With high pass rate of our OmniStudio-Consultant exam questions as more than 98%, you will find that the OmniStudio-Consultant exam is easy to pass.

Salesforce Certified OmniStudio Consultant Sample Questions (Q88-Q93):

NEW QUESTION # 88

An insurance company wants to create an OmniScript that allows the user to review and change account number such as phone number and website. In this process, the following functionality is needed:

- * Enter the company's website
 - * Enter the account phone number
 - * Each field should display on a separate line of the page
- Which three elements should the consultant include in the OmniScript design solution?
Choose 3 answers

- A. Line Break
- B. Text
- C. Text Area
- D. Telephone
- E. Number

Answer: A,B,D

Explanation:

The three elements that the consultant should include in the OmniScript design solution are: Telephone, Line Break, and Text. A Telephone element can display a field for the user to enter a phone number, with validation and formatting options. A Line Break element can insert a line break between two elements, making them display on separate lines. A Text element can display a field for the user to enter text, such as a website URL

NEW QUESTION # 89

An Insurance agency wants to enable its call center agents to be more efficient when handling customer inquiries. After analyzing patterns in the call logs, the agency discovers that one of the top customer requests is to find total insurance premiums paid as well as the difference year over year. Agents need to relay this information to the customer and then send them a summary report by email. The agency decides to implement this process using OmniScript.

What three OmniScript elements should be used to meet the requirements?
Choose 3 answers

- A. Calculation Action
- B. Email Action
- C. DataRaptor Extract Action
- D. Messaging Element
- E. DataRaptor Post Action

Answer: A,B,C

Explanation:

The three OmniScript elements that should be used to meet the requirements are: DataRaptor Extract Action, Email Action, and Calculation Action. A DataRaptor Extract Action can retrieve data from a Salesforce object, such as total insurance premiums paid and the difference year over year, and store it in an Interface object or a JSON object. An Email Action can send an email to the customer with a summary report attached, using data from an Interface object or a JSON object. A Calculation Action can perform mathematical operations on data from an Interface object or a JSON object, such as calculating the difference year over year

NEW QUESTION # 90

A company wants to create a new digital interaction process that allows customers to request a quote for service from a local retail energy supplier. The process requires the following actions:

- * Allow the user to select one or more energy products from a list

* Get current energy usage data from an external system via an API

* Save the data back to Salesforce as a lead

Which three OmniScript elements should the consultant recommend to meet these requirements?

Choose 3 answers

- A. HTTP Action
- B. DataRaptor Post Action
- C. Multi-select Input
- D. Post to Object Action
- E. Radio Input

Answer: A,B,C

Explanation:

Explanation

The three OmniScript elements that the consultant should recommend to meet these requirements are:

DataRaptor Post Action, Multi-select Input, and HTTP Action. A DataRaptor Post Action is an action that can write data to a Salesforce object or invoke a Salesforce API. The consultant can use a DataRaptor Post Action to save the data back to Salesforce as a lead. A Multi-select Input is an element that can display a list of options for the user to choose from, such as energy products. A Multi-select Input allows multiple options to be selected at once, and can also have icons for each option. An HTTP Action is an element that can invoke a REST or SOAP service to retrieve data from an external system, such as current energy usage data. An HTTP Action can store the response data in a JSON object for further processing

NEW QUESTION # 91

Agents for an insurance company need to know the current and past weather conditions when creating claims customers. The consultant implements a FlexCard for weather conditions in the console to ensure the agents have access to the information. The FlexCard needs to provide fields extracted from a weather API and account field from Salesforce.

According to best practice, what data source should be used?

- A. REST
- B. Streaming API
- C. DataRaptor Extract
- D. Integration Procedure

Answer: D

NEW QUESTION # 92

How many levels deep can reusable OmniScripts be nested?

- A. 0
- B. 1
- C. Unlimited
- D. 2

Answer: B
