

Pass Guaranteed Quiz Oracle - 1z1-084–The Best Exam Experience

Our company has become the front-runner of this career and help exam candidates around the world win in valuable time. With years of experience dealing with 1z0-1106-1 exam, they have thorough grasp of knowledge which appears clearly in our [1z0-1106-1 Exam Questions](#). All 1z0-1106-1 study materials you should know are written in them with three versions to choose from: the PDF, Software and APP online versions.

If someone who can pass the exam, they can earn a high salary in a short time. If you decide to beat the exam, you must try our 1z0-1106-1 exam torrent, then, you will find that it is so easy to pass the exam. You only need little time and energy to review and prepare for the exam if you use our [1z0-1106-1 prep torrent](#) as the studying materials. So it is worthy for them to buy our 1z0-1106-1 learning prep. We provide the free demo of our 1z0-1106-1 training guide so as to let you have a good understanding of our 1z0-1106-1 exam questions before your purchase.

Oracle HCM Business Process Foundations Associate Rel 1 Pass4sure Test - 1z0-1106-1 Pdf Vce & 1z0-1106-1 Latest Reviews

Oracle certification 1z0-1106-1 exam is one of the many IT employees' most wanting to participate in the certification exams. Passing the exam needs rich knowledge and experience. While accumulating these abundant knowledge and experience needs a lot of time. Maybe you can choose some training courses or training tool and spending a certain amount of money to select a high quality training institution's training program is worthful. Pass4suresVCE is a website which can meet the needs of many IT employees who participate in Oracle [Certification 1z0-1106-1 Exam](#). Pass4suresVCE's

[100% Pass Quiz 2023 Oracle Perfect 1z0-1106-1 Exam Cram](#)

In reaction to the phenomenon, therefore, the 1z1-084 test material is reasonable arrangement each time the user study time, as far as possible let users avoid using our latest 1z1-084 exam torrent for a long period of time, it can better let the user attention relatively concentrated time efficient learning. The 1z1-084 practice materials in every time users need to master the knowledge, as long as the user can complete the learning task in this period, the 1z1-084 test material will automatically quit learning system, to alert users to take a break, get ready for the next period of study.

Oracle 1Z0-084 certification exam is designed to test the candidates' knowledge and skills in the area of performance and tuning management of Oracle Database 19c. 1z1-084 exam is intended for database administrators, performance analysts, and developers who are responsible for managing the performance and tuning of Oracle databases.

Oracle 1Z0-084 is a professional-level certification exam offered by Oracle Corporation. 1z1-084 Exam is designed to assess the candidate's knowledge and skills in performance tuning and management of Oracle Database 19c. It is intended for professionals who have experience in database administration and want to enhance their skills in performance tuning and management.

Exam 1z1-084 Objectives, 1z1-084 Actual Exam Dumps

Our 1z1-084 valid practice questions are designed by many experts in the field of qualification examination, from the user's point of

view, combined with the actual situation of users, designed the most practical learning materials, so as to help customers save their valuable time. Whether you are a student or a working family, we believe that no one will spend all their time preparing for 1z1-084 exam, whether you are studying professional knowledge, doing housework, looking after children, and so on, everyone has their own life, all of which have to occupy your time to review the exam. Using the 1z1-084 Test Prep, you will find that you can grasp the knowledge what you need in the exam in a short time. Because users only need to spend little hours on the 1z1-084 quiz guide, our learning materials will help users to learn all the difficulties of the test site, to help users pass the qualifying examination and obtain the qualification certificate. If you think that time is important to you, try our learning materials and it will save you a lot of time.

To take the Oracle 1Z0-084 certification exam, individuals must have a solid understanding of Oracle Database 19c architecture and its performance tuning features. They should also be familiar with database monitoring tools, SQL tuning, and troubleshooting techniques. 1z1-084 Exam consists of 80 multiple-choice questions and must be completed within 120 minutes.

Oracle Database 19c Performance and Tuning Management Sample Questions (Q33-Q38):

NEW QUESTION # 33

Examine these statements and output:

```

sqlplus / as sysdba

Connected to:
Oracle Database 19c Enterprise Edition Release 19.0.0.0.0 - Production
Version 19.9.0.0.0

SQL> show parameter optimizer

NAME                                 VALUE
-----
optimizer_adaptive_plans             FALSE
optimizer_adaptive_statistics        FALSE
optimizer_dynamic_sampling           2
optimizer_features_enable            12.1.0.2
optimizer_mode                       ALL_ROWS
optimizer_secure_view_merging        TRUE
optimizer_capture_sql_plan_baselines FALSE
optimizer_use_sql_plan_baselines     FALSE
...

```

What parameter change activates the generation and use of SQL Plan Directives?

- A. optimizer_adaptive_plans=TRUE
- B. optimizer_adaptive_statistics = TRUE
- C. optimizer_features_enable=12.2.0.1
- D. optimizer_dynamic_sampling=11
- E. optimizer_capture_sql_plan_baselines TRUE

Answer: B

Explanation:

The optimizer_adaptive_statistics parameter, when set to TRUE, enables the optimizer to use adaptive statistics, such as SQL Plan Directives, to help improve plans by automatically adjusting them based on the actual execution statistics.

NEW QUESTION # 34

Database performance has degraded recently.

index range scan operations on index ix_sales_time_id are slower due to an increase in buffer gets on sales table blocks.

Examine these attributes displayed by querying DBA_TABLES:

OWNER	TABLE_NAME	NUM_ROWS	BLOCKS	EMPTY_BLOCKS	AVG_SPACE
CHAIN_CNT	AVG_ROW_LEN				
SH2	SALES	3675372	18337	0	0
25	37				

Now, examine these attributes displayed by querying DBA_INDEXES:

OWNER	TABLE_NAME	INDEX_NAME	BLEVEL	LEAF_BLOCKS	DISTINCT_KEYS
AVG_LEAF_BLOCKS_PER_KEY	CLUSTERING_FACTOR	STATUS	NUM_ROWS		
SH2	SALES	IX_SALES_TIME_ID	3	353967	3541460
9		2830691 VALID	675372		

Which action will reduce the excessive buffer gets?

- A. Re-create index IX_SALES_TIME_ID using ADVANCED COMPRESSION.
- B. Re-create the SALES table using the columns in IX_SALES_TIME_ID as the hash partitioning key.
- C. Partition index IX_SALES_TIME_ID using hash partitioning.
- D. Re-create the SALES table sorted in order of index IX_SALES_TIME_ID.

Answer: A

Explanation:

Given that index range scan operations on IX_SALES_TIME_ID are slower due to an increase in buffer gets, the aim is to improve the efficiency of the index access. In this scenario:

* B (Correct): Re-creating the index using ADVANCED COMPRESSION can reduce the size of the index, which can lead to fewer physical reads (reduced I/O) and buffer gets when the index is accessed, as more of the index can fit into memory.

The other options would not be appropriate because:

* A (Incorrect): Re-creating the SALES table sorted in order of the index might not address the issue of excessive buffer gets.

Sorting the table would not improve the efficiency of the index itself.

* C (Incorrect): Using the columns in IX_SALES_TIME_ID as a hash partitioning key for the SALES table is more relevant to data distribution and does not necessarily improve index scan performance.

* D (Incorrect): Hash partitioning the index is generally used to improve the scan performance in a parallel query environment, but it may not reduce the number of buffer gets in a single-threaded query environment.

NEW QUESTION # 35

Examine this statement and output:

```
SQL> BEGIN dbms_workload_capture.start_capture('CAPTURE-ORACLE_TEST', 'TEST', NULL,
'INCLUDE', FALSE); END;
```

```
ERROR at line 1:
```

```
ORA-15505: cannot start workload capture because instance 1 encountered errors
while accessing directory "/TEST"
```

```
ORA-06512: at "SYS.DBMS_WORKLOAD_CAPTURE", line 799
```

```
ORA-06512: at line 1
```

Which two situations can trigger this error?

- A. The user lacks the required privileges to execute the DBMS WORKLOAD CAPTURE package or the directory.
- B. The instance is unable to access the capture directory.
- C. There is a file in the capture directory.
- D. The syntax is incomplete.
- E. The capture directory is part of the root file system.

Answer: A,B

Explanation:

The ORA-15505 error indicates that the instance encountered errors while trying to access the specified directory. This could be due to:

A: Insufficient privileges: The user attempting to start the workload capture might not have the required permissions to execute the DBMS_WORKLOAD_CAPTURE package or to read/write to the directory specified.

E: Accessibility: The database instance may not be able to access the directory due to issues such as incorrect directory path, directory does not exist, permission issues at the OS level, or the directory being on a file system that's not accessible to the database instance.

NEW QUESTION # 36

Examine these commands, which execute successfully:

```
SQL> ALTER SYSTEM SET AWR_PDB_AUTOFLUSH_ENABLED=TRUE;

SQL> EXEC dbms_workload_repository.modify_snapshot_settings(interval=>60);
```

Which statement is true?

- A. AWR- snapshots in all pluggable databases will be purged automatically after every 60 mins.
- B. AD DM is enabled for all pluggable databases.
- C. ADDM, AWR, and ASH reports can be purged automatically.
- **D. AWR snapshots can be purged manually in pluggable databases.**

Answer: D

Explanation:

The DBMS_WORKLOAD_REPOSITORY.MODIFY_SNAPSHOT_SETTINGS procedure allows setting attributes related to AWR snapshots. While the interval setting controls the frequency of snapshot generation, purging them is a separate process that can be managed either automatically (with retention settings) or manually. NEW QUESTION # 37

You need to transport performance data from a Standard Edition to an Enterprise Edition database. What is the recommended method to do this?

- A. Export the data by using expdp from Statspack and import it by using \$ORACLE_HOME/rdbms/admin /awrload into the AWR repository.
- B. Export the data by using the expdp utility and parameter file spuexp.par from the Statspack repository and import it by using impdp into Export the data by using expdp from the Statspack repository and import it by using impdp into the AWR repository.
- C. Export the data by using expdp from the statspack repository and import it by using impdp into the AWR repository.
- **D. Export the data by using the exp utility and parameter file spuexp.par from the Statspack repository and import it by using imp into a dedicated Statspack schema on the destination.**

Answer: D

Explanation:

To transport performance data from an Oracle Database Standard Edition, which uses Statspack, to an Enterprise Edition database, which uses AWR, you must consider the compatibility of data structures and repository schemas between these tools. The recommended method is:

* D (Correct): Export the data using the exp utility with a parameter file appropriate for Statspack (like spuexp.par) from the Statspack repository and import it into a dedicated Statspack schema on the destination. Since Statspack and AWR use different schemas, it's not recommended to import Statspack data directly into the AWR repository.

The other options are incorrect because:

- * A (Incorrect): expdp is not designed to export from Statspack, and awrload is intended for loading from an AWR export file, not a Statspack export.
- * B (Incorrect): Although expdp and impdp are used for exporting and importing data, the AWR repository schema is different from the Statspack schema, so importing Statspack data directly into the AWR repository is not recommended.
- * C (Incorrect): Using expdp to export from Statspack and then importing directly into the AWR repository is not the correct approach due to the schema differences between Statspack and AWR.
