The content is easy to be mastered and has simplified the important information. Our PSM-I test torrents convey more important information with less questions and answers and thus make the learning relaxing and efficient. With our PSM-I exam questions, your will pass the PSM-I exam with ease.

Scrum Professional Scrum Master I Sample Questions (Q52-Q57):

NEW QUESTION # 52
During the Sprint Retrospective a Scrum Team has identified several high priority process improvements.
Which of the following statements is most accurate? (Choose the best answer.)

- A. The Scrum Master selects the most important process improvement and places it in the Sprint Backlog
- B. The Scrum Team may add items to the Sprint Backlog for the next Sprint.
- C. The Scrum Team should choose at least one high priority process improvement to place in the Product Backlog.
- D. The Scrum Team should decline to add a process improvement to the Sprint Backlog when things are running smoothly.

Answer: B

NEW QUESTION # 53
What is the typical size for a Scrum Team?
(choose the best answer)

- A. 0
- B. 7 plus or minus 3.
- C. At least 7.
- D. 10 or fewer.

Answer: D

Explanation:
The correct answer is D. 10 or fewer. According to the Scrum Guide 20201, "The Scrum Team is small enough to remain nimble and large enough to complete significant work within a Sprint, typically 10 or fewer people." The other options are outdated or incorrect. Option A was based on the previous version of the Scrum Guide, which suggested a range of 3 to 9 developers2. Option B is too vague and does not account for the upper limit of team size. Option C is too specific and does not allow for flexibility.

NEW QUESTION # 54
When many Scrum Teams are working on a single product, what best describes the Definition of Done?
(Choose the best answer.)

- A. All Scrum Teams must have a Definition of Done that makes their combined work potentially releasable.
- B. Each Scrum Team defines and uses its own. The differences are discussed and reconciled during a hardening Sprint.
- C. Each Scrum Team uses its own, but must make their definition clear to all other teams so the differences are known.
- D. The Scrum Masters from each Scrum Team define a common Definition of Done.

Answer: A

Explanation:
According to the Scrum Guide, when many Scrum Teams are working on a single product, they must have a Definition of Done that makes their combined work potentially releasable. This ensures that there is a clear and consistent understanding of what "Done" means for the product and that there is no technical debt or unfinished work at the end of each Sprint. The other options are not valid descriptions of the Definition of Done for multiple Scrum Teams, as they either create inconsistency, confusion, or waste (such as having different definitions, discussing and reconciling differences during a hardening Sprint, or having the Scrum Masters define a common Definition of Done).

NEW QUESTION # 55
Who must attend the Daily Scrum?

- A. The Development Team and Scrum Master.
- B. The Development Team and Product Owner.
- C. The Development Team.
- D. The Scrum Master and Product Owner.
- E. The Scrum Team.

Answer: C

NEW QUESTION # 56
Which outcome is expected as Scrum Teams mature?

- A. A Scrum Master is no longer needed since they are a mature team now.
- B. The Sprint Retrospectives will grow to be longer than 4 hours.
- C. There is no need for a time-boxed Sprint, since time-boxes are only for new Scrum Teams.
- D. They will improve their definition of "Done" to include more stringent criteria.
- E. Sprint Reviews will no longer be needed.

Answer: D

Explanation:
According to the Scrum Guide1, the definition of "Done" is a formal description of the state of the Increment when it meets the quality measures required for the product. The definition guides the Development Team in creating a "Done" Increment. The definition of "Done" is created by the development organization (or Development Team if none is available from the development

organization). The definition of "Done" may vary significantly per Scrum Team, depending on the context. One aspect of Scrum Teams inspecting how they work toward their Product Goal is that they improve their definition of "Done" over time.

NEW QUESTION # 57

......

It is common in modern society that many people who are more knowledgeable and capable than others finally lost some good opportunities for development because they didn't obtain the PSM-I certification. The prerequisite for obtaining the PSM-I Certification is to pass the exam, but not everyone has the ability to pass it at one time. But our PSM-I exam questions will help you pass the exam by just one go for we have the pass rate high as 98% to 100%.
