So you don't need to worry about wasting your time on useless ASVAB Exam Materials information. We can ensure you a pass rate as high as 98% to 100%.

College Admission Armed Services Vocational Aptitude Battery (ASVAB) Sample Questions (Q149-Q154):

NEW QUESTION # 149

LLC stands for "Limited Liability Corporation," meaning the business owners' liability is limited. Without the idea of "limited liability," the owners of a business can be held personally responsible for the debts of their business. The idea of "limited liability" originated in Germany in the late 19th century. By the 1940s, the idea had taken hold in 17 countries, but not the United States. In 1977, Wyoming became the first U.S. state to pass an LLC law modeled after the German statute. Many other states eventually passed their own version, though most of them have variations from other states.

Why is the idea of limited liability helpful to business owners?

- A. Because it is now legal in all 50 states.
- B. Because it is a tradition dating back to the 19th century.
- C. Because it holds them personally responsible for their business' debts.
- D. Because it can limit their personal financial risk.

Answer: D

Explanation:

The idea of a limited liability company or LLC is helpful to business owners because it can limit the financial risk to them personally, rather than making business owners personally responsible for the debts of their business. This idea is expressed in the first two sentences of the passage; it is left for the reader to understand that decreased personal financial risk is better, but that's a conclusion most people would easily reach on their own.

NEW QUESTION # 150

The class was extremely tedious

- A. shallow, not thorough
- B. insultingly patronizing
- C. advancing a particular point of view
- D. boring, overly detailed

Answer: D

NEW QUESTION # 151

The nucleus of an atom consists of

- A. electrons, which have a positive electrical charge, and neutrons, which have no charge.
- B. protons, which have no electrical charge, and neutrons, which have a positive charge.
- C. protons (positive charge), electrons (negative charge), and neutrons (no charge).
- D. protons, which have a positive electrical charge, and neutrons, which have no charge.

Answer: D

Explanation:

The nucleus of an atom consists of protons, which have a positive electrical charge, and neutrons, which have no charge- Electrons, which have a negative charge, circle the nucleus in the orbital shell.

NEW QUESTION # 152
