Free PDF Quiz 300-410 - Implementing Cisco Enterprise Advanced Routing and Services –Valid Valid Test Test

With only one Cisco 300-410 exam you can do this job nicely and easily. To do this just enroll in the Cisco 300-410 certification exam and download the updated and real Cisco 300-410 Exam now and start this journey today. We are quite confident that with 300-410 exam dumps you can pass the upcoming Implementing Cisco Enterprise Advanced Routing and Services exam in the first attempt.

Deeper Look into Reliable Resources to Pass Cisco 300-410 Exam

While passing 300-410 exam and earning associated certification will prove a turning point for a Cisco professional, tasting success is never that easy as such an exam is rather extensive. This is where reliable study materials or resources come into play. With their help, test-takers can easily get a better hold over exam topics and come up with flying colors in the main test. So, here is a deeper outline of some of the verified and trustworthy study resources that will help you in this venture:

- **Join Training**

The Cisco 300-410 exam is a mixed bag that testifies both the contextual and practical skills of candidates. A precisely designed training course makes the journey ahead easier than ever. In all, the vendor offers a well-designed training course named Implementing Cisco Enterprise Advanced Routing and Services (ENARSI) v1.0. If there is any way to have a better hold over skills required to pass the Cisco 300-410 test and earn the associated certification, then it is going for this training

option. It is concluded that this training imparts the best of understanding about installing, configuring, and operating enterprise networks. The entire set of routing and infrastructure technologies are covered well in this tutorial. As a rule, the course is available via three to deliver modes:

- Instructor-led training mode: 5 days of classroom training along with hands-on lab practice sessions;
- Virtual instructor-led type: 5 days of internet-based classroom training along with hands-on lab practice sessions that can be accessed from anywhere;
- E-learning: 5 days of e-learning training along with hands-on lab practice sessions.

Along with assisting a candidate to take up 300-410, this training course earns you 40 CE credits towards recertification.

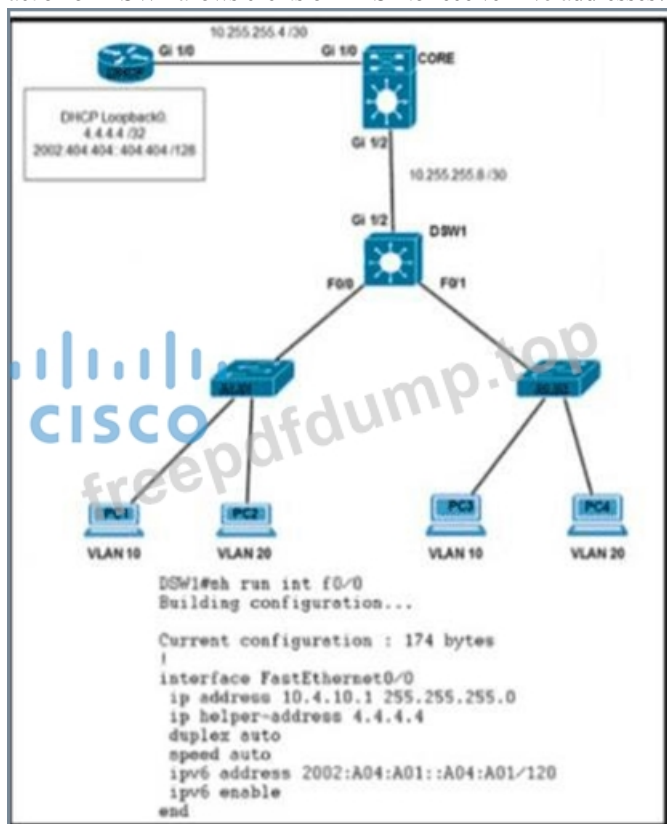

• Refer to Official Guide for 300-410 Test

A Cisco 300-410 aspirant needs to have reliable study material to understand what is covered in the final exam. We would suggest that you pick the CCNP Enterprise Advanced Routing 300-410 Official Cert Guide exam guide, written by Brad Edgeworth & Raymond Lacoste and covers all the exam-relevant information. This Official Cert Guide by the Cisco Press is a wise choice on this front as it is published by the vendor itself. Being a vendor-monitored study material, it contains only verified and trusted information. Referring to this book for preparation allows a test-taker to enjoy the privilege of getting an authoritative understanding of the exam topics and impeccable hands-on knowledge as it contains practical examples of covered skills. Then, there are some tasks given at the end of every chapter. In particular, these tasks put the learned understanding for the main test then and there and help candidates to find out areas of improvement. This way, such a guide not only makes the conceptual part of a technology/tool clear but also explains how to implement those tools/technologies. All in all, it is available as a hard-book and eBook and can be purchased on the Cisco Press or Amazon.

Cisco Implementing Cisco Enterprise Advanced Routing and Services Sample Questions (Q451-Q456):

NEW QUESTION # 451

Clients on ALS2 receive IPv4 and IPv6 addresses but clients on ALS1 receive only IPv4 addresses and not IPv6 addresses. Which action on DSW1 allows clients on ALS1 to receive IPv6 addresses?

- A. Option C
- B. Configure DSW1(config-if)#ipv6 helper address 2002:404:404::404:404
- C. Option B
- D. Option B

- E. Configure DSW1(config-if)#ipv6 dhcp relay destination 2002:404:404::404:404 GigabitEthernet1/2
- F. Option A
- **G. Configure DSW1(dhcp-config)#default-router 2002:A04:A01::A04:A01**
- H. Configure DSW1(config)#ipv6 route 2002:404:404:404:404/128 FastEthernet1/0

Answer: G

Explanation:

<https://community.cisco.com/t5/networking-documents/stateful-dhcpv6-relay-configuration-example/ta-p/3149338>

NEW QUESTION # 452

Refer to the exhibit.

```
Global RADIUS shared secret:*****
retransmission count:5
timeout value:10
following RADIUS servers are configured:
  myradius.cisco.users.com:
    available for authentication on port:1814
    available for accounting on port:1813
  10.1.1.1:
    available for authentication on port:1814
    available for accounting on port:1813
    RADIUS shared secret:*****
  10.2.2.3:
    available for authentication on port:1814
    available for accounting on port:1813
    RADIUS shared secret:*****
```

AAA server 10.1.1.1 is configured with the default authentication and accounting settings, but the switch cannot communicate with the server Which action resolves this issue?

- **A. Match the authentication port**
- B. Correct the shared secret.
- C. Match the accounting port
- D. Correct the timeout value.

Answer: A

Explanation:

Explanation

Command Default

Accounting port: 1813

Authentication port: 1812

Accounting: enabled

Authentication: enabled

Retransmission count: 1

Idle-time: 0

Server monitoring: disabled

Timeout: 5 seconds

Test username: test

Test password: test

Reference:

https://www.cisco.com/c/m/en_us/techdoc/dc/reference/cli/n5k/commands/radius-server-host.html By default, RADIUS uses UDP port 1812 for authentication and port 1813 for accounting. In the exhibit above we see port 1814 is being used for authentication to AAA server at 10.1.1.1 which is not the default port so we must adjust the authentication port to the default value 1812.

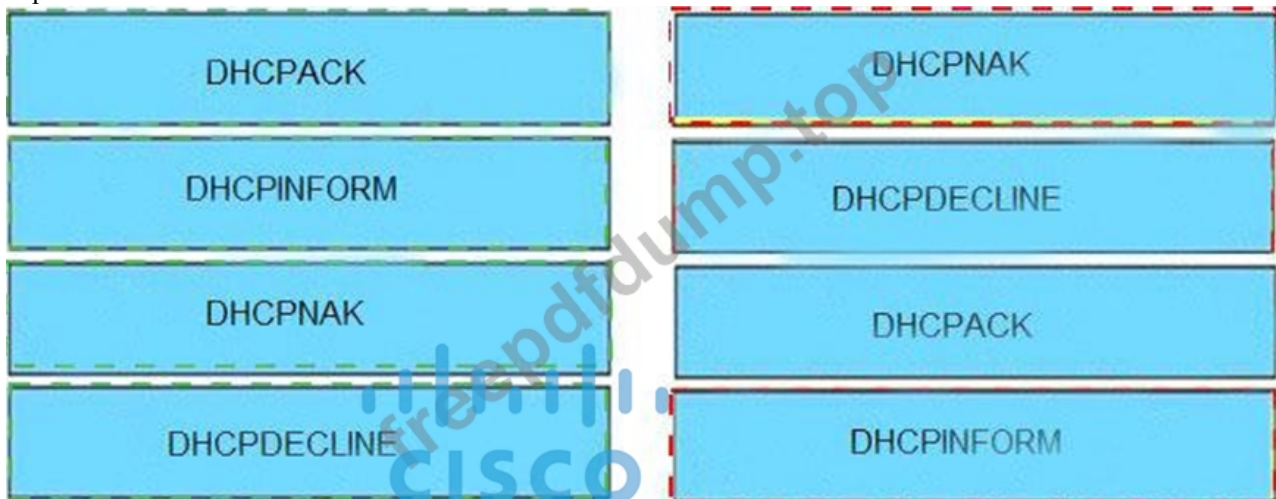

NEW QUESTION # 453

Drag and drop the DHCP messages from the left onto the correct uses on the right.

DHCPACK	server-to-client communication, refusing the request for configuration parameters
DHCPINFORM	client-to-server communication, indicating that the network address is already in use
DHCPNAK	server-to-client communication with configuration parameters, including committed network address
DHCPDECLINE	client-to-server communication, asking for only local configuration parameters that the client has already externally configured as an address

Answer:

Explanation:

Explanation

DHCPACK

The server-to-client communication with configuration parameters, including committed network address.

DHCPINFORM

The client-to-server communication, asking for only local configuration parameters that the client already has externally configured as an address.

DHCPNAK

The server-to-client communication, refusing the request for configuration parameter.

DHCPDECLINE

The client-to-server communication, indicating that the network address is already in use

NEW QUESTION # 454

Drag and Drop the IPv6 First-Hop Security features from the left onto the definitions on the right.

IPv6 DHCPv6 Guard	Block a malicious host and permit the router from a legitimate router.
IPv6 Binding Table	Block reply and advertisement messages from unauthorized DHCP servers and relay agents.
IPv6 Source Guard	Create a binding table that is based on NS and NA messages.
IPv6 RA Guard	Filter inbound traffic on Layer 2 switch ports that are not in the IPv6 binding table.
IPv6 ND Inspection	Create IPv6 neighbors connected to the device from information sources such as NDP snooping.

Answer:

Explanation:

IPv6 DHCPv6 Guard	IPv6 RA Guard
IPv6 Binding Table	IPv6 DHCPv6 Guard
IPv6 Source Guard	IPv6 ND Inspection
IPv6 RA Guard	IPv6 Source Guard
IPv6 ND Inspection	IPv6 Binding Table

NEW QUESTION # 455

What does the PE router convert the IPv4 prefix to within an MPLS VPN?

- A. 48-bit route combining the IP and PE router-id
- **B. VPN IPv4 prefix combined with the 64-bit route distinguisher**
- C. prefix that combines the ASN, PE router-id and IP prefix
- D. eBGP path association between the PE and CE sessions

Answer: B
