CompTIA N10-007 Questions Answers, New N10-007 Test Objectives

You can avail all the above-mentioned characteristics of the desktop software in this web-based CompTIA N10-007 practice test. While you appear in the CompTIA N10-007 real examination, you will feel the same environment you faced during our CompTIA N10-007 practice test.

CompTIA Network+ Certification Exam Sample Questions (Q229-Q234):

NEW QUESTION # 229

Users are reporting issues with slow connection speeds and a loss of connectivity on the newly installed wireless network. The issues are intermittent but seem to occur most often around midday.

Which of the following is the MOST likely cause?

- A. The DNS cache on the users' computers has become corrupt
- B. The signal coverage area is too small
- C. There is interference from small appliances
- D. Not enough DHCP addresses have been allotted

Answer: D

NEW QUESTION # 230

A user snapped the retention tab off of a network cable. Which of the following tools would Jeff, a technician, use to replace the RJ-45 connector?

- A. Punch down
- **B. Crimper**
- C. Multimeter
- D. Wire tester

Answer: B

NEW QUESTION # 231

A single PRI can deliver multiple voice calls simultaneously using which of the following Layer 1 technologies?

- A. Analog circuit switching
- **B. Time division multiplexing**
- C. Time division spread spectrum
- D. CSMA/CD

Answer: B

NEW QUESTION # 232

Multiple users are reporting that they are unable to access the network. The ENTIRE network is shown in the diagram. PCs are not statically assigned IP addresses. The following devices will display settings:

WorkstationA

☐ WorkstationB

☐ WorkstationC

☐ WorkstationD

☐ WorkstationE

☐ WorkstationF

☐ WorkstationG

☐ Laptop1

☐ Laptop2

☐ DHCP server1

☐ DHCP server2

Review the settings and select the box in the diagram that identifies the device causing the issue. Only one device can be selected at a time.

After checking the device that is causing the issue, select the second tab in the lower left hand corner.

Identify the reason as to why some users are unable to access the network.

Instructions:

When the simulation is complete, select the Done button to submit.
