- **A. Generate default mapping configurations.**
- B. Create an alignment integration.
- C. Create personalized portfolio plans.
- D. Create custom mapping configurations.

Answer: A

Explanation:

Explanation

According to the Portfolio Planning document, the first step in the process when configuring Portfolio Planning to work with ServiceNow Project Portfolio Management is to generate default mapping configurations. This step creates the default mappings between the Portfolio Planning fields and the ServiceNow Project Portfolio Management fields. The other options are not correct, as they are not the first step in the process. Creating an alignment integration is the second step, creating custom mapping configurations is the third step, and creating personalized portfolio plans is the fourth step.

Answer: C

NEW QUESTION # 41

To set up a group for selection in a resource plan, the group record needs to include which role?

- A. it_project_user
- B. resource_manager
- C. pps_resource
- D. itil

Answer: C

Explanation:

According to the Assigning Resource Roles document, to set up a group for selection in a resource plan, the group record needs to include the pps_resource role. This role grants access to the Resource Management application and allows the group members to view and update their resource allocations. The other options are not correct, as they are not required for a group to be selected in a resource plan. The it_project_user role grants access to the Project Portfolio Management application and allows the user to create and update projects. The itil role grants access to the ITIL application and allows the user to manage incidents, problems, and changes. The resource_manager role grants access to the Resource Management application and allows the user to manage resource plans and allocations.
