Test ITFAS-Level-1 Score Report - Valid Dumps ITFAS-Level-1 Sheet

The TestPDF is committed to presenting the excellent viable observe cloth to prevail within the NICET ITFAS-Level-1 examination. With actual PDF questions, customizable exercise checks, and 24/7 guide, customers can be assured that they're getting the fine possible prep cloth. The ITFAS-Level-1 is a fantastic choice for absolutely everyone looking to increase their profession with the ITFAS-Level-1 certification. Purchase Now.

NICET Inspection and Testing of Fire Alarm Systems Level I Exam Sample Questions (Q84-Q89):

NEW QUESTION # 84

Which three of the following are how a McCulloh transmitter should be inspected? (Choose three.)

- A. Verify location
- B. Physical condition
- C. System normal condition
- D. Distinct waterflow condition

Answer: A,B,C

Explanation:

McCulloh transmitters are part of older fire alarm systems but are still maintained in some jurisdictions.

Inspection focuses on general condition, correct system status, and location verification.

NFPA 72 (2022), Table 14.3.1 - Inspection Frequencies:

Under McCulloh Transmitter:

* "Inspect physical condition"

* "Verify location"

* "Confirm system normal condition"

"Distinct waterflow condition" refers to alarm testing and is not part of the inspection phase.

Correct answers:

* Physical condition

* System normal condition

* Verify location

NEW QUESTION # 85

Smoke alarms in one- and two-family dwellings shall be replaced when they fail to operate or they have been in place a maximum of how many years?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:

NFPA 72 requires smoke alarms in residential settings to be replaced every 10 years, even if they have not shown any signs of failure.

NFPA 72 (2022), Section 29.8.1.4:

"Unless otherwise recommended by the manufacturer, smoke alarms shall be replaced when they fail to respond to operability tests or have been in service for 10 years." Correct answer: C. 10

NEW QUESTION # 86

What must be done if the frequency of sensitivity testing is extended to 5 years?

- A. Detectors must be from the same manufacturer.
- B. Records of serial numbers shall be maintained.
- C. Records of nuisance alarms shall be maintained.
- D. Detectors must be located in the same area.

Answer: C

Explanation:

Normally, smoke detector sensitivity testing is required every two years, but NFPA 72 allows extension up to five years if the detectors have not experienced frequent nuisance alarms and accurate records of performance are maintained.

NFPA 72 (2022), Section 14.4.4.3.2:

"Where detectors are cleaned and maintained and where records of nuisance alarms and changes in detector locations are kept, the sensitivity testing interval shall be permitted to be extended to 5 years." Keeping a log of nuisance alarms helps assess the reliability of the detectors over time.

Correct answer: C. Records of nuisance alarms shall be maintained

NEW QUESTION # 87

Smoke detector activation in the ninth-floor elevator lobby shall activate which of the following functions?

- A. Alternate level recall
- B. Ninth-floor supervisory signal
- C. Ninth-floor trouble signal
- **D. Designated level recall**

Answer: D

Explanation:

The designated level recall function is triggered when a smoke detector is activated in that same elevator lobby. This returns the elevator to that floor (usually the ground or main level) for emergency evacuation, unless smoke is present there, in which case the alternate recall floor is used.

NFPA 72 (2022), Section 21.3.3.1:

"Activation of the smoke detector installed at the designated level shall cause all elevators that serve that level to return to an alternate level." But:

"Smoke detector activation in any other elevator lobby shall recall elevators to the designated level." So:

* If smoke is in the ninth-floor lobby, and that lobby is not the designated level # elevator recalls to designated level.

* Therefore, activation of the ninth-floor smoke detector (not the designated level) causes designated level recall.

Correct answer: B. Designated level recall

NEW QUESTION # 88

What is the testing frequency of a remote annunciator?

- A. Monthly
- **B. Annually**
- C. Semiannually
- D. Quarterly

Answer: B

Explanation:

Remote annunciators provide fire alarm system status at secondary locations. NFPA 72 mandates annual functional testing of these devices to ensure they correctly display and sound appropriate signals.

NFPA 72 (2022), Table 14.4.3.2 - Testing Methods and Frequencies:

Category: Annunciators (remote)

Frequency: Annually

Test Method: "Verify correct visual/audible indication of alarm, supervisory, and trouble signals." Technicians must activate actual alarm, supervisory, and trouble signals and confirm they display correctly at the remote annunciator.

Correct answer: D. Annually

NEW QUESTION # 89

.....

Our company attaches great importance to overall services on our ITFAS-Level-1 study guide, if there is any problem about the delivery of ITFAS-Level-1 exam materials, please let us know, a message or an email will be available. And no matter when you send us your information on the ITFAS-Level-1 Practice Engine, our kind and considerate online service will give you help since we provide our customers with assistant on our ITFAS-Level-1 training prep 24/7.

Test ITFAS-Level-1 Score Report: <https://www.testpdf.com/ITFAS-Level-1-exam-braindumps.html>

Here are several advantages about our Test ITFAS-Level-1 Score Report - Inspection and Testing of Fire Alarm Systems Level I Exam exam for your reference, If you want to remove all the complications of the updated NICET Test ITFAS-Level-1 Score Report Test ITFAS-Level-1 Score Report - Inspection and Testing of Fire Alarm Systems Level I Exam, ITFAS-Level-1 exams PDF question answers also come with one year free update, NICET ITFAS-Level-1 Actual Exams Browsers such as Internet Explorer, Microsoft Edge, Firefox, Safari, and Chrome support the web-based practice exam.

Microsoft Windows includes a lot of different settings and ITFAS-Level-1 utilities that help you secure and maintain your computer system, Managing Linux Applications and Services.
