Sharing-and-Visibility-Architect Exam covers topics such as data modeling, security, record access, and sharing rules.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q43-Q48):

NEW QUESTION # 43

Universal Containers has a set of Account Management users that should only see Accounts once the Account becomes a customer. The Type field on the Account identifies whether the Account is a Prospect, Customer, Partner or Other. Which two methods could an Architect use to enable this sharing requirement, assuming a private sharing model for Accounts? Choose 2 answers.

- A. Create a Criteria-based Sharing rule that shares the Account to the Account Management Group when the Type is Customer.
- B. Create an Account Sharing Rule that shares all Accounts owned by Sales to be shared with Account Management roles and subordinates.
- C. Create a Public List View, where Accounts of Type Customer are included and share the List view with the Account Management public group.
- D. Institute a process that calls for the Account Manager to be added to the Account Team once the Account becomes a customer.

Answer: A,D

Explanation:

Explanation

The two methods that an Architect could use to enable this sharing requirement are A and D. Option A allows the account manager to access the account once they are added to the account team, which is a type of implicit sharing. Option D allows the account management group to access the account based on a criteria that matches the type field value. The other options are either not relevant or not efficient.

NEW QUESTION # 44

The sales manager in Japan have asked the sales manager in Australia to assist them with closing their deals. How are these requirements achieved?

- A. Assign the sales manager View All on the opportunity object.
- B. Use opportunity teams to automatically add the sales manager as a team member.
- C. Create ownership-based sharing rule.
- D. Use sharing set to give the sales manager access to the deals.

Answer: C

NEW QUESTION # 45

Universal Containers (UC) has a custom object to track the internal net promoter score (NPS) for all of its employees. The manager is in the role above the owner and there are no sharing rules on the object.

How should UC ensure that NPS records cannot be accessed by the owner's manager?

- A. Remove Create, Read, Edit, and Delete from Manager profiles and permission sets.
- **B. Set organization-wide default to Private and uncheck the Access Using Hierarchies option for the NPS object.**
- C. Use Apex sharing to remove NPS object share records for Manager profiles.

Answer: B

Explanation:

For custom objects, Salesforce allows disabling the Access Using Hierarchies option. By setting the Organization-Wide Default (OWD) to Private and unchecking Access Using Hierarchies, you ensure that records are only accessible to the owner and explicitly granted users. This prevents the owner's manager or anyone higher in the role hierarchy from automatically gaining access.

* Option A: Removing CRUD permissions from profiles would block all access to the object for managers, which may not align with business requirements.

* Option B: Apex sharing is unnecessary when the problem can be solved declaratively by adjusting the OWD and hierarchy settings.

* Option C (Correct): Setting OWD to Private and disabling Access Using Hierarchies is the most straightforward solution for restricting access to managers.

References:

* Control Access to Records

NEW QUESTION # 46

Universal Containers has a customer that meets criteria for two Enterprise territory Management territories (Portugal and Southern Europe).

What is necessary to assign opportunities to a territory for this account?

- A. Create a Process Builder Process that updates the Territory field on the Opportunity
- **B. The territory with the highest Territory Type Priority is automatically assigned to the Opportunity**
- C. Create a criteria-based sharing rule on the Opportunity to assign It to a territory.
- D. Create an Apex class that implement. Filter-Based Opportunity Territory Assignment

Answer: B

NEW QUESTION # 47

Universal Containers (UC) is a fast-growing company that sells containers globally. It has thousands of dealerships throughout the world where local dealers service containers. UC implemented a new Partner Community for its dealers. Each dealership has a dealer manager who manages the service agents. The community-sharing model is private.

What is the optimal option to give dealer managers visibility to customer cases only raised by their service agents?

- A. Change external organization-wide default of case object to public read only.
- B. Create a sharing rule to share cases created by service agents with their dealer manager.
- **C. Create a sharing set to share cases created by service agents with their dealer manager.**
- D. Using the role hierarchy, the cases raised by service agents will be visible to their relevant dealer managers.

Answer: C

NEW QUESTION # 48

.....
