SAP Certified Specialist - Project Manager - SAP Activate for Agile Implementation Management Sample Questions (Q26-Q31):

NEW QUESTION # 26

You are defining the testing strategy for your project.

What would you include in a scope of Integration Test? Note: There are 2 correct answers to this question.

- A. Connectivity between database and application servers
- B. Interfaces with other applications
- C. Functionality of end-to-end business processes
- D. Quality of data for migration

Answer: B,C

Explanation:

When defining the testing strategy for a project, especially in the scope of Integration Testing, it is crucial to include:

* A. Interfaces with other applications: This ensures that the application under test correctly interacts with other systems, which is critical for operations that depend on multiple interconnected systems.

* D. Functionality of end-to-end business processes: Testing the complete functionality of business processes from start to finish ensures that the system supports all required tasks and workflows effectively, identifying any process or data flow issues before going live. Options B (Connectivity between database and application servers) and C (Quality of data for migration) are relevant to system and data migration testing but do not typically fall under the specific scope of Integration Testing, which is more focused on functional and interface validations. * Best practices for ensuring system integration and process functionality

NEW QUESTION # 27

In SAP Activate, what tool is used in the agile delivery approach during the Realize phase to make forecasts based on actual data?

- A. Product backlog
- B. Scrum board
- C. Burndown chart
- D. Release plan

Answer: C

Explanation:

In the agile delivery approach during the Realize phase of SAP Activate, the tool used to make forecasts based on actual data is:

* C. Burndown chart: This tool helps agile teams track the amount of work remaining in a sprint or project, providing a visual measure of progress against the planned work and timeline. It is particularly useful for forecasting completion rates and adjusting workflows accordingly to meet deadlines. Options A (Scrum board), B (Product backlog), and D (Release plan) serve different purposes, primarily for task organization and release scheduling, rather than providing data-driven forecasts. References:
