Besides, [C_WZADM_01 Exam Dumps](#) of us contain both questions and answers, and you can check the answer when you finish practicing. C_WZADM_01 study materials are also have certain questions and it will help you to pass the exam successfully.

SAP Certified Application Associate - SAP Build Work Zone - Implementation and Administration Sample Questions (Q19-Q24):

NEW QUESTION # 19

Which of the following system types must you integrate manually into the SAP Build Work Zone Content Manager? Note: There are 2 correct Answers to this question.

- A. SAP IBP
- B. SAP Analytics Cloud
- C. SAP BTP ABAP
- D. SAP SuccessFactors

Answer: A,B

NEW QUESTION # 20

To use SAP Build Work Zone OData APIs or webhooks, you must connect to which of the following?

- A. Content Manager
- B. Digital Workplace Service (DWS)
- C. SAP API Management
- D. SAP BTP subaccount

Answer: B

Explanation:

To use SAP Build Work Zone OData APIs or webhooks, you must first connect to your SAP Business Technology Platform (BTP) subaccount. The subaccount provides access to the required services and resources for using the Build Work Zone APIs and webhooks. The other options listed (Content Manager, SAP API Management, Digital Workplace Service) are not directly related to connecting to and using the Build Work Zone APIs and webhooks.

NEW QUESTION # 21

Which of the following system types must you integrate manually into the SAP Build Work Zone Content Manager? (Choose two.)

- A. SAP IBP
- B. SAP Analytics Cloud

Our company is professional brand established for compiling C-S4EWM-2023 exam materials for candidates, and we aim to help you to pass the examination as well as getting the related certification in a more efficient and easier way. Owing to the superior quality and reasonable price of our C-S4EWM-2023 Exam Materials, our company has become a top-notch one in the international market. Our C-S4EWM-2023 exam torrents are not only superior in price than other makers in the international field, but also are distinctly superior in the following respects.

SAP C-S4EWM-2023 Exam Syllabus Topics:

Topic	Details
Topic 1	• Shipping and Receiving: It focuses on configuring Yard Management, SAP Dock Appointment Scheduling, and using the Shipping Cockpit.
Topic 2	• Warehouse Processing, Warehouse Task and Order Creation, Strategies: This topic includes defining warehouse process types and setting up determination, as well as defining putaway and picking strategies.

Topic 3	Warehouse Structure, Resource Management and SAP EWM Master Data: This topic encompasses defining the warehouse structure and setting up resource management, along with creating SAP EWM master data like storage bins and products, packaging specifications, supply chain units, and business partners.
Topic 4	System Integration, Master Data and Delivery Document Customizing: This focuses on setting up system integration, distributing master data, and customizing delivery documents.
Topic 5	Outbound Processes (Wave Management, Cross-docking, Production Integration): This topic covers combining outbound deliveries using wave management, packing and kitting in outbound processes, and staging products for production.
Topic 6	Warehouse Management (Monitor - Cockpit): This topic involves monitoring warehouse activities using the Warehouse Management Monitor, Warehouse Cockpit, and analytical apps.
Topic 7	Managing Clean Core: It covers evaluating and applying clean core principles to ERP to maximize business process agility, reduce adaptation efforts, and accelerate innovation.

100% Pass Quiz SAP - Newest Exam C-S4EWM-2023 Learning

No matter in China or other company, SAP has great influence for both enterprise and personal. If you can go through examination with C-S4EWM-2023 latest exam study guide and obtain a certification, there may be many jobs with better salary and benefits waiting for you. Most large companies think a lot of IT professional certification. C-S4EWM-2023 Latest Exam study guide makes your test get twice the result with half the effort and little cost.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q12-Q17):

NEW QUESTION # 12

For a picking task, the system must determine the storage types from which to remove the stock. How does the system find the storage type search sequence?

- A. The system attempts to use the defined access strategy, then it uses the combination of warehouse number, stock removal indicator, and warehouse process type
- B. The system attempts to use the defined access strategy, then it uses the combination of warehouse number, stock removal indicator, and warehouse process type
- C. The system attempts to read the combination of warehouse number, stock removal indicator, stock type, and warehouse process type, then it only uses the warehouse number
- D. The system attempts to read the combination of warehouse number and stock removal indicator, then it uses the combination of warehouse number and warehouse process type

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The storage type search sequence for stock removal in SAP EWM is determined systematically. Option A ("The system attempts to read the combination of warehouse number and stock removal indicator, then it uses the combination of warehouse number and warehouse process type") is correct, as defined in SPRO: SCM Extended Warehouse Management > Goods Issue Process > Strategies > Define Storage Type Search Sequence. The system first checks the stock removal indicator (e.g., FIFO) with the warehouse number, then falls back to the process type if needed. Options C and D mention an "access strategy," which is not a standard EWM term in this context.

NEW QUESTION # 13

What does SAP recommend for the distribution of master data information via IDoc in a system landscape with a decentralized

EWM based on SAP S/4HANA.

- **A. Define a distribution model with the Core Interface (CIF).**
- B. Define reduced message types for materials, customer, and vendors.
- C. Use existing message types (like MATMAS, DEBMAS).
- D. Distribute plants and shipping points separately.

Answer: A

Explanation:

In a decentralized EWM setup with SAP S/4HANA, master data distribution is optimized using the Core Interface (CIF):

- * D. Define a distribution model with the Core Interface (CIF):
- * CIF ensures seamless integration and real-time synchronization of master data between SAP S/4HANA and EWM.
- * Plants, materials, and other objects are replicated efficiently using the distribution model.

Incorrect Options:

- * A: Plants and shipping points can be distributed together using CIF.
- * B: Reduced message types might limit functionality and are not recommended.
- * C: Using MATMAS and DEBMAS IDocs is possible but less efficient than CIF in decentralized EWM.

References:

- * SAP Help Portal: CIF Integration for EWM
- * SAP EWM Documentation: Master Data Distribution in Decentralized Systems

NEW QUESTION # 14

What are some requirements for automatic wave creation? Note: There are 2 correct answers to this question.

- A. Job for automatic release is scheduled
- **B. Wave templates with release method "Automatic" are defined**
- **C. Conditions and condition records exist**
- D. Wave templates with one or more options are defined

Answer: B,C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Automatic wave creation in SAP EWM groups outbound tasks. Option C ("Wave templates with release method 'Automatic'") is correct as it triggers wave creation automatically, and option D ("Conditions and condition records exist") is correct because conditions (e.g., time, volume) determine when waves are created, both configured in SPRO: SCM Extended Warehouse Management > Goods Issue Process > Wave Management. Option A (job) is for release, not creation, and option B is too vague.

NEW QUESTION # 15

What do you need to configure before you can create warehouse tasks for an outbound delivery order or an inbound delivery?

Note: There are 2 correct answers to this question.

- **A. Warehouse process type determination**
- B. Putaway control indicator or stock removal control indicator
- C. Warehouse order creation rules
- **D. Warehouse process types**

Answer: A,D

NEW QUESTION # 16

How can you configure the storage of products with a high risk of theft in a secured area of a warehouse?

Note: There are 3 correct answers to this question.

- **A. Create a new storage bin type.**
- B. Create a new putaway control indicator.
- **C. Create a new storage type.**

- D. Configure a storage type search sequence.
- E. Configure a material staging area.

Answer: A,C,D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

To secure high-risk products, EWM allows configuration of restricted storage areas. Option A ("Create a new storage type") is correct because a dedicated storage type (e.g., "SECURE") can be defined with restricted access in SPRO: SCM Extended Warehouse Management > Master Data > Storage Types. Option D ("Configure a storage type search sequence") is correct as it ensures the system prioritizes the secure storage type for putaway, configured under SPRO: SCM Extended Warehouse Management > Goods Receipt Process > Storage Type Search Sequence. Option E ("Create a new storage bin type") is correct to define bins within the secure storage type, ensuring compatibility with product dimensions and security needs. Option B (putaway control indicator) influences putaway logic but isn't specific to security, and option C (material staging area) is unrelated to theft prevention.

NEW QUESTION # 17

.....

The pass rate is 98.75% for C-S4EWM-2023 learning materials, and we will help you pass the exam just one time if you choose us. In order to build up your confidence for C-S4EWM-2023 training materials, we are pass guarantee and money back guarantee, if you fail to pass the exam, we will give you full refund. In addition, you can receive the download link and password within ten minutes for C-S4EWM-2023 Training Materials, if you don't receive, you can contact with us, and we will solve this problem for you immediately. We offer you free update for 365 days for you, and the update version for C-S4EWM-2023 exam materials will be sent to your email automatically.
