grant execute permission on the DBMS\_APP\_CONT package to relevant database schema owners.
- D. Create a database service with COMMIT\_OUTCOME set to TRUE and ensure that the service is statically registered with the default listener on the primary host.
- E. Create a database service with COMMIT\_OUTCOME set to TRUE, and ensure clients use that service to connect to the database instance.

**Answer: C,E**

### NEW QUESTION # 82

Which two are prerequisites for configuring flashback database for Oracle 19c databases, in a Data Guard environment?

- A. The database must be in ARCHIVELOG mode.
- B. A far sync instance must be configured to flash back a standby when the primary has been flashed back.
- C. A fast recovery area must be configured.
- D. The Data Guard real-time apply feature must be enabled.
- E. The data guard broker must be used.

**Answer: A,C**

Explanation:

\* A fast recovery area must be configured (B): Flashback Database requires a fast recovery area to be set up because flashback logs are stored there. The fast recovery area is a unified storage location for all recovery-related files and activities.

\* The database must be in ARCHIVELOG mode (C): Flashback Database operation relies on the ability to archive redo logs. Therefore, the database must be running in ARCHIVELOG mode for Flashback Database to be enabled.

### NEW QUESTION # 83

A customer asks you to propose the most appropriate solution for this set of requirements:

We need a disaster recovery solution that enables us to fail over from our production database with zero data loss.

We want to generate reports from the proposed standby database at the same time that it is used for data protection.

Developers may need to test occasionally on a copy of the live database Which TWO solutions would you recommend?

- A. A logical standby database with real-time query enabled
- B. A physical standby database with real-time query enabled
- C. A physical standby database with real-time apply enabled
- D. A logical standby database with real-time apply enabled
- E. A snapshot standby database with synchronous redo transport

**Answer: A,B**

### NEW QUESTION # 84

You detected an unrecoverable archive gap in your data guard environment. So, you need to roll standby.

forward in time without applying a large number of archive log files using this command:

`RMAN> RECOVER STANDBY DATABASE FROM SERVICE-<primary database name>;`

When running this command, which of the following steps can be performed automatically?

1. Remember all data file names on the standby.
2. Restart standby in nomount.
3. Restore controlfile from primary.
4. Mount standby database.
5. Rename data files from stored standby names.
6. Restore new data files to new names.
7. Recover standby.

- A. 1,2,3,4,5,6,7
- B. 1, 2,3,4,6,7
- C. 2,3,5,6,7
- D. 1,3,5,6,7
- E. 2,3,6,7

**Answer: B**

Explanation:

The RECOVER STANDBY DATABASE FROM SERVICE command in RMAN is designed to automate various steps required to recover the standby database, especially when dealing with an archive gap. When this command is executed, the following actions can occur automatically:

Remember all data file names on the standby (1): RMAN has the capability to recall the names and paths of all data files associated with the standby database.

Restart standby in nomount (2): The standby database can be automatically restarted in the NOMOUNT state, allowing recovery operations to proceed without the database being open.

Restore controlfile from primary (3): RMAN can restore the control file from the primary database to the standby system, ensuring that the standby has the most up-to-date control file.

Mount standby database (4): After restoring the control file, the standby database is mounted to prepare for data file recovery.

Rename data files from stored standby names (5): Not typically done automatically by this command.

Restore new data files to new names (6): New data files added to the primary since the last synchronization can be restored to the standby with their correct names.

Recover standby (7): Finally, RMAN will apply any necessary redo logs to bring the standby database up to date with the primary.

While some steps, such as renaming data files (5), typically require manual intervention or scripting, most of the recovery process can be handled by RMAN automatically, streamlining the recovery of the standby database.

### NEW QUESTION # 85

Active Data Guard (ADG) databases are widely used to offload reporting or ad hoc query-only jobs from the primary database.

Reporting workload profile is different from the primary database and often requires tuning.

Which tool is used to tune SQL workloads running on an ADG database?

- A. Automatic Workload Repository (AWR)
- B. SQL Tuning Advisor
- C. Automatic Diagnostic Database Monitor (ADDM)
- D. Standby Statspack
- E. In-Memory Active Session History (ASH)

**Answer: A**

Explanation:

AWR collects, processes, and maintains performance statistics for problem detection and self-tuning purposes. In an Active Data Guard environment, where the physical standby database can be used for read-only workloads, AWR can be instrumental in identifying performance bottlenecks and areas for optimization. It provides detailed reports that include wait events, time model statistics, and active session history, making it an invaluable tool for tuning SQL queries and overall database performance in an ADG setup.

## NEW QUESTION # 86

.....

After so many years' development, our 1z0-076 exam torrent is absolutely the most excellent than other competitors, the content of it is more complete, the language of it is more simply. Once you use our 1z0-076 latest dumps, you will save a lot of time. High effectiveness is our great advantage. After twenty to thirty hours' practice, you are ready to take the real 1z0-076 Exam Torrent. The results will never let you down. You just need to wait for obtaining the certificate.
