However, you should keep in mind that the Salesforce Certified OmniStudio Consultant exam is a valuable credential and will play an important role in your career advancement.

Salesforce Certified OmniStudio Consultant Sample Questions (Q48-Q53):

NEW QUESTION # 48

A business implements several OmniScripts and requests a design review to identify possible improvements. During the review, the consultant notices that each OmniScript needs to update address data, but each OmniScript collects the information differently using different labels and input elements.

What can the consultant recommend to improve these OmniScripts?

- A. Create a reusable OmniScript to update address information.
- B. Create new versions of the OmniScripts to collect the address information.
- C. Use a DataRaptor Transform to standardize the data format.
- D. Add an address typeahead element to all the OmniScripts.

Answer: A

NEW QUESTION # 49

A business wants to create a reusable OmniScript to capture customer payment information during the order process. The business decides that the first step of the payment process should include:

* Payment type (credit card or bank account)

* Payment amount

Which two elements should the consultant recommend for this step of the process?

Choose 2 answers

- A. Radio
- B. Currency
- C. Number
- D. Multi-select

Answer: A,B

NEW QUESTION # 50

Which OmniScript element can be used to retrieve data from more than one source?

- A. DataRaptor Extract Action
- B. Integration Procedure Action
- C. Matrix Action
- D. Calculation Action

Answer: B

Explanation:

The OmniScript element that can be used to retrieve data from more than one source is Integration Procedure Action. An Integration Procedure Action can execute an Integration Procedure that can combine multiple DataRaptor actions, such as Extract, Transform,

and Load, and also invoke REST or SOAP services. This way, the Integration Procedure Action can retrieve data from different sources, such as Salesforce objects or external systems, and store it in a JSON object for the OmniScript to display

NEW QUESTION # 51

A business requires a solution to generate an event {platform event} using account information. All the event information is related to the customer and is stored in Salesforce.

Using an Integration Procedure, which two actions are necessary to design this solution?

Choose 2 answers

- A. DataRaptor Extract
- B. Response
- C. DataRaptor Post
- D. HTTP

Answer: A,C

NEW QUESTION # 52

A company has deployed an OmniScript that is working as designed. During the process, the OmniScript has multiple steps that allow the user to review lists of cases, contacts, quotes, orders, and contracts for an account. Each step uses DataRaptor Extract Actions to retrieve Salesforce data. However, the OmniScript is reaching performance limitations, and the development team warns that they may begin hitting Governor limits.

Which two suggestions should the consultant propose to address this concern?

Choose 2 answers

- A. Replace the DataRaptor Extracts with DataRaptor Turbo Extracts
- B. Add Limit filter in DataRaptor Extract
- C. Combine the DataRaptors into an Integration Procedure
- D. Add Order By filter in DataRaptor Extract

Answer: A,C

Explanation:

Explanation

To improve the performance and avoid hitting Governor limits, the consultant should replace the DataRaptor Extracts with DataRaptor Turbo Extracts and combine them into an Integration Procedure. DataRaptor Turbo Extracts are optimized for speed and efficiency, and can retrieve large amounts of data without using SOQL queries. An Integration Procedure can execute multiple DataRaptor actions in one call, reducing the number of requests and processing time.

NEW QUESTION # 53

.....

Our OmniStudio-Consultant learning guide beckons exam candidates around the world with our attractive characters. Our experts made significant contribution to their excellence.
