Answer:

Explanation:

Answer Area

Microsoft

Azure virtual machines:

- Infrastructure as a service (IaaS)
- Platform as a service (PaaS)
- Software as a service (SaaS)

Azure SQL databases:

- Infrastructure as a service (IaaS)
- Platform as a service (PaaS)
- Software as a service (SaaS)

NEW QUESTION # 28

A company has just deployed a set of Azure virtual machines. They want their IT administrative team to get alerts whenever the CPU of the virtual machines goes beyond a certain threshold.

Which of the following service could be used for this requirement?

- A. Microsoft Defender for Cloud
- B. Azure Monitor
- C. Azure Advisor
- D. Azure Active Directory

Answer: B

Explanation:

You can create alerts in Azure Monitor based on the virtual machine metrics.

The Microsoft documentation mentions the following.

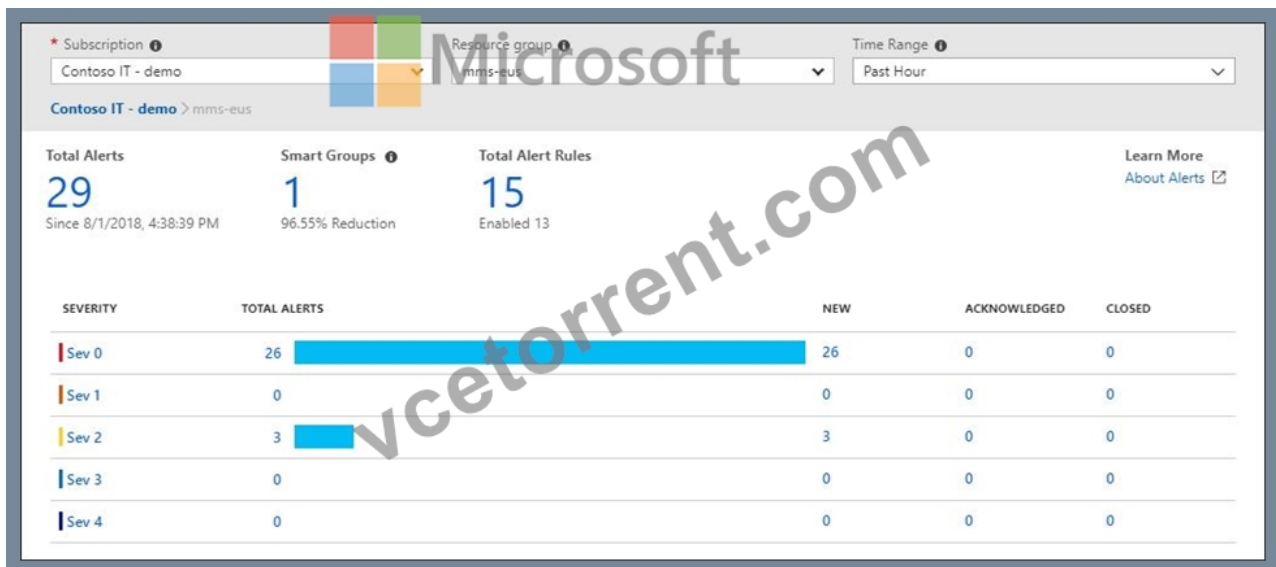

What are Azure Monitor Alerts?

Article • 11/16/2022 • 5 minutes to read • 7 contributors

[Feedback](#)

Alerts help you detect and address issues before users notice them by proactively notifying you when Azure Monitor data indicates that there may be a problem with your infrastructure or application.

You can alert on any metric or log data source in the Azure Monitor data platform.
