ServiceNow CIS-SPM Exam Syllabus Topics:

Topic	Details
Topic 1	Security Operations: In this section, the focus is on security monitoring and analytics, incident response and management, forensics and investigations, and patch and vulnerability management.

Topic 2	• Communication and Network Security: This section covers network architecture and design, secure communication protocols, wireless network security, and strategies to defend against network attacks.
Topic 3	• Information Security Governance: This section of the exam delves into security management concepts and principles, examining organizational structures and roles in security. It also covers developing and implementing security policies, standards, and procedures.
Topic 4	• Security Architecture and Engineering: This section examines security models and design principles, system and application security, as well as cryptography and key management.
Topic 5	• Identity and Access Management: This section explores authentication methods and technologies, authorization and access control models, and the identity management lifecycle.
Topic 6	• Asset Security: This section focuses on information and asset classification, data security controls, privacy protection measures, and intellectual property protection.
Topic 7	• Software Development Security: This section emphasizes securing the software development lifecycle, including application security testing, code review, secure coding practices, and third-party software management.
Topic 8	• Regulatory Compliance and Legal Issues: This section addresses risk management and risk assessment methodologies, including threat modeling and vulnerability assessment. It also explores various risk mitigation strategies.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q111-Q116):

NEW QUESTION # 111

If a project manager is responsible for approving time sheets or submitting time cards on behalf of team members, they should be given what role?

- A. activity_admin.
- B. timecard_admin.
- C. approval_admin.
- D. form_admin.

Answer: B

Explanation:

According to the ServiceNow documentation¹, the timecard_admin role can approve time sheets or submit time cards on behalf of team members. This role also has the ability to create and modify time sheet policies, time sheet groups, and time sheet periods. The other options are incorrect because:

A . activity_admin: The activity_admin role can create and modify activities, activity sets, and activity plans².

C . form_admin: The form_admin role can create and modify forms, form sections, and form layouts³.

D . approval_admin: The approval_admin role can create and modify approval rules, approval groups, and approval stages⁴.

NEW QUESTION # 112

On the demand form, what does the Discount Rate impact?

- A. Internal Rate of Return %.
- B. Financial Benefit.

- C. ROI.
- **D. Net Present Value (NPV).**

Answer: D

Explanation:

According to the ServiceNow documentation¹, the discount rate on the demand form impacts the net present value (NPV) of the demand. The NPV is the difference between the present value of the benefits and the present value of the costs of the demand. The discount rate is the rate used to discount future cash flows to their present value. A higher discount rate means that future cash flows are worth less in the present, and vice versa. The other options are incorrect because:

A . ROI: The ROI (return on investment) is the ratio of the net value to the estimated cost of the demand. The discount rate does not affect the ROI, as both the net value and the estimated cost are based on the present value of the cash flows².

C . Financial Benefit: The financial benefit is the sum of the present value of the benefits of the demand. The discount rate does not affect the financial benefit directly, but only indirectly through the NPV calculation³.

D . Internal Rate of Return %: The internal rate of return % (IRR) is the discount rate that makes the NPV of the demand equal to zero. The discount rate does not affect the IRR, but rather the IRR is derived from the NPV equation⁴.

NEW QUESTION # 113

Idea [im_idea_core] is directly extended from which table?

- **A. It is not extended from any table**
- B. Task
- C. Idea Modules
- D. Project

Answer: A

Explanation:

According to the ServiceNow documentation¹, the Idea [im_idea_core] table is a base table that is not extended from any other table. It stores information about ideas and their categories. The other options are incorrect because:

Task: The Task table is a base table that is extended by many other tables, such as Project, Demand, Incident, etc².

Idea Modules: The Idea Modules table is a child table of the Idea [im_idea_core] table that defines the idea modules displayed on the Idea Portal³.

Project: The Project table is a child table of the Task table that stores information about projects.

NEW QUESTION # 114

When can a user choose from multiple rate types for their work, while logging a time card?

- A. Only if this capability is enabled in the Project Record
- B. Only if the capability is enabled in the Project Preferences
- C. Only one (1) rate type can apply
- **D. Only if the capability is enabled in the Time Sheet Policies**

Answer: D

Explanation:

Explanation

According to the Using rate types and labor rate cards document, a user can choose from multiple rate types for their work, while logging a time card, only if the capability is enabled in the Time Sheet Policies. This capability allows users to select different rate types for different tasks, such as standard, overtime, or travel.

The other options are not correct, as they are not the places where the capability can be enabled. The Project Record is used to create and update project details, such as name, description, and state. The Project Preferences are used to set the default values for project fields, such as number, type, and priority. The option C is not correct, as more than one rate type can apply if the capability is enabled.

NEW QUESTION # 115

Which property controls the changes in cost and resource plans with respect to the change in the start date of a demand or project?

- A. 'Enable altering of planned date for task in WIP/Closed'.
- **B. 'Change Resource Plan, Cost Plan and Benefit Plan Start Date with Demand or Project Start Date Change'.**
- C. 'Calculate ROI percentage based on a project's estimated cost and its net value'.
- D. 'Rollup project start date from tasks'.

Answer: B

Explanation:

Explanation

According to the ServiceNow documentation¹, this property controls whether the start dates of the resource plan, cost plan, and benefit plan are automatically updated when the start date of the demand or project is changed. If this property is set to true, then the plans will be shifted by the same number of days as the demand or project start date change. If this property is set to false, then the plans will not be affected by the demand or project start date change.
