## Essential Facts: Exam Format and Structure

Within the certification process, the applicants need to submit an application on the official website confirming their education and professional experience. Once this application is reviewed by the PMI, one receives a notification by e-mail. After that, the learners can proceed with paying and scheduling the qualifying test. You can take the PMP exam at a testing center as a computer-based option for \$405 if you are already a PMI member and \$555 if you are not a PMI member.

The PMI PMP certification exam consists of approximately 200 multiple-choice questions that the candidates need to solve. About 25 questions are usually used as the pilot ones and are never counted towards the final score. These pilot questions are placed randomly throughout the exam, making it hard for the students to identify which ones are they. The test is known to be available for the individuals in the English language.

## How to book PMI PMP Certification Exam

## PMI Project Management Professional (2025 Version) Sample Questions (Q1602-Q1607):

### NEW QUESTION # 1602

A project manager is planning a project with multiple work packages. Each work package has its own defined scope, but funding will be at the project level.

How should the project manager determine if the allocated resource budget is sufficient to cover the resource costs of the project?

- A. Estimate the costs at the work package level and add those costs to calculate the total cost of the project and compare it to the allocated budget.
- B. Create a budget burndown and a scope burnup and then verify that the project scope is completed before the allocated budget is depleted.
- C. Fund each work package in the order of its importance and shift any remaining scope from nonfunded work packages to funded work packages.
- D. Divide the allocated budget by the number of work packages and verify that each work package can be completed within the allocated budget.

**Answer: A**

### NEW QUESTION # 1603

A development team is struggling to find design documentation for the upcoming sprint. Prior to leaving for vacation, the product owner communicated that the documentation had been uploaded to the project file repository.

What should the project manager do to address this issue?

- A. Investigate new software tools used to manage project artifacts.
- B. Assign a team member to manage project artifacts.
- C. Improve email communication protocols to manage project artifacts.
- D. Audit the effectiveness of the management of project artifacts.

**Answer: D**

Explanation:

Auditing the effectiveness of the management of project artifacts is a proactive approach that aligns with the PMBOK Guide's principles. It involves evaluating the current processes and systems in place to manage project artifacts, identifying any issues or gaps, and implementing improvements to ensure that all project documentation is accessible and up-to-date. This action not only addresses the immediate issue of locating the design documentation but also contributes to the long-term efficiency and effectiveness of project artifact management.

: = The principles for this answer are derived from the PMBOK Guide - 7th Edition, which outlines the importance of managing project artifacts effectively to keep the project work aligned with project requirements and business goals<sup>12</sup>. Additionally, the Professional in Business Analysis (PMI-PBA) references emphasize the role of proper documentation and artifact management in ensuring project success<sup>3</sup>.

### NEW QUESTION # 1604

A project manager is managing a project with team members who are working all over the globe.

The project manager notices that each team member's deliverables do not meet the requirements.

What should the project manager do first?

- A. Discuss the process used to create the noncompliant deliverables with the project team to see if there was a potential misunderstanding.
- B. Meet with the project team to explain that noncompliant deliverables must be reworked and submitted immediately to avoid project delays.
- C. Schedule time with the project sponsor to inform them that the project schedule is slipping due to the time it will take to rework the deliverables.
- D. Assemble the project team via conference call to tell them that disciplinary action will be taken if any more noncompliant deliverables are submitted.

**Answer: A**

### NEW QUESTION # 1605

A team needs to implement a mandatory compliance regulation in a product, which is required for its release. While nearing the product release, when completeness was being verified, it was found that the compliance part was not implemented in the project. What should the project manager do next?

- A. Get an exception approval from the legal team.
- **B. Request the team to implement the compliance.**
- C. Obtain approval from management and release.
- D. Ask the stakeholder to descope the compliance.

**Answer: B**

Explanation:

When a mandatory compliance regulation is not implemented in a project, the project manager should take immediate action to ensure that the team implements the required compliance. This is crucial because compliance regulations are often non-negotiable and are required for legal and operational reasons.

Implementing the compliance will likely impact the project schedule and budget, but it is necessary to meet the mandatory requirements before the product can be released.

: = The PMBOK Guide highlights the importance of adhering to compliance requirements and the project manager's responsibility to ensure that the project meets these requirements<sup>12</sup>. Additionally, the guide discusses the need for project managers to be proactive in managing compliance and the potential consequences of noncompliance<sup>34</sup>.

### NEW QUESTION # 1606

A project manager collects various pieces of information and consolidates metrics in an agile project. The project manager finds that there is slack in the team in terms of productivity. The number of items sent to development per person has decreased by 10%, and the project manager used a root cause analysis (RCA) and discovered the reason is a lack of knowledge in one of the frameworks used for modeling.

What should the project manager do next?

- A. Add new members for the underperforming team.
- B. Arrange for external training amid the tight project schedules.
- C. Seek an external expert to review the framework.
- **D. Foster knowledge sharing and coaching among team members.**

**Answer: D**
